Here's an update on COVID-19 cases in Ontario as well as in the greater Kawarthas region.

Ontario is reporting 429 new cases today, with the 7-day average of daily cases decreasing by 6 to 576.

Of Ontario's 34 health units, 1 is reporting a triple-digit increase — Toronto (108) — and 13 are reporting double-digit increases — Peel (55), Ottawa (47), York (29), Hamilton (23), Simcoe Muskoka (19), Lambton (15), Windsor-Essex (15), Middlesex-London (14), Niagara

(14), Durham (13), Waterloo (13), Chatham-Kent (11), and Southwestern (11) — with 7 reporting no new cases at all.

Of the new cases, 60% are people who have not been fully vaccinated (54% have not received any doses and 6% have received only one dose) and 30% are people who have been fully vaccinated with two doses, with the vaccination status unknown for 10% of the cases because of a missing or invalid health card number. The 7-day average case rate is 9.19 per 100,000 for unvaccinated people, 4.39 per 100,000 for partially vaccinated people, and 1.48 per 100,000 for fully vaccinated people.

Hospitalizations have increased by 131 to 277, but some or all of this increase may be the result of underreporting by more than 10% of hospitals over the weekend. ICU patients have decreased by 4 to 154 and ICU patients on ventilators have decreased by 3 to 101. Ontario is reporting 4 new COVID-related deaths today.

Over 21.91 million vaccine doses have been administered, an increase of 26,472 from yesterday. Over 10.62 million people are fully vaccinated, an increase of 16,752 from yesterday, representing 71.87% of Ontario's total population.
