Here's an update on COVID-19 cases in Ontario as well as in the greater Kawarthas region.

Ontario is reporting 105 new COVID-19 cases today, after an increase of 115 yesterday. This is the seventh day in a row where the average number of new cases has exceeded 100. The majority of new cases reported today are in Toronto (30), Ottawa (24), Peel (21), and York (9). The remaining 30 of Ontario's public health units are reporting five or fewer cases, with 19 reporting no new cases at all.

In the greater Kawarthas region, there is another new case to report today in Northumberland — the fifth new case in a week. However, another case in Northumberland has also been resolved, leaving only one active case. There is also another new case in Hastings and Prince Edwards counties, reported on August 21 through close contact transmission, for a total of two active cases.

There are no new cases to report in Peterborough, Kawartha Lakes, or Haliburton.

Since the pandemic began, there have been 103 confirmed positive cases in the Peterborough area (97 resolved with 2 deaths), 177 in the City of Kawartha Lakes (157 resolved with 32 deaths), 31 in Northumberland County (30 resolved with no deaths), 15 in Haliburton County (15 resolved with no deaths), and 46 in Hastings County and Prince Edward County (39 resolved with 5 deaths). The most recent death was reported on May 7 by Hastings Prince Edward Public Health.

Province-wide, there have been 41,507 confirmed cases, an increase of 105 from yesterday's report, with 37,673 (90.8% of all cases) resolved, an increase of 78 from yesterday. There have been 2,798 deaths, an increase of 1 from yesterday, with 1,804 deaths reported in long-term care homes (no change from yesterday). A total of 2,781,748 tests have been completed, an increase of 18,790 from yesterday, with 9,229 tests under investigation, a decrease of 6,886.

This report is based on data supplied by the province's integrated Public Health Information System (iPHIS), as well as any additional information supplied by health units. This information is at least 24 hours old, so it is not real-time data. Note that each health unit reports the information in a different way.
