How does COVID-19 testing work in Kawartha Lakes?

Here is Peterborough coronavirus

Active: 23

In **Peterborough**, the local health unit has confirmed **12 new cases** bringing the **total of confirmed cases to 1,687** as of **August 30, 2021**. There are **1,642** cases that are considered resolved and **23 active cases**. There has also been **890 cases of variant of concern** discovered. There are **54** identified close contacts of cases. In addition, there is **no outbreak** in the region. A total of **22** people have died as a result of the virus.

For Kawartha Lakes

The first **two cases** of COVID-19 involve people who had recently travelled. Three cases were reported by the health unit on Friday, March 20 and involve **three residents** at Pinecrest Nursing Home in Bobcaygeon. Two of the patients are self-isolating, while the three nursing home patients have been isolated, according to the

health unit.

On March 22, the health unit confirmed **a man in his 80s died of COVID-19**. He had no known contact with anyone with COVID-19 and had not recently travelled. The health unit reported on March 24 that a woman in her 40s is self-isolating after testing positive.

On March 25, the health unit's **website** listed 13 more cases than the day before.

The new cases include two female patients, in their 60s and 80s respectively, who have been hospitalized at Ross Memorial Hospital. Another case involves a man in his 70s who is self-isolating. The other 10 cases include three women in their 60s, three women in their 50s, two women in their 40s and two women in their 30s. The status of their cases was listed as pending.

The health unit reported a single new case on March 26.

Six more cases were reported on March 27.

On March 30, the health unit released there are now 33 cases of COVID-19 and 11 deaths, 9 of which were residents at Pinecrest Nursing Home. One other death was related to one of the residents. Of the 33 cases, the health unit says 27 cases are related to the outbreak at Pinecrest.

The health unit reported 8 more cases on March 31, bringing the total to 41. The total number of deaths do not include three more deaths at Pinecrest Nursing Home, which have not been reported by the local health unit. The data is not reported in real time.

The HKPR health unit announced seven more cases on April 1. Two more deaths of residents of Pinecrest Nursing Home were also confirmed.

As of April 4, 54 cases of COVID-19 were confirmed in the City of Kawartha Lake and three people were in hospital.

On April 6 the health unit reported a total of **82** cases in Kawartha Lakes and noted the spike in cases is linked to a changed provincial directive that requires all staff and residents in long-term care homes with the virus to be tested.

Two more cases were confirmed on April 7, as well as five additional deaths. **25** deaths are now confirmed by the health unit related to Pinecrest Nursing Home.

Several more cases were reported on April 9, bringing the total to **93**. The health

unit says 28 deaths are related to Pinecrest.

On April 10, one more death was reported, as well as the 94th case.

For Peterborough

The first case was announced on March 15 [involving a man who had travelled](#). A second case was announced on March 18 and involved a person who had close contact to the area's first case.

A third case was reported on March 19 and [involved travel to Florida](#).

Two more cases were announced on March 24. One is a woman in her 70s who had recently returned from Florida. According to the health unit while returning home she attempted to get tested at a hospital but was unable due to the long line-up. She was tested at home by paramedics and five close contacts have been confirmed. The other confirmed case is a male in his 60s who attended an Edmonton bonspiel, and the health unit says it is working to track his close contacts.

The 6th case was confirmed on Wednesday, March 25. The health unit says an employee at a Bobcaygeon nursing home, where there is a outbreak of COVID-19, is confirmed to have the virus. The woman is 55 and lives in Peterborough and is in self-isolation at home. The 7th case was also confirmed on March 25 and is a 28-year-old male who is a close contact of a case from outside of Peterborough. He is also in self-isolation at home.

Public health announced two more cases on March 26. The most recent cases include a resident at St. Joseph's at Fleming, who is in her 90s and a woman in her 60s who has a travel history to the U.S. The woman has been hospitalized and is in self-isolation at PRHC.

Four more cases were announced on March 27.

Fifteen more cases were announced on March 30.

The total remained at 28 as of March 31, including four people in hospital and two of those in the ICU.

No new cases were reported by Peterborough Public Health on April 1.

On April 2, 13 cases were reported.

Two more cases were reported on April 4.

One case was reported on Sunday, April 5. As of that date, there are 737 confirmed negative cases and 182 cases still under investigation. To date, 963 people have been tested.

On April 6, no new cases were reported however there were 749 confirmed negative cases with 221 still under investigation. As of April 6, 1,014 people had been tested.

A single case was reported on April 7.

Six cases were reported on April 8.

On April 9, the health unit reported a total of 50 cases in Peterborough and Peterborough County. One case that had previously been reported was omitted because of a referral by another health unit.

A single case was reported on April 10, bringing the total to 51.

On April 12, Peterborough Public health announced one new case of COVID-19, as well as the area's first death. A man in his 60s who contracted the novel coronavirus while travelling passed away on Sunday.

One new case was reported on April 13.

No cases were reported on April 14 , 15 or 16.

One case was reported on April 17.

Two cases were reported on April 18 and 19.

No cases were reported on April 20.

One case was reported on April 21.

No cases were reported on April 22.

Single cases were reported on April 23 and 24.

Five cases were reported on April 25.

Twelve cases were reported April 26.

Five cases were confirmed on April 27.

Three cases were reported on April 28, as well as the area's second death. The health unit reported the victim is a woman in her 90s who was a resident at St. Joseph's at Fleming.

No cases were reported on April 29.

As of May 1, one additional case was confirmed by Peterborough Public Health with 829 test results pending.

Peterborough Public Health was reporting four fewer cases of COVID-19, May 2 than the day before, presumably a result of false positives due to a laboratory error with tests reported last week, but no further information was immediately available.

One additional case was reported on Sunday, May 3. Forty seven cases have been resolved and three people have died.

On May 4, Peterborough Public Health reported 15 fewer cases of COVID-19 than the day before, as well as one fewer death after it was determined one person did not die as a result of COVID-19.

On May 5, the health unit announced one fewer case than the day before with 68 confirmed infections. There are 2,798 confirmed negative cases and 829 test results pending. Forty eight cases have been resolved.

The total number of confirmed cases shrunk again on May 6 to 67 after another case was removed due to a testing error.

Cases increased by 4 on May 7 to 71.

A single case was reported on May 8.

One additional case of COVID-19 was reported in Peterborough May 10, bringing the total to 73. The Health Unit also an additional three cases to be resolved.

No new cases were reported on May 11 so the total remained at 73. Of the cases, 62 are resolved and more than 4,800 individuals have been tested.

On May 13, the total of COVID cases remained the same at 73. Of the cases, 67 are resolved and more 5,600 people have been tested.

No cases were reported on May 14, 15 or 16.

One new case of COVID-19 was reported on May 17 bringing the number to 74. Of the cases, 68 are resolved and more than 6,600 people have been tested. An outbreak of COVID is being watched at Kawartha Heights Retirement Living.

On May 18 the health unit removed one case from its official total.

Three cases were reported on May 19.

Two additional cases were reported on May 20 bringing the number to 78. Currently, there are seven active cases and 69 resolved cases. More than 6,900 people have been tested. One outbreak is still being reported at Kawartha Heights Retirement Living.

One fewer case was reported on May 21, bringing the number of confirmed COVID-19 infections to 77. The health unit said one of its cases was transferred to another health unit which is the reason why there is one less case. So far, 6,950 people have been tested and there are currently six active cases. 69 cases have been

resolved.

COVID-19 cases in Peterborough city and county rose by two on May 22 to 79. So far, more than 7,000 people have been tested and there are currently 8 active cases. 69 cases have been resolved. One institutional outbreak continues at Kawartha Heights Retirement Living in Peterborough.

On May 24, Peterborough Public Health reported 81 confirmed positive cases with more than 7,150 individuals tested. Currently, there are 9 active cases and 70 resolved cases. One institutional outbreak continues at Kawartha Heights Retirement Living in Peterborough.
