

Incompetent Men

Even with so simple a matter as shoe blacking not one bootblack in a hundred knows how to shine shoes properly. In half an hour the ordinary shine looks like dull stove polish.

There's always good wages for competent men—but they are hard to find. We want a man in this town—when we find him we will make it profitable for him to push our selling system for THE SATURDAY EVENING POST.

SKATING AND ITS VALUE TO HEALTH.

Good Advice for Parents and Others—The Exercise is a Splendid Developer of the Lungs and Muscles, and is Good for Both Sexes.

(Gil Essex, in "Health")

There is no outdoor winter sport that I can name more beneficial to the health than ice skating. There is never a time when indulging in this sport from the time a boy is large enough to put on his own skates until he has grown to manhood, that he does not constantly receive good from the exercise of skating. This in turn rewards him by being also a great source of pleasure to him. There is nothing more beneficial to the lungs in the way of outdoor winter exercise; for not only is the crisp, clear air robbed of its purifying oxygen by the energetic skater, but the increased circulation works in such a combined harmony with the exercise to the muscular system that the benefit given to the participant is threefold.

Take the boy in the country, for instance, who is only one among the many crowds that find himself as soon as school is out, starting for the nearest pond to enjoy that universal and all-health-giving sport, skating. And I might add the boys are not alone in this desire, the girls are equally as enthusiastic as their male competitors. But in this article, owing to want of sufficient space, I will treat the subject principally from the boy's standpoint. There never was a case where a boy under these circumstances ever went home to supper without doing full justice to his waiting and anxious appetite. This alone shows skating to be one of the finest outdoor exercises for the purpose of distributing the food properties that have previously been taken into the system. It is also because of the pleasure taken in it that his system has undergone such a complete overhauling relative to exercise, increased breathing and general activity combined.

You let this same boy on leaving school go straight home and be obliged to go out to the woodshed and saw wood until his arms ache, and though exercising twofold more than he would in skating, he does not receive the same benefit; simply because the mind is at constant war against such work, when skating is in vogue. For this reason, fathers and mothers should both see that wood sawing and skating should each have its proper place in the school-boy's DAILY REGIME.

Take the boy when he becomes a few years older; skating then has not lost any of its charms, but has developed to a greater extent and in a more matured manner. It is oftentimes such freedom allowed the school boy (and even the girl) on the parents' part relative to skating that has made some of the greatest fancy and trick skaters, also some of the greatest speed skaters in after years; and this fact has proven to be of great material benefit to the parent who may by this time be more or less in need of a son's support. I do not encourage this as a means of livelihood, neither do I discourage it, but if one is to go into skating, whether he be boy or man grown, he should go into it with all the energy and enthusiasm that he possesses.

Take skating in such games as are played on the ice, "Shinny" (taken from the Irish game "Shinty") and hockey, which is nothing more nor less than the perfected shinny or shinty game, but it is played with far greater science and skill. This game is probably more in vogue in Canada than in any other part of the world, and it has every indication of being accepted as a national winter game in this country, but the players who are at the present time the most successful and show the greatest amount of skill learned their fine points from the CANADIAN SKATERS.

There is an excellent game on ice which is played generally in the country among boys, and even men, ranging from fifteen to twenty-five years of age—called "Hare and Hounds." In order to play this game successfully, which is really nothing more or less than a sport, and perhaps it would not be right to call it a game as there are no rules governing it; only to the extent that two boys, and more if desired, are placed at a point at least a half mile in advance; this forms the starting point for the hares. A crowd of thirty or forty boys in the chase, the two boys in the front representing the hares and those in the rear the hounds. The object of the boys in the rear is to overtake the two boys who have already the start in the chase, and drive them back to the goal which ends the sport. The chase sometimes lasts for several hours before the boys are finally driven back, and it is not very difficult to imagine that soon after the chase begins it becomes very exciting; inasmuch as it is usually played in long overgrown woodland near the streams, "cut" starts in the order to successfully pass. Even fences with two or three feet protruding above the surface of the ice is not an uncommon feature to encounter.

All these obstructing features, independent of the good derived from skating, form almost AN ENDLESS AMOUNT of hard, heartful exercise for the boys who participate in it. The boys representing the hares plan to go where it is the most difficult for the boys in the rear, who represent the hounds, to follow; and, of course, it is far more difficult for thirty or forty boys to pass with the same degree of speed and headway afforded only two. In order to enter into this sort of sport with the greatest satisfaction, one must be more or less an expert in the way of ice skating. The best and strongest skaters I have ever seen have been those who played in all sorts of country games when boys. There it was they found the smoothest and clearest, and where they spent the greater number of their boyhood days in perfecting what was to them a most all-absorbing sport.

Here and young men who skate for the mere pleasure of it do not always consider the amount of good it is doing them in the way of developing their lungs and clearing their system. Every organ and every muscle in the body is made to become healthy and strong. The muscles of the legs, especially in the thighs and the lower part of the abdominal muscles, bordering on the attachment of the legs to the trunk, receive unusual benefit in ALL FORMS OF SKATING. The back becomes unusually strong, and the awing of the armseven in straight, ordinary skating opens the walls of the chest to a far greater extent than walking or running; increasing lung power and strengthening the heart action, wonderfully. This sport every organ is greatly benefited if one skates judiciously. Skating is more on the gliding, graceful and active order, and full of energy, where running borders on the laborious, and can be more readily overdone. I have never yet heard of a complaint about his training requirements when perfecting himself for any contest that he is about to enter, and being of so great a mental pleasure to him, one can readily see how very superior the benefit must be to his physical forces; for what coupling mental activity with the desire for muscular strength, you have a very strong combination, and it goes without saying the result will be lasting and benefitting to all who participate in this universally admired sport. Whether you be boy, girl, man or woman, if you enter this sport with a spirit you will get your share of goodly returns. May the winter bring good ice as well as good luck to the skate-loving public.

Gin Pills Will Cure Your Sick Kidneys OR MONEY REFUNDED.

Don't you want to be rid of that nagging, biting, torturing pain across the back and through the kidneys? Don't you want to sleep through the night without being disturbed by the sick kidneys? Don't you want to feel well and be well? Here's the way: "I suffered from pain and stiffness in the back. Sharp pains would catch me unexpectedly, which were sometimes so severe as to produce fainting spells. Rheumatism followed, and the sharp pains so severe that I had to take to the bed for several months. I started to take Gin Pills, and in five days I was up and around the house. My pains are gone now, and I have not had a return of the old trouble since. And Gin Pills gave me the same means as have never been adopted by others that we can ever hope to build up the town as an industrial centre. We have every advantage offered by Barrie, Lindsay or Oshawa, in fact, more general facilities than are enjoyed by many of the towns whose names stand high in the sporting world. All that is needed is a spirit of enterprise and willingness to encourage those who are looking about for locations for solid industries.

"You can't honestly doubt Gin Pills offer such testimony as this. Gin Pills hold out certain relief from pain. They are sold with an ironclad guarantee to cure or refund your money. \$20 a box will send you a trial box free if you will send us your name and address and say the paper in which you read this. Put down the paper—get a post card—and write us now before you forget it. The Bole Drug Co., Winnipeg, Man."

OBITUARY.

Mrs. Francis Brady.
On Dec. 1st Lindsay and Ops lost one of their oldest and most respected pioneers in the person of Mrs. B. Brady, relict of the late Francis Brady in her seventy-ninth year. Born in Sligo, Ireland, she came to this country when six years old with her father, Roger McHugh. Stopping for a short while in York county, they moved to the township of Ops. In 1848 she married Francis Brady and they lived on the farm in South Ops until 1865, when they moved to Lindsay. Mr. Brady will be remembered by our older citizens as having acted as street overseer for a number of years. The mortal remains of Mrs. Brady were laid to rest on Monday morning last after high mass had been celebrated by Rev. Archdeacon Casey at 9 o'clock, which was attended by a large crowd. The body was then conveyed to St. Mary's vault, her six grandsons acting as pall-bearers. Seven daughters and two sons are left to mourn her loss of a truly devoted and christian mother: they are Mrs. J. Hurley and Mrs. J. Kylie, Peterboro; Mrs. A. Lawder, Chicago; Mrs. J. W. Diamond, Mrs. E. Kennedy, Mrs. J. O'Reilly, and Miss Julia Brady; town; P. S. Brady, Gravenhurst; Mrs. Brady, Brechin.

"Women's Headaches"

Late hours and anxious pursuits, with immediate eating, weakness, nervousness, and overwork or worry, is responsible for the alarming increase of headache. Women are more subject to this ailment than men. Their delicate constitution and nervous temperament induces a condition of the system that sooner or later brings on the periodical attacks of headache. "PSYCHINE" is the remedy of all others for the complete cure of headache. It builds up the nervous system, restores vitality, cleanses the stomach from all bile, settles the nerves, starts the blood into the proper channels, and in most cases the attacks can be warded off by careful attention in following directions. Don't destroy the system by frequent use of dangerous powders, that give only temporary relief. Begin the "PSYCHINE" treatment now, and fortify the system against attacks. This is the only way to permanently dispose of periodical headaches.
