Here's an update on COVID-19 cases in Ontario as well as in the greater Kawarthas region.

Ontario is reporting 525 new cases today, with the seven-day average of daily cases increasing by 5 to 700.

Of Ontario's 34 health units, 1 is reporting a triple-digit increase (Toronto with 120 cases), with 13 reporting double-digit increases — Peel (60), Windsor-Essex (60), Hamilton (42), Niagara (41), York (30), Simcoe Muskoka (21), Durham (19), Middlesex-London (19), Waterloo (19), Brant (19), Halton (14), Wellington-Dufferin-Guelph (11), and Ottawa (10) — and 8 reporting no new cases at all.

Of the new cases, 70% are people who have not been fully vaccinated (62% have not received any doses and 8% have received only one dose) and 17% are people who have been fully vaccinated with two doses, with the vaccination status unknown for 12% of the cases.

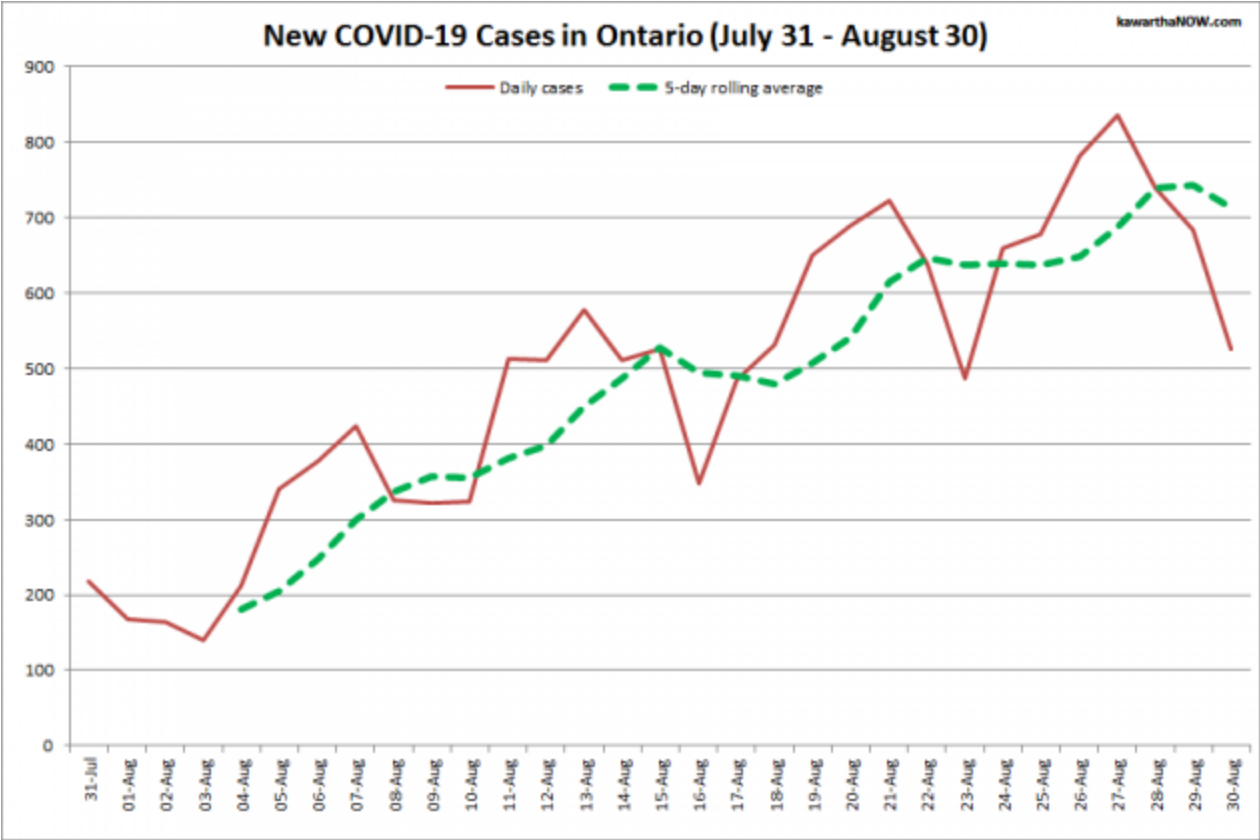

Hospitalizations have increased by 110 to 336, but this increase may be in part due to underreporting since last Friday (when 343 hospitalizations were reported), as more than 10% of hospitals did not submit data to the daily bed census over the weekend. The number of ICU patients has decreased by 2 to 158 and the number of ICU patients on ventilators remains unchanged at 93.

Ontario is reporting 5 COVID-related deaths, but 3 of these occurred more than 2 months ago and are being reported today as part of a data clean-up, so there were 2 new COVID-related deaths yesterday.

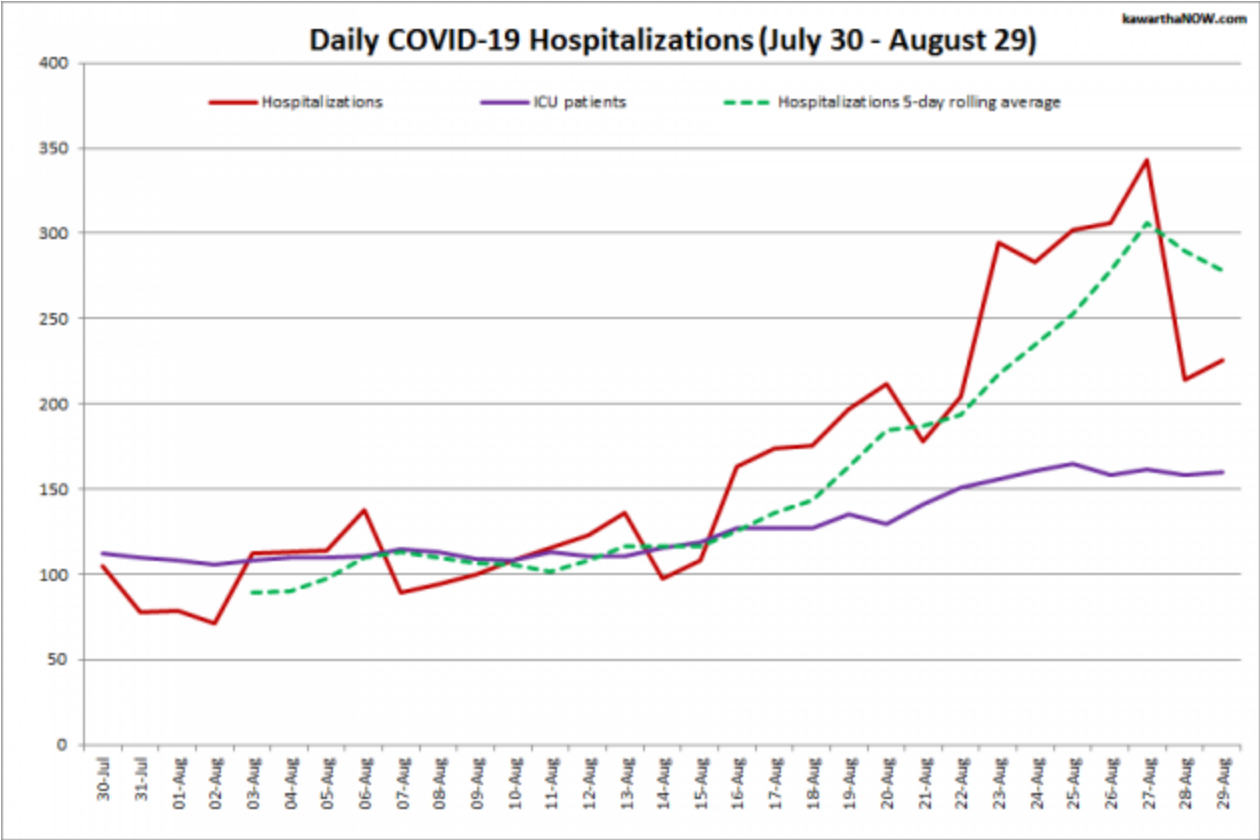

Over 20.7 million vaccine doses have been administered, an increase of 31,176 from yesterday, with more than 9.9 million people fully vaccinated, an increase of 19,228 from yesterday, representing just over 67.2% of Ontario's total population.
