

# More than 100 new COVID-19 cases in Ontario for first time in a week, with one new case each in Kawartha Lakes and Haliburton

[kawarthanow.com/2020/08/10/covid-19-update-for-peterborough-and-the-greater-kawarthas-region-august-10-2020/](https://kawarthanow.com/2020/08/10/covid-19-update-for-peterborough-and-the-greater-kawarthas-region-august-10-2020/)

August 10, 2020

Here's an update on COVID-19 cases in Ontario as well as in the greater Kawarthas region.

After seven straight days with fewer than 100 new cases of COVID-19, Ontario is reporting a small uptick in new cases at 115. Of the new cases, 60 per cent are among people aged 39 or younger. Most of the new cases were reported in Ottawa (20), Peel Region (19), Toronto (16), Windsor-Essex (12), and Niagara Region (11).

The increase in new cases comes on the same day the Ontario government announced Windsor-Essex will join the rest of the province in Stage 3 of Ontario's reopening as of Wednesday, August 12th.

In the greater Kawarthas region, one new case has been reported in Kawartha Lakes and one new case has been reported in Haliburton. There are no new cases to report today in the Peterborough area, Northumberland, or Prince Edward and Hastings counties.

Since the pandemic began, there have been 99 confirmed positive cases in the Peterborough area (94 resolved with 2 deaths), 177 in the City of Kawartha Lakes (156 resolved with 32 deaths), 26 in Northumberland County (25 resolved with no deaths), 15 in Haliburton County (12 resolved with no deaths), and 44 in Hastings County and Prince Edward County (38 resolved with 5 deaths). The most recent death was reported on May 7 by Hastings Prince Edward Public Health.

Province-wide, there have been 40,161 confirmed cases, an increase of 115 from yesterday's report, with 36,381 cases (90.6% of all cases) resolved, an increase of 102. There have been 2,786 deaths (no change from yesterday), with 1,799 deaths reported in long-term care homes (no change from yesterday). A total of 2,422,487 tests have been completed, an increase of 22,275 from yesterday, with 10,865 tests under investigation, a decrease of 6,675 from yesterday.

This report is based on data supplied by the province's integrated Public Health Information System (iPHIS), as well as any additional information supplied by health units. This information is at least 24 hours old, so it is not real-time data. Note that each health unit reports the information in a different way.
