Here's an update on COVID-19 cases in Ontario as well as in the greater Kawarthas region.

Ontario is reporting 511 new cases today, with the 7-day average of daily cases decreasing by 15 to 582 since Friday (October 1).

Of Ontario's 34 health units, 15 are reporting double-digit increases — Peel (88), Toronto (85), Ottawa (46), York (30), Windsor-Essex (29), Hamilton (26), Durham (25), Niagara (23), Middlesex-London (20), Eastern Ontario (19), Halton (15), Simcoe Muskoka (11),

Southwestern (11), Waterloo (11), and Huron Perth (10) — and 6 are reporting no new cases at all.

Due to a technical issue, the vaccination status of new cases is unavailable.

Hospitalizations have decreased by 132 to 146 since Friday, but more than 10% of hospitals did not submit data for the daily bed census over the weekend, so the actual number of hospitalization is likely higher. Since Friday, ICU patients have decreased by 3 to 159 and ICU patients on ventilators have decreased by 13 to 104. Ontario is reporting 2 new COVID-related deaths today.

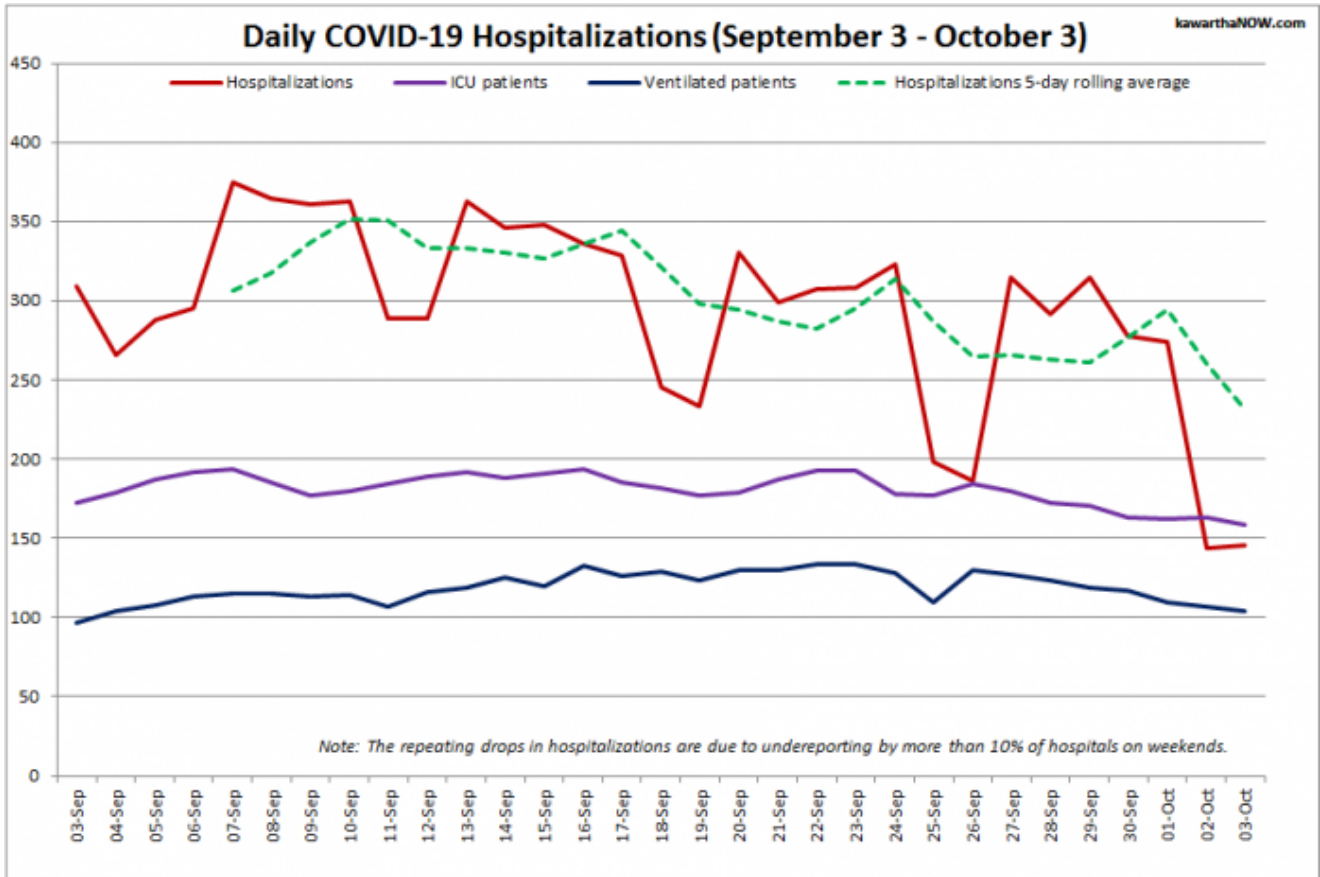

Due to a technical issue, today's vaccination dosage information is unavailable. As of Sunday, over 21.8 million vaccine doses have been administered, an increase of 23,884. Over 10.59 million people are fully vaccinated, an increase of 15,890, representing 71.67% of Ontario's total population.
