

support, new companies like Facedrive can expand their operation and production of innovative Ontario Made technology, creating jobs and opportunities right here in Scarborough.”

Through the Ontario Together Fund, the government is delivering targeted investments that will increase the province’s stockpile of made-in-Ontario products and PPE. This innovative technology and manufacturing capacity will help the province to combat the current COVID-19 outbreak and prepare for potential challenges in the future, while supporting local businesses during the safe and gradual reopening of the province.
