

# COURSE OF NEW AGRICULTURAL CLASSES

### Regulations Governing the New Studies to be Taken Up at Lindsay and other Collegiate Institutes and High School.

A draft copy of the regulations and courses of study arranged for the agricultural departments of the High School at Essex, and the Collegiate Institutes at Galt, Collingwood, Lindsay, Perth and Morrisburg, was submitted to the Ontario Cabinet at a Council meeting held the other day. The regulations will no doubt prove interesting reading to many in town and country, Lindsay Collegiate Institute being one of those selected by the Ontario government for the initiation of the new course of study. The admission requirements are:

1. Pupils who take the regular two years' special course in Agriculture or a partial course therein at a High School, shall be admitted in accordance with the regulations that govern the admission of other High School pupils. For 1927 to 1928, however, other pupils shall be admitted in the opinion of the Principal of the school and the Public School Inspector, are competent to take up the work. All such pupils shall be regarded as regular enrollees.

2. No course held throughout the country, such persons may be admitted to, in the judgment of the teacher of Agriculture, are competent for the work, whether, for example, farmers or pupils of Public School or other High Schools. A list thereof, and their reported attendance shall be kept by the Principal of the school; but they shall not be enrolled as regular High School pupils unless they have been admitted to a High School as provided above.

The teacher shall hold a B. S. A. from Toronto University, or a certificate of qualification from the Ontario Agricultural College. Such teachers may also take part in the science work of the school at the discretion of the Principal, provided such work does not in any way interfere with their special work as teachers of Agriculture.

The teacher's duties are:

(a) He shall visit from time to time the various parts of the country and report upon their special requirements.

(b) He shall take charge of an office situated in the High School district, where he may meet the farmers, giving them aid and advice, supplying them with the outlines of

the Department of Agriculture and such other farm literature as may be useful, and discussing with them the latest experimental results of the work of the Ontario Agricultural College.

(c) He shall keep in touch with local agricultural associations, farmers' institutes, etc., and shall cooperate with the staff of lecturers, demonstrators, and professors of the Ontario Agricultural College.

(d) Where practicable, he will arrange for excursions for students to other parts of the province, and to other agricultural institutes, and will take special charge during such excursions of those who have been in attendance at his classes.

(e) He shall attend the Winter Fair and annual meeting of the Experimental Union, held yearly at Guelph, for one week in December. Accommodation and equipment must include a suitable laboratory and equipment necessary in carrying out work outlined under chemistry, physics and biology.

(f) An officer of the O. A. C. shall inspect each school or collegiate at least once a year.

(g) The regular Special Course in Agriculture in a High School shall be the two years' one. Particular courses may also be provided in High School for such occasional pupils as may desire them.

9. Regular High School pupils taking the special course in agriculture shall take in addition to the subjects which are obligatory upon all High School pupils, namely, geography, arithmetic and mathematics, English grammar, writing, reading, English composition, English literature and history, with such suitable modifications of the course, and with such additional subjects, as may be deemed expedient by the principal and the parent or guardian of the pupil.

The two years' special course shall comprise field husbandry, animal husbandry, dairy husbandry, poultry, botany, entomology, agricultural physics, and agricultural chemistry, and explanatory notes.

It is not intended that all the work outlined in the course shall be covered in two years. The outline is suggestive rather than obligatory, and the amount of work to be taken up shall be determined by the needs of the community and the nature of the special subjects selected. In some districts, horticultural subjects, for example, will receive special emphasis, in others, dairying, and in others again, stock raising, and so on.

## YACHT VERSUS A MACHINE.

### Geneva is a Racing Machine and Can't be Beaten.

Toronto News: From Commodore Macdonald down everyone concedes the sup to Geneva, which has just demonstrated the fact that the Canadians will have to reconcile themselves to a departure from the healthy style of boat they put their hopes upon in the past, to after the Yankers at their own game, and resort to the freak style of naval architecture before they can hope to win the cup.

When the new universal racing rule was adopted two years ago, it was felt that the yachtsmen had a last evolved something that the designers could not beat. It was a machine with a deck of the line, where the death of freak types of yachts was regarded as inevitable. "We will now have a healthy type of boat, something showing power and stability; the day everybody in yachting circles, where it was generally conceded that all vulnerable points of the rules had been eliminated.

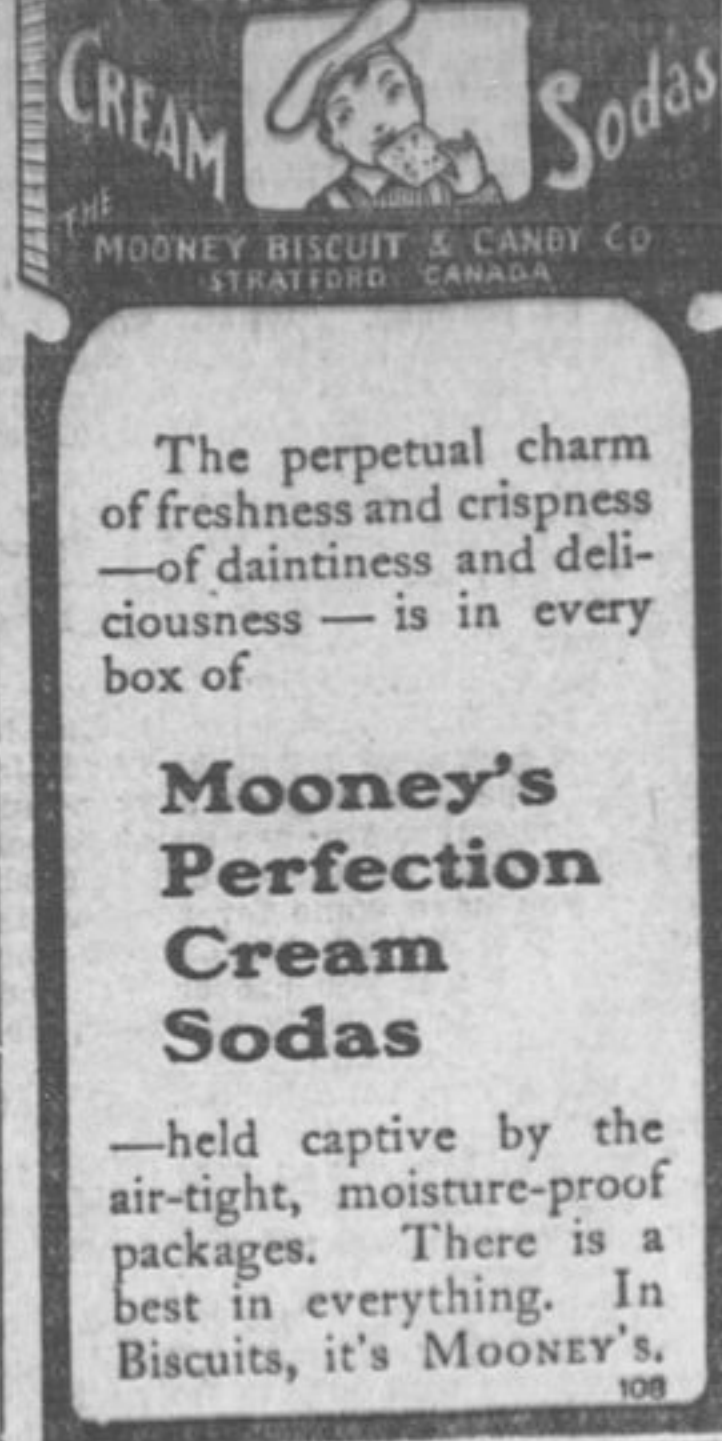

But they had reckoned without the great Herreshoff, who, as a matter of fact, was one of the first to be consulted when the yachtsmen of the sound, who had evaded the rules for years of experience and costly experiment, first drafted the new racing conditions. With characteristic wizard, as soon as he passed his opinion upon the rules, suggesting changes here and there, and apparently doing everything possible to neutralize the tricks of his own hand, he has succeeded in besting the Yankers and their freak characteristics.

This is the first Canadian cup race under the new rules, and the Canadian has produced a type of boat whose usefulness will not depart when the race is over, while the Yankers' machine, when the series is completed, will have on their hands a beautiful ornament, a monument to the skill of Herreshoff. But out they will have to dispose of for the price of the lead in her keel. She is no good for practical purposes, and as a racing machine, she is one of the most perfect pieces of machinery ever produced by an American designer, who has succeeded merely in frustrating the rules, and doing nothing to perpetuate and encourage the construction of the healthy type of boat.

This is what the Canadian yachtsmen are saying, and the inference is that the R.C.Y.C. will try the experiment for the cup, if, indeed, the lessons of the present contest, furnished by Mr. Herreshoff, do not in the meantime result in further revision of the rules.

The recent race was not a battle of skippers, it was not even a contest between the boats, but merely a struggle between the first few minutes to a struggle between Addison G. Hannan and the Geneva on one hand, and Father Time on the other. Their relative skills, and the Canadian came out with flying colors, outgeneralling her famous rival in a way that gladdened the hearts of the Yankers, giving them the only bit of consolation afforded during the race.

## MOONEY'S PERFECTION

The perpetual charm of freshness and crispness — of daintiness and deliciousness — is in every box of

**Mooney's Perfection Cream Sodas**

—held captive by the air-tight, moisture-proof packages. There is a best in everything. In Biscuits, it's MOONEY'S.

## INTERESTING FARM NOTES

### DAIRY BREEFS

Feeding milk too cold or too much at one time will cause scours. A half cupful of wheat flour and a raw egg in the milk given to a calf with scours will often prove effective.

Cows will vary considerably in the amount of solids in their milk and especially in the amount of butter fats.

The kitchen has a lot of odors which will not improve the milk. Every dairy utensil should be thoroughly rinsed and well scalded with boiling water. If, in addition, they can have a good sun bath in a sweet, airy place, so much the better.

Select a dairy breed and stick by it. Be sure it is a dairy breed.

Weeding out the poor animals and keeping the good ones will soon build up a herd.

It is better to wash the milk out of the butter in the churn than to work it out on the worker.

It is important to ascertain how much food it requires to keep the cow in good, thrifty condition, how much food beyond this is converted into milk and at what point she begins to lay on flesh.

Keep the calf pens clean and dry. Calves never do well in dirty, damp quarters.

It is easier to keep cows from getting out by fixing the fences good beforehand than it is to break them off the bad habit after they once get it.

Cottonseed meal produces the largest yield and the richest cream of any food that can be used, but care must be taken not to give in large quantities as it is very likely to cause scours.

You always need a dairy thermometer, but especially at this time of the year. There is nothing but a thermometer will tell you when the milk is cool.

Training and feeding may be made a valuable means of developing the capabilities of cows and a preliminary step to their improvement by breeding.

A little grain will help even on good pasture.

A good cow usually bears the marks of her excellence with her throwing butter fat in the milk is throwing money to the pigs.

By kneading and rubbing the udder of young heifers and drawing the teats a good form may be given to this organ in regard to the milk secretion may be considerably increased.

## CHEMONG PARK REGATTA.

### Sturgeon Point Contestants Won Many Prizes

Evening Post of Aug. 16

Ideal weather favored the annual regatta under the auspices of Chemong Yacht Club, on Chemong Lake yesterday, and as a result the attendance was large. The races were well managed and keenly contested.

The Str. Esturion, carrying close on 200 people from Lindsay, Pleasant Point, Sturgeon Point and Hobbaycon, reached Chemong at 2 o'clock, just as the races were commencing.

Representatives of Sturgeon Point Cottagers' Association made a fine showing in the several events, winning the following:

No. 3—Canoes Paddling, Ladies' Team—Miss Jean Travels, Miss Grace Knowlson, Sturgeon Point, 2nd; Miss Knowlson, Sturgeon Point, 3rd; Miss Knowlson, Sturgeon Point, 4th.

4—Canoes Paddling, Boys 16 and under—Miss Wilfred Knowlson, Sturgeon Point.

10—Canoes Paddling, Ladies' Single—Miss Ryerson, Sturgeon Point; Miss Knowlson, Sturgeon Point; Miss Knowlson, Sturgeon Point; Miss Knowlson, Sturgeon Point.

12—Canoes Paddling, four men—Miss A. Simpson, R. Fort, G. H. Ryan, W. Knowlson, Sturgeon Point; Miss Knowlson, Sturgeon Point; Miss Knowlson, Sturgeon Point; Miss Knowlson, Sturgeon Point.

13—Gasoline launches, 3 hp. and under—Miss Hopkins, Sturgeon Point, 2nd; Wilson's Roy II, Sturgeon Point.

The dinghy race for the championship of the Kawartha Lakes and the Challenge Cup was won by Holdings-Jarvis and Hamilton. The open sailing race was won by Shaw, 2nd Knipman.

The ladies' tandem was won by Miss Knowlson, who were behind, put on a grand sport and gained the lead, the Lindsay contingent stood on their tip toes and yelled them selves hoarse. The Misses Hall hit back a fine defeat in fine spirit and were the first to congratulate the winners.

The Esturion reached the Point on the return trip at about 4 o'clock, and tied up at Lindsay at 10:30.

## THE MAN BEHIND THE COW

If "the man behind the cow" would do his part, no unprofitable cow would masquerade under the fictitious appellation of "milk cow," says E. D. Coburn, of Kansas. She would either be sent to the butcher's block or be made to return a profit by more intelligent care and management. It passes understanding why the farmer in a cow should be tolerated more than theft by a human being. In effect the loss to the consumer is in either case the same. Our government has found it wisdom to will force the farmer to use scientific methods for the detection and suppression of crime by the human family, and by the same token why should our farmers and dairymen be tolerated in a cow should be tolerated more than theft by a human being. In effect the loss to the consumer is in either case the same. Our government has found it wisdom to will force the farmer to use scientific methods for the detection and suppression of crime by the human family, and by the same token why should our farmers and dairymen be tolerated in a cow should be tolerated more than theft by a human being.

## HORSE FACTS

Have his harness fit. He'll last very much longer.

Above all, don't overtax his strength.

Give him a little water very often.

Don't give him a big drink directly after a meal.

Don't allow him to eat too fast. Even scatter his grain on a clean floor.

Don't beat a stupid horse — that only proves the driver's stupidity.

Stay with him while he is shod — the shoe may hit him over the head, ruining him.

A few days' rest, with care to stand on unshod, will do him more good than veterinary treatment in many cases.

## STANDARD IN PHYSICS PAPER

It is said that Students wrote on Questions Not Taught.

It is apparent from the general talk among the authorities of Education Department, that the regulations authorizing the lowering of the standard on certain examination questions will be put into force this year with reference to the senior physical science paper. While it is admitted that the paper as set was too difficult, it is said that the questions asked were not exactly along the lines of work taught the pupils throughout the Province. None of the authorities would take the responsibility of stating that the standard would be lowered on any one paper.

Dr. Smith, Superintendent of Education, characterized as sound reports to the effect that any stated percentage of pupils had failed to pass their examinations. He further stated that it was altogether too premature to make any forecasts in this direction.

## Under New Management.

Our readers will be interested in the news that this season our pretty theatre, the Academy of Music, will be under the management of Mr. W. B. Roenitz, leader of the Strivest-Band. Being likewise leader of the Lindsay orchestra, and having the time required for the efficient performance of the duties, as well as the necessary popularity, it will no doubt appear to the theatre-goers that Manager Small, of Toronto, who controls the Academy, has made a most judicious choice.

## PETERBORO CHEESE BOARD

### 11 5-16c. Was the Highest Price Paid—Offerings Smaller.

Review, Wednesday: The highest price paid for cheese at Wednesday's meeting of the Peterborough Cheese Board was 11 5-16c. About 500 boxes sold at this figure, and the remainder went at 11 1-2c. The offering amounted to 2,996 boxes, as compared with 4,595 boxes two weeks ago, when the highest price paid was only 10 13-16c. Ten days make of cheese was sold, and the bidding was fairly brisk. Some of the salesmen were of the opinion that 11 1-2c. was not enough, but all sold out three factories. The make of cheese is now on the decline, and the regulation on the Board will be getting smaller until the close of the season.

When bids were asked, Mr. Fitzgerald offered 10 3-4c., which was raised to 10 13-16c. by Mr. Cook. Mr. Gleine made it 11 1-8c. Then Mr. Squires came in and offered 11 1-4c. and secured the first call, and took the following factories: Ormound, Killarney, Daisy D., Oakdale, Warsaw, Brickley, Indian River and Oakleaf.

The next went to Mr. Whitton at 11 1-8c., and the following factories sold: Caranville, Westwood, Villiers, Lang and Siquere.

At the same price Mr. Wein took the next lot as follows: Central Smith, Schwaya, Young's Point, Pine Grove, Lakeland, Cedarvale and Oronoke Union.

Three buyers then offered 11 1-4c. simultaneously, and a discussion ensued as to who should get the call. Mr. Wrighton settled the matter by offering 11 5-16c., and took the following: Warrimac, Maple Leaf, Bensford, Trewhin and East Entry.

Mr. Wrighton offered 11 1-4c. for further selections, but Mr. Cook for himself, and Mr. Cook for the further of the Board, and took the following: Crown, Keene, Myrtle, Erieville, North Dummer, Fleetwood and Buckhorn.

Mount Pleasant, South Burleigh and Hope refused the offer.

The buyers present were Messrs. Fitzgerald, Whitton, Gillespie, Morton, Squires, Grant, Wrighton, Wein and Cook.

The board adjourned for three weeks.

## BURGLARIZED DRUG STORE

### W. Dunoon's Premises Instead of McLennan's Hardware Store.

Evening Post of Aug. 15

Yesterday a rumor spread around town that a hardware store had been burglarized the previous night. The Post rang up McLennan's store, which had been mentioned. For some reason Mr. W. McLennan evaded the question and refused to state whether it was his store, that had been entered or not, and as the remaining hardware stores had no knowledge of any goods being stolen, it was inferred that our information that the McLennan store had been entered was correct.

Later it was stated that Dunoon's drug store had been broken into by thieves, and an investigation this was found to be the original robbery. The thief or thieves entered the drug store from the rear through the daylight. Evidently they were "on their job" and thoroughly acquainted with the premises, ingress being effected over a slight lined with bottles, without one being broken.

The thief moved freely around the store. The till was rifled of its contents, which was very little, the proprietor removing the cash every night. A certain class of goods were taken, which may denote that the robber had a special purpose. These goods can be easily identified by the owner, and a clue may be had in this way. To a Post reporter Mr. Dunoon mentioned that he had some facts in his possession that might assist in running the thief to earth.

"What was the value of the goods stolen?" asked the reporter.

"I think it would be better to keep that private," announced Mr. Dunoon.

The Chief of Police is on the track of the burglar, and an arrest may occur at any time.

## Smash-up at Millbrook.

Peterborough Review: A smash-up at the G. T. R. station at Millbrook on Friday night last, broke up a couple of freight cars, and knocked the end out of Tixton's coal shed. Half a train had been left up south of the station while the engine went down for water, and the brakes not being tight enough the cars started to run back and met the engine, causing the collision. No one was hurt.

## Everyone Glad to See Him.

Peterborough Review, Wednesday: After an absence of nearly two years, Mr. George Fitzgerald, appeared on the Peterborough Cheese Board today, and was warmly welcomed by buyers and sellers alike. Mr. Fitzgerald was, before his illness, one of the best buyers on the Board, and his appearance today was made the occasion of a few toasts of welcome by President a Biddell. He was everywhere and was glad to see Mr. Fitzgerald in his place again. Mr. Fitzgerald is recovering slowly from his long illness and is gradually regaining strength.

## GOLDEN WEDDING AT KEW BEACH

### Mr. and Mrs. Wm. Battisby Married 50 Years—All the Children Present.

The following from last week's Toronto Star will interest many Lindsay friends:

Kew Beach, Aug. 15.—The residence of Mrs. Carl 1989 Queen east was in gala attire last evening in celebration of the fiftieth anniversary of the marriage of her parents, Mr. and Mrs. William Battisby. The lawn and house were profusely decorated with flags and Chinese lanterns for the occasion, and dinner was served by the lawn by a caterer. The gathering was unique in its way, Mr. and Mrs. Battisby having the pleasure of the company of all their children, five daughters and two sons, with several grandchildren as well as many friends from the city and outside points.

Mr. and Mrs. Battisby received the congratulations of the guests in the drawing room, which was prettily decorated with palms, ferns and cut-flowers. The old couple received many presents including gold pieces to the value of \$100.

The guests enjoyed a dance later in the evening, in which Mr. and Mrs. Battisby, took part with as much vigor as some of the younger branches of the family.

Mr. Battisby was born in Edinburgh, Scotland, 74 years ago, but came to this country at an early age, taking up his residence at Port Hope, where he has lived ever since.

Mrs. Battisby is a Canadian by birth, having been born in Port Hope for ten years, when they first moved to Peterborough, where they have been living in Toronto. There has been only one death in the entire family of three generations, one grandchild being dead.

Congratulations were received yesterday by wire from Montreal, Chicago, Port Hope, Peterboro, Muskoka, Brockport, North Madison, Iowa and Grand Rapids.

Among the members of the family present were: Mrs. M. A. Carr, Mr. J. J. Battisby, Mrs. R. A. Gledhill, Mrs. S. B. Shaw, Mrs. W. A. Battisby, of Chicago; Mrs. S. B. Lattin, of Lindsay, and Mrs. W. J. Thompson, of Peterboro.

## Departmental Examinations.

Inspector J. H. Knight, town, furnished The Post with the following: Of the two examinations, Junior Mensuration and Junior Teachers, of which a few wrote on both examinations, of Chicago; Mrs. S. B. Lattin, of Lindsay, and Mrs. W. J. Thompson, of Peterboro.

Inspector J. H. Knight, town, furnished The Post with the following: Of the two examinations, Junior Mensuration and Junior Teachers, of which a few wrote on both examinations, of Chicago; Mrs. S. B. Lattin, of Lindsay, and Mrs. W. J. Thompson, of Peterboro.

Every packet will kill more flies than 100 sheets of sticky paper

**WILSON'S FLY PADS**

SOLD BY DRUGGISTS, GROCERS AND GENERAL STORES 10c. per packet, or 3 packets for 25c. will last a whole season.

**PANDORA RANGE**

Large Broiler Door

Open the broiler or roasting door of the Pandora and you'll find an opening much more generous than ordinary ranges. It's both wide and deep, so that you can easily place a big steak right over and almost touching the red hot coals, where it will broil quickly. And it's only by rapid broiling that a steak will retain its natural flavor and rich, juicy tenderness. Pandora is the range that cooks things right.

This broiler door can also be used for feeding the fire without disturbing the pots, etc., on the top.

If your local dealer doesn't sell the Pandora, write direct to us for free booklet

**McClary's**

London, Toronto, Montreal, Winnipeg, Vancouver, St. John, Halifax

## An Old-Time Barn Raising.

John Junkin, of Verulam, had his barn raising Saturday, and a big time it was. Over 150 people were present. It is astonishing how they flock out to an event like this. It is a straw house 45x60 with a beautiful stone foundation built by H. V. Cook of Hobbaycon. The frame was set by Tom Archer. When everything was ready sides were chosen and capped by Casey Junkin and Wm. Kelly. The excitement was fierce and to see Robt. Junkin with a crowbar in one hand, and laying down orders with the other, was amusing at a distance. Gardner Kelly, Thos. J. Nichols and Norman Curtis distinguished themselves in the air and did some remarkable stunts. However, after a good, hot and exciting race, Casey won by over an hour. That it was fun to see Kelly's men grunting away, and it looked as if everything they took hold of was hot. They almost let the plate fall. I think they finished, but it must have been late for I didn't wait. There was a bit of a jig in the evening that was much enjoyed. Fancy, over 50 girls present, and all dances. The Misses Junkin, Blanche Rck, Wilcox, Graham and many others assisted at the table, and a right jolly day was spent.
