Easy to Shake Down.

Shaking down common ranges is heavy enough work for a man-it is altogether too heavy for most women. The "Pandora" range grates are composed of three bars, and each bar bears an equal portion of the coal and ashes, and are

"low geared." The weight thus distributed makes the grates work easily, and the shaking is so light that a child can do it.

Easy management is only one of the strong features of the "Pandora" range. You can know all about it by sending for a free booklet. Sold by all enterprising dealers,

Battle Befere Pert Arthur. Che Foo, Sept. 26 .- As a result of the battle before Port Arthur, which began on Sept. 19, the Japanese succeeded in capturing several important positions, and yesterday the Russian tenure of the big forts guarding the north, northeast northwest sides of the town is seriously threatened. Chinese information places the Japanese losses under 8,000 for the three days' fighting, and this comparatively small casual- cial House. The control of the water supply is now in the hands of the Japanese. Military experts here are of the opinion that if the Japanese capture either Rihlung or Kikwan Forts, or the Itz and Anshu Forts, the doom of Port Arthur is sealed, and for this reason the importance of the results obtained by the Japanese in their latest assaults upon the Russian positions is obvious.

Russians Fought Fiercely. At 5 o'clock of the afternoon Sept. 20, the Japanese captured supplementary fort which from the lower ground threatens the fort on Itz Mountain. This ended the heavy fighting for that day, although the Japanese were compelled to resist
