#### THE WATERWORKS

In the course of a few days our citizens will be asked to take into their careful consideration the advisability of purchasing our system of waterworks for a sum in the neighborhood of \$75,000. If Engineer Rust's report as to the condition and capacity of the plant is a favorable one, and the evidence collected from other towns by the committee is on the side of public rather than private ownership, the Citizens' Committee will no doubt submit a report giving full information, while on the other hand, if the evidence goes to show that the works at the price asked would not be a profitable investment, the committee will not go er, and explained that the penalty was into details when advising to that ef- a \$100 fine or a year's imprisonment. fect.

The old argument that the works could be replaced for \$45,000 has been used extensively by farm. #### PROMPT ACTION NEEDED.

The natural opportunities of this town to do a large and successful tourist trade are not equalled by any town in Canada. It is known that the Lake Ontario, Brockville and Quebec Navigation Company and the Grand Trunk Railway are prepar. ing to make known to the world at large the distinctive and surpassing claims of the | trading. The closing quotations were Karwatha Lakes as a summer resort. This action on the part of these companies will cause an influx of tourists that will tax our present steamboat and hotel facilities far beyond their capacity. It will be a great pity if any number of people-however small-should be brought here and fail to find accommodation, and it will be a great mistake on the part of our business men if they do not get their heads together and take such action as will star erection of hotels in town and other des able points.

Another matter just as necessary is consolidation of the steamboat interestr without which there would be no guaran tee of a proper and speedy handling passengers.

We have pointed out before the neces sity of prompt action on the part of ou business men if we hope to retain for this town the advantages we possess in relation to this trade. It is a matter that our Board of Trade should take up and put forth their best efforts to solve. Prompt and vigorous action is all that is needed to secure for us a trade that will enter these waters at some other point if we

The jury returned a verdict of not guilty late last evening. The Criminal Case.

Queen vs. Mitchell-Moses Mitchell prosperous well-to-do farmer residing in Eldon, was charged with shooting at Owen Murphy, of the same ownship, with intent to do bodily harm. It appears that a quarrel arose over Murphy's horses getting into Mitchell's grain, resulting in accused using a revolver. The case lasted all day Wednesday, eight or more witnesses being examined.
