M. J. CARTER. The Egyptians used hieroglyphics in writing and many merchants seem to be in the same stage of evolution as that ancient and interesting people, for they mark their prices by signs which are at times fearfully and wonderfully made, and their 'plain figures' are even more erratic; \$10.00 may mean \$9.50 or \$11.00, according to the inspiration of the moment. With us \$10.00 means TEN DOLLARS and nothing else. OVERCOATS. We carry a range very large in extent and varied in character. Troubles of a Newspaper Man. Some of the readers of newspapers are made to smile occasionally by the blunders made in the local news items. Although these are not as numerous as they might be, still we admit that mistakes do happen. Well, the other day the following item was noticed in a weekly issue of 'The Arrow.' Burk's Falls. It was speaking of a cattle show and concert: 'The concert given by Robinson's most charming ladies was highly appreciated. They sang in their charming manner, winning the plaudits of the entire audience, who pronounced them the finest brood of short-horns in the country. A few are of rich brown color, but the majority are spotted brown and white.'
