Earns His Money.

(Farber, Mo., Forum.) There is one satisfaction in being a farmer; it can not be said that he "wins" whatever fortune he gets; he earns every dollar of it, he does not take a cent of it from some other man. It comes to him first hand out of the soil, and his money is the cleanest in all the world.

Rink Fees Advance in Port Hops.

The Port Hope Guide of Saturday said: "It will be noticed that in the advertisement of the Skating and Curling Rink Co. the price of season tickets has been advanced 50c. over last year's prices. One of the directors informed The Guide representative that the prices charged last year were the lowest in the province, and for this reason the increase has been made."

The Steamer Kataloon.

Capt. Elliott and Engineer Moynes, owners of the Str. Kathleen, have had the staunch little vessel pulled out from the slip at the head of Lindsay-st. It is a trifle early to speak of next season's service, but it is whispered that various improvements will be carried into effect by the owners during the winter. Citizens have every reason to be satisfied with the service given until illness overtook the efficient engineer.

TOTAL CROP YIELDS

List of the Reports of 2,000 Government Correspondents.

FORECAST TOO SANGUINE

August Figures as Corrected by the Actual Results of the Threshers— Varied Departments of the Agriculture of This Province Find Mention in Bulletin—Farmers Too Busy to Market Wheat.

Toronto, Nov. 21.—A statement containing crop conditions on Nov. 1, based on the reports of 2,000 correspondents, has been prepared by the Ontario Department of Agriculture.

All over the province threshing was well advanced, as correspondents reported. Wheat has not been so largely marketed as usual, prices not being considered as satisfactory by those who could afford to hold, while others are keeping it over to feed stock unless prices rise. Barley is now mainly fed to hogs and other live stock, and while considerable oats have been marketed, much more will be used on the farm. Several correspondents claim that farmers are too busy with fall work to go to market, preferring to wait for the sleighing season.

Scarcity of Farm Help. Only in a few localities was the supply of farm labor equal to the demand. The continued exodus from this province to the Northwest and New Ontario, is given as the chief cause of the scarcity of able men to help on the farm. While some correspondents believe the English immigrants as farm laborers, others aver that there has been a great improvement in quality during the last year or two. The general opinion is that wages will remain at about the present rate, as farmers cannot afford to pay more. The situation is being somewhat relieved by the use of improved farm machinery, and by turning more land into pasture, it is almost impossible to secure domestic servants on the farm, as girls seem to prefer town life.

Wire Fencing Brisk. More or less activity in farm improvements is reported all over the province. An immense amount of wire fencing has been done, some of the wire being substituted for the old rail or "worm" fence. A considerable number of new dwelling houses and barns have been erected, but much more has been done in the way of building stone or concrete foundations under remodeled houses and barns, the latter case affording more comfortable and convenient stabling for live stock. More work would have been done in all these lines but for the scarcity of labor.

Beet Sugar Industry. The Ontario Sugar Co., whose factory is at Beira, are now receiving beets for sugar making from 5,113 acres. The area in 1905 was 4,477 acres, and the yield was 48,085 tons, an average of 10.7 tons. The company estimated an increase in the yield per acre for 1906. The Wallaceburg Sugar Co. are handling the product of 5,700 acres, and estimate a yield of between 60,000 and 60,000 tons. The latter company report the sugar yield this year as a little below the average.

Grain Growers' Association's Charge Heard by the Commission.

Winnipeg, Nov. 21.—The Grain Growers' Commission opened in Winnipeg yesterday to investigate the charges which have been made by the Grain Growers' Association, that a combine exists to keep down prices. Five witnesses were heard in all. The principal witness was E. A. Partridge, president of the Grain Growers' Co., who gave it as his opinion that his company had been ousted from the grain exchange because it was interfering with business line elevators and was educating the farmers to handle their own grain.

H. R. Rutan admitted that the straight salary rule was stifling competition and John Love of the Winnipeg Elevator Co. explained that the charge from commission to salary was to conserve the dignity of the trade and to prevent the commission from cutting their own throats.
