

# SILVER VEIN DISCOVERED IN HALIBURTON

### Important Find Made by American Prospector—Mr. McDuff Now Owns a Treasure Land of 200 Acres—Ore Tested High in Toronto.

(Peterboro Examiner).

Beneath a few inches of surface soil Mr. McDuff, of Haliburton County, has discovered a treasure which in the opinion of a prospector has changed the owner from a hard working farm laborer to a rich and independent man. Mr. McDuff has already been offered a sum of money equal to many times the value of his property for farming purposes, but he has stoutly refused to sell.

He was in the city on Tuesday on his way home from Toronto, where he had taken a quantity of the rock found on the farm for experimental purposes and found that it contained a large percentage of silver. While there he was offered a good many schools for his land, but would not accept—at least not until further investigations have been made. While in Peterboro Mr. McDuff called upon Mr. C. S. Patterson, of Patterson & Co., Simeon-st. and while looking over some samples of rich Cobalt silver ore told the story of this phenomenal find of the concealed treasure not more than 70 miles north of the city.

**PURCHASED 200 ACRES.**

Some 20 years ago he purchased a farm containing 200 acres in Haliburton, from the Government at a nominal price for farming purposes.

This land lies just north of the northern boundary of Peterboro County, and has been scarcely profitable enough to secure for the owner a living.

Last week an American prospector who has been in that district on the lookout for valuable ore, came across Mr. McDuff's property and informed him that he might cease his strenuous labors, as he was a rich man. The latter followed his benefactor to the short distance and dug the rock containing silver and graphite.

### A VALUABLE FARM.

Not only does the small area cleared away by the shovel contain the valuable rock, but Mr. McDuff has reason to believe that it is spread over the most of his farm. Investigation which he intends making immediately will reveal the truth of this conjecture.

In a couple of weeks time he will have samples of the ore sent to Mr. Patterson's office where they will be on exhibition to any who wish to see them.

Should this mine bear out the opinions of the experts who have tested the mineral, there is every reason to believe that there will be a Cobalt rich mine and prospector to that new found treasure land in the near future.

Mr. McDuff lives near Gooderham, Haliburton County, which place is being greatly excited over the bright prospects in view for its advancement.

# Free Treatment for Sick Kidneys

### WRITE FOR GIN PILLS

If you have suffered for years with kidney trouble—if you know your kidneys are sick, but have not been able to find anything that will help you—or if you suspect that you have kidney disease, write for a sample of GIN PILLS, the pills that cure. We don't ask you to spend a single penny, or promise to spend any. Simply take the box of pills which we send you free of charge. We leave it to you whether or not you will take any more after the sample box is gone.

**RAT PORTAGE, October, 1915**

I was troubled for about two years with kidney trouble, so common among railway men. I decided in the regular way and took a great deal of medicine, but received no benefit. My friend recommended GIN PILLS, and I am pleased to state that after taking one first box I got relief, and after the second box I feel any indications of a return of the trouble, a few doses puts me all right again.

**CHAS. SIMMONS, C.P.R. Engineer.**

This letter is the experience of hundreds. They try doctors and drugs without relief, but they find the cure for their trouble in GIN PILLS. Take their word for it, and get the cure. Mention the name of this paper, and we will send you, absolutely free of charge, a sample box of GIN PILLS. They are sold by all druggists at 50c a box, or 6 boxes for \$2.50.

**THE SOLE DRUG CO. - WINNIPEG, MAN.**

# WILL PARALLEL G. T. R.Y.

### CANADIAN PACIFIC TO CONSTRUCT ANOTHER ROAD.

Belleville to Toronto—Will Touch all the Lakeshore Towns.

Belleville, September 6.—The C.P.R. is to parallel the Grand Trunk between Belleville and Toronto in the comparatively near future. A survey party is to start out to-day under the direction of Mr. Harry Willford, divisional engineer, Toronto, to begin the preliminary work of making surveys for the new line, beginning at this city and working westwards.

It is expected that the work will be completed within a year, when track-laying will be commenced. The new line is to extend from Tweed to Toronto, and will prove a formidable competitor to the Grand Trunk. In fact, it would not be surprising if it captured the greater portion of freight traffic in the Grand Trunk line, it will pass directly through the most of the towns between this city and Toronto, as the members of the survey party have received instructions to get as close as possible to these places.

In the case of the line which is frequently at a distance varying from half a mile to three miles from the business centres. This condition of affairs has proven to the great inconvenience to the citizens of these places.

The C.P.R. does not intend to make a similar mistake. The new line will run southwards from the Toronto-Montreal line and will then continue westward to the Trenton, Queen City, Coburn, Grafton, Cobourg, Port Hope, Newcastle, Bowmanville, Oshawa, Whitby, Pickering and Scarborough.

# OTHER IMPROVEMENTS.

The Post is in a position to state authoritatively that Port Hope passenger station is to be removed east of the Viaduct and thus considerably nearer the centre of the town. This will necessitate the construction of a section of new track from the present Midland line.

It is beyond all doubts also the intention of the management in the near future to straighten and improve the grade of the line between Blackwater and Stouffville.

This latter is great news for Lindsay travellers.

# SOME SMILES ARE NOT TO BE TRUSTED

### Students of Human Nature will Find Food for Reflection in the Following List of Examples Said

We have heard and read much relative to the smile that won't come off. But have you ever seen the man with the smile that won't stay on?

The man who has the smile like the wolf in Little Red Riding Hood? The smile that shall have been enjoyed when Little Red Riding Hood is all eaten up?

You have seen men with smiles like that.

Sometimes you see the smile that won't stay on, on the face of a beggar on the street, who, when asking for a dime, has a blessing ready if you give and a curse if you don't happen to give him a coin of the realm money into the outstretched hand.

Sometimes you see it when, after a particularly fine dinner, and you have tipped the waiter liberally, and then as you turn away you hear him say: "Mr. E. Z. Marquis, up in 223, has turned a half-dollar my way."

Sometimes you see it on the face of some long-faced, bewhiskered old hypocrite, who has made his money shoving on notes, rendering his property for charitable purposes, comforting widows and discharging the last penny on the mortgage and interest. You see the smile that won't stay on when in a prayer meeting he "thanks God that he is not as other men are." And when you see in your other men are not as he is."

The smile that won't stay on usually is fastened to a face that is made to go with the heart of a grouch. The conscience of an India rubber man, and the grin that is cheered only by the drink of dollars dropping into his coffers, ground out in the mill of oppression and rounded in the mould of deceit.

It's a good thing for men living in this busy workaday world that the majority of them are blessed with that quality which the physiologists call "ability to read human nature." Otherwise the smile that won't stay on would be ready to warn the cockles of the heart as the smile that won't come off.

We love the man who, in the exuberance of good nature, loves everybody. We despise the man who wears the smile of the hypocrite simply for the sake of gain.

We honor the man that can tread

# PORT PERRY MAN CHOKES.

### Strangled by a Piece of Meat—Died in Five Minutes.

Port Perry, Sept. 6.—William Tremont choked to death here last night on a piece of meat. He was well known, having followed his trade of painter and paperhanger for many years. It appears he had been loafing around for several days, doing more or less drinking, and last evening went to get some supper. Those who were there said that he took a very large piece of meat in his mouth and followed it up immediately with a dry swallow. He began to choke and a doctor was telephoned for. He was quickly taken to the dying man's side, but could save him, and he died in a very few minutes. The coroner decided that death was accidental.

### HIGH AUTHORITY ON FARMING GIVES HIS IMPRESSIONS.

**Effect of Japanese Current on the Climate—Results of Irrigation.**

A telegram from Winnipeg says that Herbert Myrick, of Orange Judd & Co., the Phelps Publishing Company, editor of the American Agriculturist, the Orange Judd Farmer, the New England Homesteader, and the Farm and Home, American farm journals, having a combined circulation of several hundred thousand, after making an extended tour through Western Canada, gave his impressions of the country.

"I have made it my custom," said Mr. Myrick in an interview, "to visit personally, every state and territory in which our papers circulate once each year, and to make a very careful examination of these districts. In pursuance of this custom I came to Canada several weeks ago. Before coming, I had the reports of a number of my associates, who had visited Canada on many occasions. Among these were Professor Thomas Shaw, the live stock authority, Clarence A. Shamel, associate editor, B. N. Snow, statistician and crop reporter, and Otto H. Haubold, manager of the land advertising of the Orange Judd Farmer and the Farm Home. I conceive that I took the right way to Alaska, and making the long journey of 1,500 miles through the inland seas. I saw the evidences of the great influence of the Japanese ocean currents. At Skagway I picked the finest field of the finest poppies that ever grew.

"When I remembered that the mountain ranges of the south entirely disappeared, and the cold north, and when I recollected the great influence of the Japanese ocean currents, I at once understood why the climate of Western Canada should be such as it is."

"How did British Columbia impress you?"

"I was greatly struck with the terminal facilities in Vancouver, and the splendid harbors found along the coast. The undeveloped mineral resources, the lumber, and the water powers of the province also made a strong appeal to me.

"Prior to my own visit to Canada I had thought that the reports from our men were too enthusiastic, and that even Prof. Shaw had his judgment influenced by hospitable treatment. I am now free to confess with pleasure that they did not put the case a bit too strongly. The Orange Judd Farmer and the Farm Home have endeavored to tell the truth about this country, and we believe that we have sent many thousands of people to it, but I am proud that we have understated the case for the province. In such quantities and in such low cost as to enable great value of vast areas now considered suitable only for range purposes.

"What will the value of irrigation be to the Calgary district?"

"With reference to the C. P. R. irrigation project in Alberta, I desire to say that I consider it the most rational in America. This enormous ditch has been constructed with such economy, and the intake water is obtained so economically, that this land is sold at less price per acre to the settlers than any other irrigation project in this continent. The annual cost of water for irrigation (50 cents for each acre elsewhere. It is less than prevailing elsewhere. It is brought up to the irrigated section of North Colorado, and understood in the great value of irrigated land in Northern Colorado to \$300 per acre. In the Yakima Valley, in Washington, orchard land under irrigation is worth up to \$2,000 per acre. It is difficult to say in advance just what this Calgary land may be worth. As a best sugar expert, I was anxious to see a test made on the Calgary plain of best sugar raising, to which this area seems well adapted. As already announced, a Japanese expert is now looking after the establishment of a best sugar industry.

"My belief is that, with its other natural advantages, this irrigation

# Everyone Run Down

### depressed—with headaches, indigestion, constipation, boils, tumours, scrofula or other result of impure blood—can find speedy relief in Mira Blood Tonic.

It draws out the poison from the blood and tones up stomach, liver, kidneys and bowels. Pure, safe, palatable—contains the medicinal virtues of curative herbs which act in a natural manner on the system. Price, \$1 a bottle—6 for \$5. At drug-houses or from "The Chemist's Co. of Canada, Limited, Hamilton—Toronto. Be sure to get the genuine—ask for Mira Blood Tonic."

scheme insures to the city of Calgary a population, within 15 years of 100,000 people.

"Farther north I found the country rich and fertile, more rolling, more wooded, with a climate equally good, if not better. The finest crops I have seen anywhere were average crops in the Edmonton country. Between Calgary and Edmonton there are immense areas of splendid land, which may be compared at the present time to low prairie. Edmonton itself is the metropolis of the inland empire of the Canadian Northwest. By this inland empire I refer to the immense area beginning 100 miles south, 200 miles east, and stretching away to the north and west indefinitely. Few people in Winnipeg realize the magnitude and richness of this empire. It may be compared to the immense empire of the American states, between the Cascade and the Rocky mountains, consisting of 150,000 square miles, of which Spokane is the centre.

# KILLS CATARRHAL GERMS.

### Hyomei's Healing Air Reaches Every Part of Nose, Throat and Lungs.

Hyomei is the only scientific and thorough way to cure catarrh. Stomach dosing does not cure the catarrhal germs in the air passages and cannot possibly drive them from the system. By breathing air medicated with Hyomei the germs in the nose, throat and lungs are killed and all traces of catarrhal poison are effectually driven out.

Some people may think that Hyomei is simply for catarrh of the head and throat, but it is equally effective in catarrh of the stomach, liver, or kidneys. The catarrhal germs are in the mucous membrane and Hyomei not only kills the germs in the air passages, but enters the blood with the oxygen thus killing the germs in the blood and freeing the whole system from catarrh.

Hyomei is sold under an absolute guarantee to refund the money unless it cures. A complete outfit costs but \$1.00 extra, bottles 50c. For sale by all druggists. The R. T. Booth Co., Buffalo, N.Y.

# PATRONIZE HOME INDUSTRY.

### Is the Motto of a Peterboro Alderman—A Fair Business Proposition.

Peterboro Times: At Monday evening's Council meeting, when the question of giving the Peterboro Industrial Exhibition Association a grant of \$400 was raised, Ald. Geo. Ball, while expressing his sympathy with the measure, took exception to the act of the directors last year in sending out of town for a portion of their printing. He could not see the consistency of a society which gets a big money grant from a corporation sending out of the limits of that corporation for any supplies that may be obtained from the ratepayers' pocket, and for their equitable portion of said grant. Further in subsequent conversation, Ald. Ball remarked that there exists too much patronizing of out of town sources of supplies by business people who, to use a popular aphorism, proclaim from their street corners that it is the duty of all citizens to patronize home industry. Ald. Ball, to use the words of Mr. O'Connell, may be a visionary reformer, but there is more truth than fiction in some of his arguments, to say the least.

# Daily Hypocrites.

When you say to your guest, "So sorry you must go."

When you tell your ugliest friend "how pretty" she is looking.

When you shake your dearest enemy by the hand and say, "I am glad to see you."

When your heart shivering with dislike you write, "Yours faithfully," "Yours sincerely."

When you say "Thank you, dear, so glad to have seen you," and think "Gracious didn't she look a trifle! Had dyed a new shade and all made up. Fifty, if she's a day, and the way she frisks about! What an awful old woman!"

# Ontario's Bountiful Harvest.

The intimation is made, with official confirmation, that the present is the richest agricultural year Ontario has ever experienced. An acre of grain yields more than the previous year everywhere reported, and quality is everywhere better than the previous year. With natural conditions more favorable than in previous years the average yield per acre in all grains shows a substantial increase over all previous records. This is due to a kind Providence, and is a proof of agricultural wisdom. In all grain shows a restoration over the previous year. In all grain shows a restoration over the previous year. In all grain shows a restoration over the previous year.
