Board here is reasonable, and all ordinary students should graduate here within six months. Write or see me for terms. The greatest and most successful managers of to-day have, with rare exception, risen from the ranks of the operators.

Salaries of operators run from \$50 to \$80 per month, according to the importance of the position. Operators who are Agents, make from \$60 to \$100 per month, and are always eligible for promotion. Lady operators necessary are few but absolutely essential, viz.: a common school education, strict sobriety, honesty, industry and carefulness.

Sir William C. Van Horne, of C.P.R. fame, began his railway career as an operator, so did J. W. Leonard, C. W. Spencer, Geo. C. Jones, and scores of others, all now holding high positions.

The weather has been intensely hot the last few weeks, and consequently rain is much needed, as everything in the line of pasture is dried up. The farmers in this section are through haying and busy at the harvest. Most of the barley and fall wheat is cut.  
Raspberries are very scarce, and there seems to be a picker for every berry.

The number of fields in the competition in the top notch, and will no doubt take a good place in the report which will be issued by the government after all the judging has been completed in these competitions.  
The cow-testing club that has been formed on the south side of the lake in Verulam, is progressing, and has given out its first report, which shows that this plan is the only correct estimate of what each cow in his herd is producing.  
The farmers are here in large numbers, so large that every hotel and boarding house in town is crowded to its utmost capacity. Many report good catches of lunge.

The weather has been intensely hot the last few weeks, and consequently rain is much needed, as everything in the line of pasture is dried up. The farmers in this section are through haying and busy at the harvest. Most of the barley and fall wheat is cut.  
Raspberries are very scarce, and there seems to be a picker for every berry.  
Huckleberries are very good out on the rocks, and the crowd from here talked just below the knee. The child in a very low condition. Much sympathy is felt for the parents in their trouble.

Mr. Raynor, of the Seed Department, Ottawa, was here on the 18th, 19th, and 20th inst., judging the two-year fields of oats which were entered in the field seed competition, under the Verulam Agricultural Society, and was much pleased with his trip through the vicinity, as he found the oats better in this locality than in other localities through-out Ontario.  
The number of fields in the competition in the top notch, and will no doubt take a good place in the report which will be issued by the government after all the judging has been completed in these competitions.  
The cow-testing club that has been formed on the south side of the lake in Verulam, is progressing, and has given out its first report, which shows that this plan is the only correct estimate of what each cow in his herd is producing.  
The farmers are here in large numbers, so large that every hotel and boarding house in town is crowded to its utmost capacity. Many report good catches of lunge.  
Mr. D. W. Grant is pushing ahead the building of Mr. Looze and Dr. H. O. Boyd, and both of these up-to-date residences will be completed in September.  
As the weather has been so dry for the past three weeks, the hay-vesting is progressing rapidly, and if the present weather continues, it will be completed before the first of September.  
The water in the lakes is dropping fast, and it is getting hard enough to get to the upper wharf with the last of the hay.  
The fall fair is on the tapis, and the preparations are being made for it.  
After Mr. Raynor had finished the judging of the fields, he gave an address on "Seed Selection and the 'Eradication of Weeds,'" on Friday evening, at 8 o'clock, in the town hall here. There was a good representation of the farmers of the district present. An interesting and profitable discourse given by Mr. Raynor on the above important subject.
