FOR 1881.

THE OLD AND THE NEW YEAR.

Toll, gently, toll, the passing bell
For the year that dies to-day;
Ring softly out a last farewell
As it ebbs its life away.

CHATHAM PUBLIC LIBRARY

Slowly and sadly it leaves alone,
Joining the years that are past and gone,
Sighing for work that it might have done,
And for joys that might have been.

And now the New Year ring in,
Quickly and merrily,
Lightly and cheerily;
Ere quite the dirge is done
Be the new peal begun,
Lest the New Year should know
Ought of the dead one's woe.

Wreath its young brow with Hope's garland green;
But, alas, for the joys that might have been.

O, brightly glistens the trackless snow
In the rays of the wintry sun,
And joyous hearts in their youthful glow
Greet the year that is just begun.
But slowly the snow-wreaths melt away,
The ice-drops fall from the leafless spray,
And the winter's white glory is gone,
And the bleak winds whistle and moan

Coldly and drearily,
Sadly and wearily,
The shivering year looks on
The work that the old has done,
And a chill strikes to its breast,
With a strange, new fear oppressed.

Alas! for the snow so quick'y seen,
And alas! for the joys that might have been.

Vain fears, vain sorrows; for quickly see
Here cometh the gentle Spring,
And clothes with new verdure each leafless tree,
And around her sweet flowers doth fling.
Kindly she waketh the earth again,
And the earth is glad of her joyous reign;
Then the rosy summer comes in her train,
And the autumn brings its store,
And the blest year sighs no more.

Joyfully, hopefully,
Gladly and thankfully,
Bearing the harvest home,
See the tired reapers come;
And the winter time brings rest,
Cold and dark, yet not unblest.
Yet the year, as it dies, sighs the new one in
With alas! for the joys that might have been.

THE OLD AND THE NEW YEAR

CHATHAM PUBLIC LIBRARY

Faint, mostly illegible text, likely bleed-through from the reverse side of the page. The text appears to be organized into several paragraphs, possibly containing a report or a list of items. Some words like "year", "old", and "new" are faintly visible, corresponding to the header above.

JAMES SOUTAR,

—Special District Agent for the BEST—

**Ocean Steamship Lines, Lake and River
Steamboat Lines, Railways, etc.**

Outward, prepaid and round trip tickets issued to and from

**Queenstown, Liverpool, London, Glasgow and chief
places in Great Britain and the Continent.**

Tickets issued to all Lake Points, points on the Prairies, Mountains or on the Pacific Coast beyond; also to New York and all the chief points South and East.

Our **SUMMER EXCURSIONS** to all points are a unique feature of tourist travel, and give the option of going by water and returning by rail, or vice versa, at rates as low as second-class rail, and include meals and state-room on boats, with a ticket limit of four months.

LANDS—Agent for the Northern Pacific Lands, the only good lands now remaining in the West Going West. Cheap, round trip, Land Tickets issued to land buyers, and refunds allowed to purchasers.

Local Lands for sale and wanted. Money to Loan.

JAMES SOUTAR,

CHATHAM, ONT.

ALMANAC FOR 1881.

EMBER DAYS.

March 9, 11, 12; June 8, 10, 11; Sept. 21, 23, 24; Dec. 14, 16, 17.

MORNING AND EVENING STARS.

MERCURY will be evening star about February 23, June 19, and October 15; and morning star about April 7, August 6, and November 24.

VENUS will be evening star till May 3; then morning star for the rest of the year.

JUPITER will be evening star till April 22; then morning star till November 13; and evening star again for the rest of the year.

ECLIPSES.

In the year 1881 there will be FOUR ECLIPSES; two of the Sun, and two of the Moon; and a TRANSIT OF MERCURY across the Sun's disc.

I. A PARTIAL ECLIPSE OF THE SUN, May 27. Visible to the northern part of North America and to Northern Asia. To the more Northern and Western of the Central States it will appear as a slight Eclipse, beginning ordinarily a little before sunset. It will begin as follows: Cleveland, 7 h. 20 m. A.; Detroit, 7 h. 16 m. A.; Indianapolis, 7 h. 11 m. A.; Chicago, 7 h. 0 m. A.; St. Louis, 6 h. 58 m. A.; St. Paul, 6 h. 33 m. A.; and will continue beyond sunset.

II. A TOTAL ECLIPSE OF THE MOON, June 11-12. Visible to North and South America, and to portions of Africa and Australia; occurring in Washington time as follows:

Moon enters Penumbra.....	11 d. 11 h. 7 m. P. M.	Total Eclipse ends.....	12 d. 2 h. 27 m. A. M.
Moon enters Shadow.....	12 d. 0 h. 3 m. A. M.	Moon leaves Shadow.....	12 d. 3 h. 28 m. A. M.
Total Eclipse.....	12 d. 1 h. 5 m. A. M.	Moon leaves Penumbra.....	12 d. 4 h. 24 m. A. M.
Middle of Eclipse.....	12 d. 1 h. 46 m. A. M.	Magnitude of Eclipse=1.365. (Moon's Diam.=1).	

III. AN ANNULAR ECLIPSE OF THE SUN, Nov. 21. Invisible. Visible to southern extremity of South America and to the Antarctic Ocean.

IV. A PARTIAL ECLIPSE OF THE MOON, Dec'r 5. Invisible. Visible more or less to Europe, Asia, Africa, Australia, and northwestern portion of North America.

V. A TRANSIT OF MERCURY over the sun's disc, Nov. 7. Invisible east of a line drawn through Cleveland, Ohio, and Charleston, S. C. To the west of that line it will be partly visible. Ingress occurring, in Washington time, at 5 h. 8 m. P. M.

CHATHAM.

CONDENSED FROM "COUNTY LANDMARKS."

HE Town of Chatham has a much earlier existence than is generally supposed. It was, in the early history of the Western District, a place of some notice; and, at the time when Governor Simcoe contemplated the removal of the Capitol from Newark, and was looking for a new location, even received his favorable consideration. For military reasons, and as the result of a compromise with the Commander of the Forces, who preferred Kingston, the site was, however, abandoned, as was that of London, the Governor's after choice, for that of Little York, now Toronto. But, as a position of some military importance, it received his earnest attention, and, had he not been recalled to England, would probably have erected fortifications on the Military reserve now known as the "Tecumseh Park." Indeed, as early as the fall of 1794 he had already established there a shipyard for the construction of Gun Boats, two or three of which, of a 6 lb. calibre capacity, were built the following year. The selection of Chatham for this purpose was probably made with the double object in view—proximity to timber, secrecy and freedom from interruptions from an enemy in case of war, which was not beyond a near possibility, for it must be remembered that at this period the English Government entertained serious intentions of ignoring the American Treaty of 1783, which had been openly and systematically broken by the United States, and as a consequence, Detroit, which was ceded thereby, yet remained, and did remain, until the fall of 1796, in possession of the British. Be this as it may, the Government, at the time stated, erected the necessary buildings for a shipyard and commenced operations under the superintendence of William Baker, of the Government shipyard at Detroit, and the grandfather of William Eberts. The position chosen for the ship yard was the river flat on the Military reserve, at a point nearly opposite what is now the foot of Victoria avenue, and between the two old trees still standing. The buildings stood on the high bank immediately above or between the river and the site of the old barracks, and consisted of a Block House built of logs, used as store-room, sleeping apartments and fort, if occasion required it; one or two guns being mounted thereon, and with which, on one occasion, Governor Simcoe was saluted as he sailed into view by way of the river. It is said a stockade surrounded the block house, and included also a low log house used by the workmen, which stood between the former and the creek; but, on referring to Iredell's map of Chatham of 1795, the block house alone is shown. The saw-pits were also erected on the flats, doubtless with the object of facilitating the skidding of the timber from the level. In 1795, 23 workmen were employed in the yard, the original pay rolls being yet in existence, a copy of one of which we here produce, and possibly there may be some of those

who peruse it will trace in the list of signatures the name of his or her forefather.

At this time the establishment of a Dry Dock was also under consideration of the Governor; and, more surprising still, the navigation scheme of Messrs. Carling, Stephenson and others, was anticipated 85 years ago, Surveyor McNiff having already made the survey of the river and reported (20 May, 1793) that the navigation to the Upper Forks (London) "was quite practical with the erection of one or two locks." And probably in anticipation of the future importance of the place there was run by Surveyor Iredell, in 1797, a line of military road (Communication Road) "as straight as possible between Chatham and the Pointe Aux Pins on Lake Erie (Rond Eau Point) to be hereafter called the Land Guard, where a situation for a town is to be reserved."

In 1795 there was set aside by the Governor in Council as a Town Plot and Military Reserve 600 acres of land, comprising Lots Nos. 1 and 2 in Harwich and Lot No. 24 in Raleigh, a portion of which was surveyed and mapped out by Ab. Iredell, Deputy Surveyor, the same year, to the number of 113 lots of one acre, or 13 chains and 13 links square, each. The ground which this survey covers is the double tier of lots commencing at the present eastern boundary and comprised between Gaol and Water streets to William street; thence the double tier between Colborne and Murray streets to the eastern boundary; thence crossing the Creek, the double tier between Wellington and King streets to the present western boundary. The map covering this survey, and bearing date 1st Nov., 1795, shows the Gaol and Market blocks, reserved as such; as also, the block comprised within King, Third and Forsyth streets for Church purposes. It shows also Baker's Block House on the Reserve, and a small hut on Lot 59, at the eastern boundary, built by Meldrum & Park, merchants of Sandwich, for the purpose of trading with the Indians, then resorting on the branches of the Creek near the burying ground. No other houses are shown. There is, however, shown at the upper end of King street, and just outside the eastern boundary, either a bridge or mill dam, probably Clarke's first mill dam with temporary bridge over it, as crossing the creek. The width of the river was then from $2\frac{1}{2}$ to 3 chains, and the creek rather more than half a chain. The depth of the river was from $2\frac{1}{2}$ to 3 fathoms; at the forks $3\frac{1}{2}$ fathoms; and the depth of the creek $2\frac{1}{2}$ fathoms at its mouth, and 1 fathom at the mill dam.

Shortly after the survey grants were made of the lots to the number of 30 or more, the patents all bearing date, 1802, with the exception of Lot 17, granted in 1798, and Lots 87 and 88 granted in 1801, and Lot 106, in 1806. The numbers of the lots and the names of the patentees are:—

5. John Martin,	24. Wm. Forsyth,	75. Antoine Pelletier,
6. Gregor McGregor,	25. Alex'r Duff,	81. Jacques Pelletier,
7. Jas. McGregor,	28. Matt. Donovan,	84. " "
10. John Laughton,	29. John Donovan,	87. Alex'r Askin,
11. " "	23. J. Wilson & J. Fraser,	88. Chas. Askin,
13. Alex'r Harrow,	36. Rich. Donovan,	89. John Askin,
14. Alex'r M. Murray,	40. Wm. Fleming,	99. Matt. Dolsen,
17. Ab. Iredell,	41. Jas. Fleet,	106. John Sharp,
19. John Sparkman,	66. Wm. Harper,	109. Wm. Shepard,
23. John Little,	67. Geo. Ward,	110. Geo. Leith.

With the exception of a few lots granted to M. Burwell, Surveyor, in 1824, probably in payment of services, no further grants seem to have been made.

until about 1830, when Lot A (Merchants Bank) was granted to Stephen Brock; Lot B (Eberts' building) to P. P. Lacroix in 1831; and in 1834, when lots began to be taken up rapidly, No. 92 to Thos. McCrae; No. 98 to H'y Chrysler; and in 1835, lot 95 to Daniel Forsyth

Notwithstanding that grants of lots had been so early made, no real settlement of Chatham commenced until about 1826, nor was there anything approaching the character of a village for a few years after. William Baker, the ship-builder, removed back to Detroit after the completion of the gun boats. To Wm. Chrysler, who settled here in 1820, belongs the honor of being the first permanent settler. True, Abram Iredell, the Surveyor, settled upon Lot 17 and erected the first house ever built in Chatham sometime prior to 1800. He was moreover, the first real estate holder, but he also moved away. His place, however, deserves particular mention. Those who do not know it by the number, will recognize it as the lot at the corner of William and Water streets, and once used as a part of Hyslop & Ronald's ship yard. On this lot, sometime about 1800, Ab. Iredell planted out the pioneer orchard of Chatham, the remains of which is still represented by two or three hoary old veteran apple trees, some ten feet in circumference, which still may be seen in all their aged grandeur, silent witnesses of many stirring events. Here lived its shadowy existence the first Chatham ghost—by the way, a colored one—the ghost of a colored boy who was supposed to have been foully murdered and secreted in a root-house or cellar built into the slope of the upper bank of the river near by, and which appeared at times at some particular spot, then made its way to the root-house, there to vanish probably off to a warmer climate. Moon-struck lovers when visiting this particular part of the river bank, are requested to tread lightly.

Under the shadow of the same old apple trees and old walnuts and elms near by, and on the Military Reserve beyond, lay the Indian army under Tecumseh, on the night of the 3rd of October; whilst on the north bank of the river opposite, lay the British, their vanguard at the Eberts farm, and their rear guard at Cosgrave's. And past these same old trees, for the road then followed the high river bank from the mouth of the creek, which was then there bridged, did Gen. Harrison's Kentuckians pursue them next day. Indeed, this spot and the Military Reserve should be sacred to Chathamites. It was at the point of the latter that the first blood was shed in the struggle of the Thames. It was there that Gen. Proctor had promised the Indians that he should make a stand and fight for their homes and villages, and from which it was with difficulty the English officers could induce them to retire farther up the river. And it was there that their rearguard, on the morning of the 4th, remained to destroy the bridge and burn Baker's block house with its stores, and check the advance of the Americans, upon whom they opened fire, killing three or four and wounding several others, somewhere about the corner of King and Fifth streets and on the site of the Merchants Bank; and where at same time they left on the "point" opposite two of their number—one a chief—to receive temporary burial at the hands of sympathizing settlers afterwards, a subsequent and more permanent one by the Indians themselves at a spot near D. R. VanAllen's residence, and where, some years after, a now old and respected townsman and other boys surreptitiously robbed the grave of the chief of its silver-mounted flint lock. Here, also, about the year 1820 were buried some of the early settlers of the neighborhood, amongst others, one Sarah Quant; another, a son of Stroback, the Dutchman, who was drowned in the creek; as, also, a daughter of the said

THE CASH

—AND—

ONE PRICE SYSTEM.

The Strictly CASH and ONE PRICE system is now appreciated by the public, it saves time in transacting business, a benefit to buyer and seller—as to both time is money. The Merchants who have but One Price and sells Strictly for Cash, can do with fewer hands and can afford to sell for less profit.

Some will argue that no one in business can carry out the Cash and One Price System to a letter, but this is a mistake, for

Messrs. PHILLIPS & MACFIE, Dry Goods Merchants of the Dominion House, Chatham,

Have conducted their business for years strictly upon this principle, and each year their business has increased. They are firm believers in "Small Profits and Quick Returns."

They don't believe in making the honest man pay for the dishonest. No Day Books, Ledgers, &c., and a Book-keeper at a high salary can be found in their establishment. they turn their Stock over often at a small rate of profit and make money.

Those in search of good value in Dry Goods can depend upon finding at the DOMINION HOUSE a good assortment of General Dry Goods, Mantles, Shawls, Millinery & Clothing made to order by First-class Workmen—all at the Lowest Prices,

The DOMINION House is close to the Market. Buyers try it.

It is hard to tell how many Apples Adam and Eve eat,
but it is easy to tell that

ISAAC SMITH

ADAM AND EVE AND THAT APPLE.

THE STORY COMPLETELY TOLD:

BUY WHO CAN READ IT?

How many apples did Adam and Eve eat? Some say Eve 8 and Adam 2—a total of 10 only.—
Now we figure the thing differently. Eve 8 and Adam 8 also—total 16.

We think the above figures entirely wrong. If Eve 8 and Adam 82, certainly the total will be
90. Scientific men, however, on the strength of the theory that the antediluvians were a race of
giants, reason something like this; Eve 81 and Adam 82—total, 163.

Wrong again; what could be clearer than, if Adam 81 and Adam 812, the total was 893?

If Eve 811st and Adam 812, would not the total be 1623?

I believe the following to be the true solution: Eve 814 Adam, Adam 8124 Eve—total, 8,938.

Still another calculation is as follows: If Eve 814 Adam, Adam 81242 oblige Eve—total 82,056.
We think this, however, not a sufficient quantity. For though we admit that Eve 814 Adam,
Adam 0281242 keep Eve company—total, 282,056.

All wrong. Eve, when she 81812 many, and probably felt sorry for it, but her companion, in
order to relieve her grief, 812. Therefore Adam if he 81814240fy Eve's depressed spirits. Hence
both are 81,896,864 apples.

Carol for the New Year.

Ring out, wild bells, to the wild sky,
The flying cloud, the frosty light;
The year is dying in the night;
Ring out, wild bells, and let him die.

Ring out the old, ring in the new,
Ring, happy bells, across the snow;
The year is going, let him go;
Ring out the false, ring in the true,

Ring out the grief that saps the mind,
For those that here we see no more;
Ring out the feud of rich and poor,
Ring in redress to all mankind.

Ring out a slowly-dying cause,
And ancient forms of party strife;
Ring in the nobler modes of life,
With sweeter manners, purer laws.

Ring out the wants, the care, the sin,
The faithless coldness of the times;
Ring out, ring out my mournful rhymes,
But ring the fuller minstrel in.

Ring out false pride in place and blood,
The civic slander and the spite;
Ring in the love of truth and right,
Ring in the common love of God.

Ring out the shapes of foul disease,
Ring out the narrowing lust of gold;
Ring out the thousand wars of old,
Ring in the thousand years of peace.

Homeless.

Dead—for the want of a crust!
Dead—in the cold night-air!
Dead—and under the dust,
Without ever a word of prayer;
In the heart of the wealthiest city
In this most Christian land,
Without ever a word of pity,
Or the touch of a kindly hand!

Religion we Want.

We want a religion that softens the step, tunes the voice to melody, fills the eye with sunshine, and checks the impatient exclamation and harsh rebuke. A religion that is polite, deferential to superiors, courteous to inferiors and considerate to friends; a religion that goes into the family, keeps the husband from being cross when dinner is late, and the wife from fretting when the husband tracks the newly-washed floor with his muddy boots, and makes him mindful of the scraper and door-mat; keeps the mother patient when the baby is cross, and amuses the children as well as instructs them, cares for the servants besides paying them promptly; projects the honeymoon into the harvest noon, and makes the happy home like the Eastern fig-tree, bearing in its beauty at once the beauty of the tender blossom and the glory of the ripened fruit. We want a religion that shall interpose between the ruts, and the gullies, and rocks of the highways of life, and the sensitive souls that are travelling over them. In short, a religion that will stimulate people to pay their just debts between man and man, and less preaching about one and then practicing another. This is the kind of religion honest, well-meaning people want.

Stroback and her two children—a maid who had loved well but unwisely, and who lost her life in giving birth to her two pledges of misplaced affection; and there is little doubt but that the bones of the children and the woman lately found by the men engaged in sloping away the bank at the "point," which years ago was less inland, are those of this woman and her children, and the skull now in possession of the Town Clerk, not that of an Indian, but of Miss Stroback. That there may have been Indians buried in that particular locality is more than likely. There are few spots of a similar position on the river where there are not, but there is no authentic record of Indian burials there. Had there been, would the remains have been confined as those referred to?

No further settlement took place in Chatham, it has been said, until 1830. A settlement, however, had been effected on the adjoining lot No. 3, Harwich, just outside the town plot. There, as early as 1792, one Thos. Clarke had located himself and had already prepared the wooden material for the erection of a grist mill on McGregor's Creek, then called after himself, "Clarke's Creek." When the mill first began operations, is not exactly known. It was running, so says Christopher Arnold, before his father's mill, which was in operation in 1800, and he thinks in 1797, but the frame must have been erected not later than 1795, as Gov. Simcoe refers to it in some of his letters as a most peculiar and unique affair, and truly it was. Square in form, it was built of hewn logs, which had been previously prepared, but left, as worked, in their original lengths. At the erection, which was effected by the usual "bee" and whiskey, the settlers—amongst whom was Stouffal Arnold—commenced to trim off the ends in proper lengths, which Clarke observing, said, "Never mind, boys; let them hang over at the rear corner," which mode was followed for several courses, when mischief getting into their heads, no doubt superinduced by copious drinks of whiskey, made them hang the tail butts on all sides, easy-going "Tom" laughingly joining in the freak.

Tom Clarke was a character, and for many years was, with his No. 12, 12 lb. iron nobbed shoes and 5 foot cane, a better known person than any one in the County, particularly to the women, whose meager and hard-earned tea caddies were sadly broken upon by the five or six cups of that beverage which he indulged in (when he could get it) at a sitting, when on his frequent visiting tours, Tom having a peculiar weakness for tea and small-talk.

Clarke ran the mill but a short time, and either he or John McGregor built another (the first was built at Little creek mouth) a little higher up the main creek, about 1808. At all events, through financial difficulties, the property fell into the hands of John McGregor, of Sandwich, grandfather of A. R. McGregor, of H. M. C., Chatham, who ran the mill until it was burned by the Indians (in 1813) to prevent its falling into the hands of the Americans. Here, in attempting the passage of the mill dam, several Americans and some horses were killed on the same eventful 4th of October, the body of one of the fallen men being found a year afterwards by Col. Toll, of Raleigh, and another boy, much to their horror, as they were hunting squirrels in the bush near by, the body having been laid along side of a log and covered with brush. John McGregor rebuilt the mill in 1818, this time lower down and on the east bank of the mouth of Little creek, the contractor being one Scott, who was also some years miller, and in connection with a store, which was shortly after established, controlled considerable trade, the place becoming quite a business centre, and assuming and monopolizing the trade that

should properly have fallen to Chatham. Here on the river flat, opposite the Eberts farm, were built several of the first sailing vessels and steamboats, as also the first steam saw mill ever built in the County. Here, also, in 1824, Israel Evans, sr., and family, including Israel, jr., who is now the oldest living settler, first cast his tent. "McGregor's Mills" held full sway until 1830; and later, when Chatham began to put in appearance, and asser. her rights.

Meantime, in 1820, Wm. Chrysler had pitched his camp on the river flat, Block C, on the spot now occupied as Dr. Holmes' residence, and commenced clearing the land above and below him. He erected a log house on a spot some where between the Doctor's new house and the river bank; and a few years afterwards, his son Henry (the late Collector) built another log shanty some where between the first-named log house and Boyd's warehouse; as, also, a blacksmith shop between the second log house and the street—the shop showing in M. Burwell's map of 1823, as standing partly on the lot and partly on the street.

Here, in 1822, Chrysler, it is said, raised from an acre of land upwards of 2,000 lbs. of tobacco. A few years after the lot fell into the hands of one Harvey, a colored man, who built thereon one of the first frame houses ever erected in Chatham, and which still remains as the kitchen portion in the rear of Dr. H.'s old house.

About 1824 and 1825 several other settlers had made their appearance. One Sharp built a small log house or shop near the top of the river bank, on the lot now occupied by the Eberts building. P. P. Lacroix, who succeeded him, built another log building shortly after, but nearer to King street. A log shanty was also erected on the bank of the river near what is now the upper end of the Rankin warehouse. A new bridge had also been erected in 1816 across the creek at William street, M. Burwell's map showing it as crossing in a diagonal line, S. E. to N. W. The English Church, burned some years ago, was built in 1820.

The next two or three years saw the erection of a few more log shanties, particularly two or three on the creek near where Hyslop & Ronald's machine shops and Aldis mill stand. Then arrived the family of Mr. Merriam, including the sons, now the oldest settlers, next to Israel Evans. And in 1830 was erected the pioneer store of Chatham, the first frame store at that, and a building of considerable pretensions, considering the time and place. It was built by Stephen Brock, a grain-buyer, who had previously been engaged in business in the lower river settlement, as it was then called, who purchased the lot upon which it was erected—the lot where the Merchants Bank now stands. The building was long occupied by William Eberts as part dwelling-house, part storehouse, and but a few years ago removed to make way for the Merchants' Bank, and may yet be observed in the more pretentious form of shops belonging to Rich Miller, on 5th street nearly opposite the Post Office, and until lately occupied by Robert Soutar as an Implement & Seed store.

About the same time the father of the late Capt. Smith opened out a store in a small log shanty on the Market reserve just about where the Town Hall now stands, in which he sold liquors. Claude Cartier started probably the first tavern in Chatham, in a log house just in rear of the building now occupied by the American Express, at the corner of King and Fourth streets; and here 3-cent swipes of corn whiskey was dispensed to Chatham bumpers, and their down the river, buckakin-breeched cousins.

On the corner of King and Third streets, where Payne's brick house now stands, stood Henry Chrysler's new blacksmith shop. A blacksmith shop had also been erected on or near the Reserve, at Colborne street, the owner, a colored man, dying afterwards, in 1832, of cholera. Dr. McMillan had erected a log building on the site of the Garner House, which he afterwards sold to Israel Evans, senr., and where, in after years, was erected the well-known "Farmers' Exchange," so long under the management of the popular "Billy Dolson," now of the River View farm, Raleigh; and last, not least, immediately opposite, on the spot now occupied by Ball's Stove shop, was erected, by the father of Israel Evans, the first Carding and Grain mill—and a horse-power mill at that—ever erected in Chatham, virtually the pioneer industry of the town.

The first Public School was erected on the site of the present Central School, in 1831, the window frames of which were made by that veteran servant of the Town, the present Collector, and was opened the same fall under the able mastership of Norman L. Freeman, the father of Mrs. John E. Brooke. It was a frame structure, and to make room for the present brick building in 1854, was removed to Slagg's old brewery, where, in later years, it served as a stable for Leith & Walker, Tanners. There had been several private schools, however, prior to its erection. One had been kept in Iredell's old house, and another in Chrysler's old house early in 1826, where James Chrysler taught the young idea of the backwoods their A B C's, and where, no doubt, Israel Evans, who is said to have been a lively boy, played leap-frog and planned mischief.

The village now grew apace, and the next few years saw the arrival of many of our oldest and most respected townsmen—David Pratt, in 1831; Thos McCrae and Daniel Forsyth, 1832; Joseph Northwood, in 1833; and Henry VanAllen, James Reed, Wm. Eberts, Henry Verrall, Jas. and Wm. Baxter, and others, in that and the following years. Wm. Eberts may, indeed, be said to have been a resident many years before, as he was brought up on the farm where his father, Joseph Eberts, carried on a very extensive trade in storekeeping, tavern-keeping, boating and ferrying. The population had now reached about 300, a census being then taken by H'y Verrall, at the desire of the principal men of the village, who, by a hat subscription, provided the necessary funds for the purpose.

The appearance of the village at this time was not very prepossessing. The street forming part of the London or Tecumseh Road was little better than a decent trail, full of holes and stumps, twisting along the bends of the river, and barely passable for the stage and wheeled vehicles. Within the town plot there was little clearing. Along the river bank as far east as 4th street the land was under cultivation. Between 4th and 3rd streets, on the river side, there was a sugar bush, with less or more clearing; and the square on the north side comprised within King, Wellington, 3rd and 4th streets—a common. The Barrack ground was under crop, having been cleared since 1812-13; but, with the exception of a few other spots near the market, there was little or none other. Beyond 6th street, between which and 5th street it had formerly crossed the creek, the road now trailed along the creek as far as William street, where it crossed; thence following the same to McGregor's Mills, crossing there Little Creek, and then making through the bush to a point on the river near Delmage's old farm. The school lands were a dense bush, even up to 1840, and a large swamp lay along Wellington street in the neighborhood of the churches, where, in wet times, the school children had

to disport themselves along logs and rails to reach the school dry shod. Towards the station and eastward to the boundary, the land was a black ash swale. The banks of the Creek, from 6th street and the River to 4th street, was a sugar maple bush. Where the Merchants Bank now stands there was a beautiful grove of maples, which was the resort on all occasions of a political or festive character. Here the young played, whilst the elder cooed and courted and their mammas darned stockings and leather-faced breeches. Here, under their grateful shade, Indians resorted to trade, and the brave made love to his dusky forest belle, or, what is more likely, brawled in hideous howls over interdicted corn whiskey, which was sold to him under the Justice's nose. And here, too, at a particular spot near a thorn tree, took place the polling at the earlier political elections, then a six-days matter—in particular, the one when McGregor was elected, and when a bower was erected for his comfort and convenience by the late Wm. Toll, the father of Col. Toll; and where the "free and independent," then fearless of disqualifications and election trials, recorded their votes by open word of mouth and sucked to their heart's content the whiskey supplied by their favorite candidates. Indeed he was no candidate who could or would not provide a free lunch or a barrel of the ever-present liquor on the ground; and at the election of 1824, Jos. Eberts, the father of Wm. Eberts, spread out on behalf of Birsey, his favorite (and the successful) candidate, a free entertainment. Another candidate, grateful for the liberal support he had received, promised the settlers that he would send them a supply of salt and harrow teeth, then sadly wanted in the settlement at the time; and he kept his word, but charged \$20 per barrel for the salt, and \$1 each for the harrow teeth. Another candidate, hilarious with the copious swigs at his own whiskey barrel, in a tussel with a brawny and afterwards prominent yeoman of down-the-river-settlement, rolled down the steep bank in loving (?) embrace, and only saved a sound sousing by coming in contact with an old stump at the bottom.

In the school house in 1832, sat the first Commissioners' Court ever held in Chatham; and in the same place, in the year 1841, sat, in the Division Court the first Judge that ever honored the County with his presence. In 1839-40, the Royal Exchange was erected, as was the Methodist Church in 1840, and the Scotch Kirk in 1841-42, which were most patronized—the Tavern or the Churches—history does not inform us. In or about 1833-34, was erected the first bridge at Eberts farm, the second at William street, in 1838-9, and the third at 5th street, in 1848-50. In 1838 the Barracks were built; in July, 1841, the Chatham Journal published; in 1851, the village incorporated, and in 1856 made a town. The Court House was built in 1850—the first Quarter Sessions held the same year, on the first day of April; and on the 29th day of May the Assizes, when the magnates of the town marched in procession, preceded by Judge Sullivan, to the Court House, which was then formally opened. In 1835, the population was 300; in 1840, 759; in 1841, 812; and in 1843, 1082, 75 of which lived in North Chatham; and contained 9 merchant shops, 8 grocers, 5 butchers shops, 2 flour mills, 1 saw mill, 1 potash factory, 1 tannery, 2 breweries, 2 bakeries, 4 blacksmith shops, 2 engine makers, 1 boiler maker, 1 tinsmith, 2 wagon makers, 2 coopers, 1 cabinet maker, 3 fanning mill makers, 1 gunsmith, 3 painters, 2 saddlers, 18 carpenters, 6 tailors, 7 shoemakers, 1 weaver, 1 watch maker, 1 tallow chandler, 1 broker, 1 sawyer, 3 doctors, 4 churches (two building), 4 schools, 1 printing office, and 10 taverns.

How dazzling white the snowy scene! deep, deep
The stillness of the winter Sabbath day—
Not e'en a footfall heard. Smooth are the fields,
Each hollow pathway level with the plain.

The Winter Snows.

Over the mountains the snow-wreaths are drifting,
Hanging their garlands on laurel and pine,

Robing the fields with an exquisite beauty,
Bending the feathery sprays of the vine,
Falling like down on the breast of the river,
Crowning the maple trees over the way,
Drifting along on the winds to the southward,
Hiding the vessels far out in the bay.

In the red sunset the snow-flakes are shining,
Snow-drift on snow-drift, and curl upon curl,
Flashing back colors of exquisite brightness,
Diamonds and rose leaves and mother-of-pearl.
Softly, ye snow-wreaths, drop over the hill-side
Where in still slumber the weary ones rest,
Where by the pine-tree my mother is sleeping,
Tenderly lay your white folds on her breast.

Soon shall the spring-time break over the mountains,
Over its beauty no cold wind shall blow;

Frost shall not breathe there to wither the flowers,
Never again shall they hide in the snow;

Eye hath not looked on that spring in its beauty;
Songs of the seraphs shall welcome its birth;

Come in the beauty and glow of the morning,
Spring-time eternal, dawn over the earth.

Snow Bird.

Then, 'mid snow-drifts white,
Though the trees are bare,
Comes the snow-bird, bold,
In the winter's cold;

Quick, and round, and bright,
Light he steps across the snow,
Cares he not for winds that blow,
Though the sifting snow be drifting
Through the air.

Cold Weather Gospel.

There is perhaps no greater fallacy than the opinion of many, particularly the young and vigorous, that winter—especially a sharp, frosty one, with plenty of snow—is the most healthy season of the year. Very few persons seem to realize the fact that cold is the condition of death, and that in both warm and cold climates it is our unconscious effort to

maintain our bodily heat at a temperature of 98 degrees that wears us out. To this temperature, called "blood heat," every cubic inch of oxygen that serves to vitalize our blood must be raised by our own bodily heat, or life ceases. Since in cold weather the maintenance of a sufficiently elevated bodily temperature becomes very often a difficulty too great for our strength, the advent of a severe winter is really more to be dreaded than the visitation of a pestilence. The saying, "Heat is life—cold is death," has a striking illustration and confirmation in the reports submitted to sanitary committees. The death-rate rises and falls with the regularity of the thermometer. So many degrees less heat, so many more deaths, and vice versa. Whatever weak place we have, whatever constitutional disorder we be subject to, cold will surely discover. We take colds because our vitality is too low to ward off the effects of the reduced temperature around us. As a matter of first importance, then, to resist colds and the various derangements of the system consequent, it is necessary by proper nutrition to maintain our natural animal heat; second, to retain this heat by a sufficient quantity of clothing; third, to regulate with care the temperature of the air we breathe. Contrary to the opinion current among lovers of cold weather, a fire in a bedroom in winter is cheaper and better than a doctor's bill; for, owing to our inactive condition during sleep, the circulation of the vitalizing blood is both slow and imperfect, and hence the danger of taking cold by breathing cold air is greatly increased.

WILLIAM BAKER'S PAY ROLL.

We whose names are hereunto subscribed do hereby acknowledge to have received of RICHARD BARN TICKELL, Esquire, Dep'ty Paymaster Gen'l, the sum of money opposite our names, being in full for our services, having been employed the number of days opposite our names in sundry works carried on at Chatham, on the River Thames, between the 25th December, 1794, and 24th March, 1795, inclusive; signing two Receipts of this tenor and date.

DOUBLE-ACTING

Anti-Freezing Force Pump!

Simple in Construction, Durable, not
Liable to get out of order, and will
not freeze All these requirements
are fully met in this Pump

No Trouble or Annoyance, Winter or Summer!

Geo. MINDERLINE, Esq.,

DEAR SIR.—Having had one of Hopkins' Anti-Freezing Force Pumps in use for the past six months, I have much pleasure in certifying to you as to its efficiency. It is easy to work, does not get out of order, and for lawn or garden sprinkling it, is invaluable. As a protection against fire, with 50 to 100 feet of hose it would be of great use, as water can be thrown 40 to 50 feet with ease.—I remain, yours,

MAYOR'S OFFICE, Chatham, Ont., July 27, 1880.

WM. NORTHWOOD, Mayor.

Thousands of these Pumps are already in general use in different parts of the United States and Canada, and they give unequalled satisfaction.

Made only by the undersigned in the County of Kent.

MARCH.

March.

The stormy March is come at last,
With wind, and cloud, and changing skies;
I hear the rushing of the blast,
That through the snowy valley flies.

Oh, passing few are they who speak—
Wild, stormy month, in praise of thee;
Yet, though thy winds are loud and bleak,
Thou art a welcome month to me.

For thou to northern lands again
The glad and glorious sun dost bring,
And thou hast join'd the gentle train,
And wear'st the gentle name of Spring.

And in thy reign of blast and storm,
Smiles many a long, bright, sunny day,
When the changed winds are soft and warm,
And heaven puts on the blue of May.

Then sing along the gushing rills,
And the full springs, from frost set free,
That, brightly leaping down the hills,
Are just set out to meet the sea.

The year's departing beauty hides,
Of wintry storms the sullen threat;
But in thy sternest frown abides
A look of kindly promise yet.

Thou bringest the hope of those calm skies,
And that soft time of sunny showers,
When the wide bloom on earth that lies,
Seems of a brighter world than ours.

A Forecast.

Bland as the morning breath of June
The southwest breeze play;
And, through its haze, the winter noon
Seems warm as summer's day.
The snow-plumed Angel of the North
Has dropped his icy spear;
Again the mossy earth looks forth,
Again the streams gush clear.

The Parlor.

Into the shaded parlor the ceremonious visitor is ushered with due solemnity. We immediately picture in our imagination the terrible oppressiveness of that best room, where the sun is never allowed to shine for fear of fading carpet and furniture, where the chairs have all a stately, polished and stiff look about them,

where the children are never allowed to enter, where what little air there is may never be allowed to change, and where the smell is something akin to that of a family tomb. This is the best room, and is altogether too sacred for the use of the family, and is only kept for purposes of ceremony and for the convenience of those people for whom we do not care a rush. Friends come into the pleasant sitting-room, where we have a chat in genial fashion; but strangers are doomed to twenty minutes torture in the grander, unadorned apartment which we proudly call our parlor. Now the principle upon which this room is founded is all wrong. Let us have no such room in our house. Open the shutters and windows. Admit the sunlight and air. If the carpets and furniture fade, let us enjoy their use in that condition. Let us not have any tomb in our home, where all should be cheerfulness and brightness. Abolish the "parlor" and enjoy the home. That's what it is intended for.

Ill-Speaking.

If the disposition to speak well of others were universally prevalent, the world would become a comparative paradise. The opposite disposition is the Pandora-box, which, when opened, fills every house and every neighborhood with pain and sorrow. How many enmities and heart-burnings flow from this source! How much happiness is interrupted and destroyed! Envy, jealousy, and the malignant spirit of evil, when they find vent by the lips, go forth on their mission like foul fiends to blast the reputation and peace of others.

Capricious month of smiles and tears,
There's beauty in thy varied reign!
Emblem of being's hope and fears,
Its hours of joy and days of pain.

STATE LINE, RED STAR AND AMERICAN LINES.

FIRE & LIFE INSURANCE AT LOWEST RATES

NEEDLES AND OIL FOR SEWING MACHINES.

W. H HARPER, Agent Dominion Telegraph Co., Fifth Street, CHATHAM

J. W. BOWES,

CHATHAM'S

CHEAP GROCER.

TO THE PEOPLE OF THE COUNTY OF KENT.

Cheap GROCERIES Booming

It will repay anyone for their trouble to call and examine.

My Sugars that are cheap,
My Teas that can't be beat,
My Brooms that sweep so clean,
That no dirt can e'er be seen,

My Soaps I need not name,
So far reached is their fame,
Syrups, Coffee, Rice,
At the very lowest price.

All that's in our line
Is tuned to the cheapest rhyme,
And now come, everyone,
And hear the way things hum.

And go away convinced
That before the flood nor since,
Did any sell so low,
As J. W. BOWES you know,

J. W. BOWES,

KING STREET

(Next door to Polle's Harness Shop.)

GOODS DELIVERED.

M'CANN & CRUMP, Horse-Shoeing & General Blacksmithing.

Horse-shoeing a specialty under the management of Mr. F. CRUMP. His experience in treating all kinds of lameness or interfering, to which the feet are subject, is universally known. Repairing of all kinds promptly attended to. Carriages and Cutters of all kinds on hand, or made to order. Place of Business—Next to Davis' Foundry, Queen Street.

JOHN McCANN.

A CALL SOLICITED.

FRANK CRUMP.

Spring's Changes.

Again the floweret on the bank
 Its white stars shows; in foremost rank
 Again the crocussed April comes
 Ere cold winds cease, or wild-bee hums.
 The first link of the emerald year
 With subtle change doth now appear;
 Earth turns on her brown coverlet
 A few green folds; begins to net
 Her belt of flowers; the thrushes call
 To ope the sun's high turquoise hall;
 The running sparkling rivers shew
 At morn and eve a rosier glow;
 The day a longer pleasure takes,
 E'en in the forest's leafless brakes;
 The Spring's light fingers sweetly play
 In the boy's heart her music gay.
 The ravel comes of joyous life,
 Like the first waves in limpid strife
 Playfully racing to the sand,
 At some soft summer wind's command.
 The old world once again returns,
 Renews the fire that ever burns
 On Heaven's cerulean hearth above;
 And golden light is warm as love;
 The old is new, the new is old;
 The chestnut leaves again unrolled;
 The squirrels in the beech-woods dark,
 The lambs about the swarded park,
 The echoing calls of the new-come birds,
 The Easter feast, the Easter words;
 The same again, yet long desired;
 The world of them is never tired.

Selfishness.

Selfishness is poverty: it is the most utter destitution of a human being. It can bring nothing to his relief, it adds soreness to his sorrows, it sharpens his pains, it aggravates all the losses he is liable to endure, and when goaded to extremes, often turns destroyer and strikes its last blows on himself. It gives us nothing to rest in, or fly to, in trouble, it turns our affections on ourselves, self on self, as the sap of a tree descending out of season from its heavenward branches, and making not only its life useless, but its growth downward.

Taste and Economy in Dress

So great is the mania for expensive attire that hard-working girls, who ought to lay by a little for the inevitable "rainy day," spend all their hard earnings not needed for board upon their dress. Expensive silks, showy jewelry, high-priced gloves and boots, and every novelty and change in fashion, sweep away their hard earnings, and leave them, when broken down in health, dependent on charity for shelter and care. This is true of the class, although of course there are many noble exceptions, such as girls who are denying themselves every useless luxury that they may aid in the support of aged relatives or young brothers and sisters. But I wish *all* our girls would practice more economy in this respect. Why will they not dress in simple materials prettily made? Why wear such elaborate toilets, and have so many different ones every season? If they only knew it there is a knack in making up a dress; in giving it a tasteful look; in selecting trimmings to match or contrast well, and in inventing something pretty that is more effective than more costly adornment. In these days all can learn to make their own dresses, by the aid of books, patterns and sewing-machines and this alone will save more than the cost of the material. The present style of dress admits of endless combinations and varieties. Let us call in our taste, then, and make our selections truly artistic and effective. One can always then look pretty and "stylish," which is really more desirable than just to represent an enormous sum of money.

Until 1867 Kent Co. returned but one member. From 1867 a new Electoral division was formed, viz: Bothwell, which comprises Harwich, Howard, Orford, Camden and Zone in Kent Co.; and Euphemia, Dawn and Sombra, in Lambton Co. Kent electoral County now comprises the balance of the Municipal County not included in Bothwell. Since 1874 the County has been divided into Ridings—East and West—returning a member for each. West comprises Romney, Tilbury, Raleigh, Chatham Town, Dover & Chatham. East—the remainder of the County.

A Barometrical Discovery.

In this age of scientific progress, when every week heralds the finding of a new planet, or the invention of a machine, it is extremely gratifying to learn of the discovery of a new scientific principle of practical importance, such as was brought to the world's notice by a college student while spending his last vacation in Colorado. The discovery was of a cheap, convenient, and comparatively accurate means of ascertaining the altitude of mountains, or any elevated portion of land.

It is well known that the ordinary method of obtaining such information, when it is impossible or inadvisable to use the engineer's level, is by means of a mercurial or aneroid barometer. Now, no two barometers ever agree—a defect produced, no doubt, by their close family connection with scientific experts—and the unpleasantness arising from this cause between gentlemen of science are innumerable.

Like the majority of great discoveries this was the result of pure accident. When visiting Manitou one afternoon with some friends, the young student and a lady companion separated from the others and strolled slowly up the mountain. After ascending a few hundred feet, the student noticed that his companion's pressure on his arm visibly increased, and when nearly to the snow-line became so great that it was necessary for him to encircle her waist with his arm to support her.

Bringing all his collegiate knowledge to bear upon this slight hint, and experimenting with a great variety of girls under every possible condition of climate and temperature, he established the fact that the girl-pressure increased at the rate of one pound to every 100 feet of altitude, and that above 2 500 feet the arm-encircling method commenced. While here his deductions were based and his elevations calculated from the hotel porch at Manitou, where the pressure was zero but on returning east he found that the same relative rule held good. That is to say, starting from any given base or zero point, as Newport, Long Branch, or Saratoga, the pressure increased in the same ratio as at Manitou. An exhaustive series of experiments also showed him that only girls between the ages of 16 and 26 are reliable for this purpose; those below that limit being, except in a few rare instances entirely non-sensitive; and those above, so erratic in their register as to be useless—sometimes showing an elevation of 1,000 feet when just out of sight of the base and before any altitude was attained, and others, especially if of an esthetic nature, showing no pressure whatever. He also found that the presence of a third party entirely neutralized the girl-barometer, but that upon its removal the correct pressure corresponding to the altitude returned immediately.

The great value of this discovery the scientific world will not be slow to recognize and avail itself of. Choice lots of assorted girls can be easily placed at available points, ready at any time for investigators, and professors can no longer plead the inaccuracy of their barometers as an excuse for errors in regard to the heights of our mountain peaks. It will also recommend itself to the favor of the political economist, opening up, as it does, a new field of industry for women.

Hail, beauteous May, that doth inspire
Mirth and youth with warm desire;
Woods and groves are of thy dressing,
Hill and dale doth boast thy blessing.

MAY.

SPRING.

At last from Aries rolls the bounteous Sun,
 And the bright Bull receives him. Then no more
 The expansive atmosphere is cramp'd with cold;
 But, full of life and vivifying soul,
 Lifts the light clouds sublime and spreads them
 thin,
 Fleecy and white, o'er all-surrounding heaven.
 Forth flies the tepid air; and unconfined,
 Unbinding earth, the moving softness strays.

Violet-Time.

Violet time is come again;
 Once more laughing through the rain,
 Spring with sunny crown advances,
 Sunshine glittering on his lance.

Long live Spring!—the rainbow arch
 Greet his coronation march;
 Green his banners, free and brave,
 From each tree-top rustling wave.

Birds before him fly in clouds;
 Fast above him float the clouds;
 Swifter run rejoicing rivers;
 Sunbeam darts are in his quivers.

Where he treads, primroses rise,
 And the daisies ope their eyes;
 Blackbirds sing in every bush,
 Answering the merry thrush.

Swallows are his heralds fleet,
 Faster than the pulses beat;
 Butterflies between the showers,
 Tell the glad news to the flowers.

Our old monarch, Winter, 's dead;
 His crown is on another head;
 Sunbeams chase the envious rain;
 Violet-time has come again.

Childish Sufferers.

If children really dislike doing some particular thing, in a particular way, it is foolish to force them to do it merely for the purpose of making them obey. Where any good end is to be answered, it is different. Little ones often object to what is best for them, and when firmness is necessary, people should of course be firm. But if a little powerless creature has a strong fancy or a great repugnance,

a parent or guardian abuses his power by ignoring it. Why should your little boy be made to eat the fat of his meat if he loathes it, or anything, no matter what, that is repulsive to him? Or why make a child miserable by forcing it to wear articles of clothing which its taste does not approve, or at which other children laugh? I think little girls suffer more from this than from any other one thing. Almost all of us have some such memory. I know a lady whose childish life was made wretched for a year by an obsolete old bag in which she was forced to carry her books to school; and another whose mother forced her to wear some old lace, which, though costly, was laughed at by the ignorant children who made her world, who declares that she actually wished herself dead until that lace was banished from her wardrobe. If you can manage it, be wise, and consult your children's tastes.

Lying supplies those who are addicted to it with a plausible apology for every crime, and with a supreme shelter from punishment. It tempts them to rush into dangers from the mere expectation of impunity; and when practiced with frequent success it teaches them to confound the gradations of guilt, from the effects of which there is, in their imagination at least, a sure and common protection. It corrupts the early simplicity of youth; it blasts the fairest blossoms of genius; and will, most assuredly, counteract every effort by which we may hope to improve the talents and mature the virtues of those whom it effects.

Facts About the Weather.

From the Advertiser Annual.

There is probably no subject about which people have so much to say as the weather. "Will it rain to-morrow?" is the question often and anxiously asked; but how many are there who can give a reply of any practical value, that is, one founded on an intelligent understanding of the laws of storms, and therefore likely to prove correct? The almost universal lack of information on so important a matter will not appear so strange when it is considered that it is only within the last ten or fifteen years that Meteorology has advanced to the position of a scientific system. Up to a recent period, the weather had received comparatively little scientific study, and such theories as were held were for the most part mere guess work. For example: much has been written about the influence of the moon on the weather; but it is now positively demonstrated that the moon has no appreciable influence on our atmosphere, and consequently all the ancient dogmas concerning what will happen "when the moon changes" are utterly baseless. It is hardly necessary to say that the old-fashioned almanac which predicts the weather for the entire year is a pure humbug; in fact, any prediction which extends more than a few days ahead is simply charlatanry, and such will probably always be the case.

Great attention is at present being devoted to this subject. Nearly every civilized government has its staff of meteorologists, working night and day in the compilation of statistics and issuing of weather predictions, based on their own observations in conjunction with those received in exchange from neighboring countries; and it is confidently believed that before many years have elapsed it will be possible to predict almost with certainty the weather to be expected for days, or even a week, ahead. Already our Canadian Meteorological Office at Toronto, through the interchange of reports and observations with the United States office at Washington, is able to issue at 120 points daily predictions, of which nearly 90 per cent. are verified. The benefit conferred on commerce by the warnings of approaching storms thus given is incalculable. The time is perhaps not far distant when the farmer will everywhere regulate his farming operations by the weather bulletin, sent by telegraph and posted up every morning in every post office in Canada.

As that day, however, has not yet arrived, we purpose giving an outline of the laws of storms, and some of the signs of the weather which experience has proved to be trustworthy.

STORMS.

A storm is a disturbance of the atmosphere, usually attended with a fall of rain or snow. The storms of the Northern States and Canada generally first make their appearance on the Pacific coast, or near the Rocky Mountains, travelling usually in an easterly direction, at an average speed of 25 miles an hour. Their average form is elliptical, the long axis of the ellipse running from southwest to northeast. Occasionally the form is almost circular, while sometimes the length is three or four times the breadth. Frequently the entire rain area is an oval figure, whose length exceeds 1,000 miles, and whose breadth exceeds 500 miles, the amount of rainfall increasing towards the centre. Although so widely extended, storms seldom reach to a height of more than one or two miles above the earth's surface.

The United States Government has signal stations established in every part of the country, which report the state of the weather by telegraph to Washington simultaneously three times every twenty-four hours. The re-

ports thus received being brought together and inscribed on specially prepared maps, the progress of a storm from ocean to ocean is as easily kept in view as that of a railroad train on its journey across the continent, and the officials are enabled to give timely warning of approaching storms. In Canada, reports are now being telegraphed to Toronto from points as far apart as Battleford, in the Northwest Territories, and Sydney, Cape Breton.

CLOUDS.

There are eight distinct kind of clouds. The loftiest is the

CIRRUS, OR CURL CLOUD.—Usually looks like hair, feathers or tufts. It is often as much as ten miles high, and generally indicates coming changes.

CUMULUS.—Convex or conical heaps. Includes all those of a rounded form. Caused by currents of moist air rising from the heated ground becoming chilled on reaching a colder stratum. A fair weather cloud.

STRATUS.—A horizontal sheet of uniform appearance, The cloud which brings rain.

CIRRO-CUMULUS.—Small, well-defined, roundish masses, flying high. Attendant on dry weather.

CIRRO-STRATUS.—Horizontal or slightly inclined masses. Formed by the settling down of the Cirrus. Sometimes forms what is called a "mackerel sky."

CUMULO-STRATUS.—The Cirro-Stratus blended with the Cumulus. Often precedes rain or thunder storms.

NIMBUS.—The rain-cloud. A cloud or system of clouds from which rain is falling. Sometimes called the Cirro-Cumulo-Stratus.

SCUD.—Loosely-formed, detached clouds, drifting rapidly before the wind. Usually attendant on storms.

WINDS.

All surface winds of any importance are under the influence of a storm-centre. A great storm will sometimes cause winds over an area more than 2,000 miles in diameter. The average tendency of storm winds is to circulate around the storm's centre from right to left, or in the opposite direction to the hands of a watch, and at the same time to move spirally towards the centre. The volume of air thus concentrated at the centre rises up laden with the vapor of the surface, which condenses as it rises into the colder upper regions, and is precipitated in the form of rain or snow.

An established maxim is: Turn your back to the wind, and the storm's centre will be on your left front. For example: Suppose the wind is from the southwest; turn your back to it, and the storm-centre will be on your left front, that is, to the northward.

By keeping this rule clearly in mind, an observer is greatly assisted in judging of the weather. For as nearly all storms come from some quarter of the west—that is, from some point between southwest and northwest—he can generally tell by the direction of the surface wind whether the storm, of which he sees other signs in the air, is still approaching him, whether he is in its direct track, or to the north or south of it, or whether it has passed by. It must be remembered that the movement of the storm from west to east is quite independent of the direction of the surface winds, which blow in every direction beneath it. The storm itself sweeps grandly on above them all, the only office of the lower winds being to keep it supplied with vapor, mainly gathered from the cloudless area outside and all around the storm, where the sun's heat fills the air with the moisture of evaporation.

At the height of one mile above the earth's surface the velocity of the

wind is about five times that of the surface wind. The upper current in this latitude, high above all storms, blows almost continuously from a westerly direction. This is the reason that the Cirrus clouds, projected to a great height from the vortex of storms, fly so far in advance and give warning of their approach.

WEATHER SIGNS.

After fine, clear weather, the first signs in the sky of a coming change are usually light streaks, curls, wisps or mottled patches of white distant cloud, which increase and are followed by an overcasting of murky vapor that grows into cloudiness. This appearance, more or less oily, or watery, as rain or wind will prevail, is an infallible sign.

If, during fair weather, Cirrus clouds appear and increase rapidly, they will be followed by Stratus and rain, probably within twelve hours.

A sudden lull in the wind, or a sudden change in its direction, indicates a change of weather.

If the wind change from north or northwest to southwest, south or southeast, a storm is approaching. Should the southerly wind die down at night-fall, it will probably not rain that night. Sometimes this will be repeated for several days in summer, before the storm arrives. If the southerly wind freshens after sunset, and the sky is cloudy, expect rain before morning.

Whenever there is a change of wind from a northerly to a southerly direction, watch for the cloud signs, which may be expected to appear: First, the Cirrus or Cirro-Stratus; then the Stratus or Cumulo-Stratus, with perhaps patches of Scud flying across its front; and then the Nimbus and rain.

With approaching Stratus, if the Scud fly low and increase rapidly, expect rain very soon.

More than usual twinkling or apparent size of stars indicates bad weather.

Halos round the moon are a sign of rain, and the more distinct and perfect the halo, the more important the storm will be.

Remarkable clearness of the atmosphere, especially near the horizon, is a sign of wet weather.

Thunder-storms almost always occur when the temperature is unusually high for the season of the year

A rainbow in the morning is the sailor's warning;

A rainbow at night is the shepherd's delight.

A red sky in the morning indicates bad weather, or much wind, perhaps also rain; a grey sky in the morning, fine weather.

Whether clear or cloudy, a fazy sky at sunset presages fine weather; a bright yellow, wind; a pale yellow, wet; dark (or Indian) red, rain; a tawny, orange, or copper-colored, or a sickly greenish hue, wind and rain.

Small, inky-looking clouds foretell rain; light Scud clouds driving rapidly across heavy masses, wind and rain.

Two currents of clouds moving rapidly in different directions, usually portend rain.

If at sunrise there be many dark clouds in the west and they remain, there will be rain that day.

If at sunset there is a very red sky in the east, there will be high wind; if in the south-east, rain.

If the sun shines during rain, it will be showery.

If the rain ceases and the wind continues southerly, do not expect settled fair weather till the wind changes to northwest or north, with a clearing sky.

If rain fall with a settled east wind, it will probably rain for 24 hours.

If cattle leave off feeding, and chase each other, or congregate in the corners of the field; if cats lick their bodies; if horses stretch out their necks, and act strangely in their pastures; if a swine be restless and grunt loudly; if dogs eat grass, or howl more than usual; if sheep spring about in the meadows; if peacocks scream, owls screech, and turkeys gobble; if swallows fly lower than usual; if crows make a great deal of noise, expect foul weather.

If it be hotter after a shower in spring or summer, it will continue showery.

Generally the softer clouds look the less wind, but perhaps more rain may be expected; and the harder, more greasy, tufted, rolled, or ragged, the stronger will be the wind.

Soft-looking or delicate clouds foretell fine weather, with moderate or light breezes; but hard-edged, oily-looking clouds, high wind.

When the first signs of daylight are seen above a bank of clouds, wind; when the day breaks near the horizon, fair weather.

Evening red and morning grey will send the traveller on his way;

But evening grey and morning red, will bring down rain upon his head.

If the dew lies plentifully on the grass after a fine day, there will be another. If not, and there is no wind, rain must follow.

When it rains with the thermometer about 32 degrees, if the wind is easterly and moves towards the northeast, it will grow colder and the rain will turn to snow; if it is snowing with the thermometer about 32 degrees, and the wind moves southerly, it will turn to rain.

Rain-clouds may be distinguished from snow-clouds by their darker appearance.

There will never be much rain when the weather is unusually cool for the time of year.

Rain or snow rarely occur without being preceded by a decided rise in temperature. After a storm passes it will be cooler, unless there is another storm following the first closely.

During rain, if the wind is southerly, and begins to change to westerly, this indicates that the storm centre is passing to the northward; but it will not probably clear up until the wind comes out of the northwest. Even then it may continue to shower, particularly in spring and fall, as long as the wind continues strong. But after the northwest wind falls to a gentle breeze, with the sky clearing, settled fair weather may then be relied on.

During summer rains the northwest wind is the clearing off wind; but in winter very heavy snow-falls frequently occur during a northwest wind. Precipitation must be expected to continue in winter as long as the wind continues fresh, no matter what quarter it blows from. But after a snow-fall occurring during a northwest wind, a period of clear, very cold weather may be looked for.

During rain in summer, if the wind is easterly and moves towards the north the rain will soon end and be succeeded by fair cool weather.

When smoke rises it will be fair; when it falls or flies low, foul.

When snow falls in flakes, which increase very much in size, expect a thaw.

All signs seem sometimes to fail, particularly in midsummer. It appears to rain "easier" in the cool seasons.

These rules having been culled from the most reliable authorities, and being the result of the experience of many observers, cannot fail to be of great service if carefully studied and intelligently applied.

'Tis June, 'tis merry smiling June!
'Tis blushing summer now;
The rose is red, the bloom is dead,
The fruit is on the bough.

—ELIZA COOK.

JUNE.

From brightening fields of ether fair disclos'd,
Child of the Sun, refulgent Summer comes,
In pride of youth, and felt through nature's
depth;

He comes attended by the sultry hours,
And ever-fanning breezes on his way;
While from his ardent look, the turning Spring
Averts her blushing face; and earth and skies,
All smiling, to his hot dominion leaves.

Summer.

I'm coming along with a bounding pace,
To finish the work that spring began;
I've left them all with a brighter face,
The flowers in the vales through which I've
run.

I have hung festoons from laburnum trees,
And clothed the lilac, the birch, and broom;
I've waken'd the sound of humming bees,
And deck'd all nature in brighter bloom.

I've roused the laugh of the playful child,
And tired it out in the sunny noon;
All nature at my approach hath smiled,
And I've made fond lovers seek the moon.

For this is my life, my glorious reign,
And I'll queen it well in my leafy bower;
All shall be bright in my rich domain;
I'm queen of the leaf, the bud, and the flower.

And I'll reign in triumph till autumn time
Shall conquer my green and verdant pride
When I'll hie me to another clime,
Till I'm called again as a sunny bride.

What Shall we Drink.

All sensible persons know that hot weather is no time to be guzzling fiery liquors, no matter how craftily and temptingly they may be disguised as cooling beverages. But intemperance is also to be avoided in the use of milder potations. The less lager, the less claret, the better; the less lemonade, soda water, or ice water, the better. Death lurks in the Good Templar's cooler as well as in the drunkard's demijohn. The ingestion of clear water appears to answer very imperfectly the wants of the system. It seems to pass through the circulation to the skin, percolates as through

a sieve, and flows over the surface of the body in streams. A large drink of cold water on an empty stomach, when the system is exhausted by heat, is very dangerous, and liable to produce death. Great practical advantage has been obtained by mixing farinaceous substances, particularly oatmeal with water. The oatmeal is mixed in proportions of three or four ounces to a gallon of water. It might be difficult to determine why oatmeal for this purpose should be better than cornmeal, or buckwheat, or rye, wheat, millet, etc., but those who are accustomed to the oatmeal beverage seem to think it has the effect of making them as strong as horses. The peculiar aroma of the oats is probably associated with the pleasant degree of stimulation of the alimentary mucous surface in such a way as to promote its complete digestion. It seems to fill the blood vessels without increasing the amount of cutaneous exhalations. The drinkers occasionally try acid, saccharine, or alcoholic drinks as substitutes for the oats, but only to find that sweetened water is better than clear water, and that additional profuseness of perspiration and exhaustion follow the use of intoxicants.

Never forsake a friend. When enemies gather around, when sickness falls on the heart, when the world is dark and cheerless, is the time to try true friendship. They who turn from the scene of distress betray their hypocrisy and prove that interest only moves them. If you have a friend that loves you, who has studied your interest and happiness, be sure to sustain him in adversity.

The first P.O. established in the County of Kent was "Raleigh," at McCrae's farm, on the River, sometime about 1820. It was subsequently removed to Chatham about 1828-29, under the same name, and kept at McGregor's Mills. *Whitehall (Kent Bridge) is supposed to have been established in 1830.

'Tis raging noon; and vertical, the sun
Darts on the head direct his forceful rays;
O'er heaven and earth, far as the ranging eye
Can sweep, a dazzling deluge reigns; and all
From pole to pole, is undistinguishable blaze.

JULY.

Loud is the Summer's busy song,
 The smallest breeze can find a tongue,
 While insects of each tiny size
 Grow teasing with their melodies,
 Till noon burns with its blistering breath
 Around, and day dies still as death.
 The busy noise of man and brute
 Is on a sudden lost and mute;
 Even the brook that leaps along
 Seems weary of its bubbling song,
 And so soft its waters creep,
 Tired silence sinks in sounder sleep;
 The cricket on its bank is dumb,
 The very flies forget to hum;
 And, save the wagon rocking round,
 The landscape sleeps without a sound.
 The breeze is stopp'd, the lazy bough
 Hath not a leaf that dances now;
 The taller grass upon the hill,
 And spiders' threads are standing still;
 The feathers dropp'd from moorhen's wing,
 Which to the water's surface cling,
 Are steadfast, and as heavy seem,
 As stones beneath them in the stream;
 Hawkweed and groundsel's fanning down
 Unruffled keep their seedy crowns;
 And in the oven-heated air,
 Not one light thing is floating there,
 Save that to the earnest eye,
 The restless heat seems twittering by,
 Noon swoons beneath the heat it made,
 And flowers e'en within the shade,
 Until the sun slopes in the west
 Like weary traveller, glad to rest,
 On pillow'd clouds of many hues:
 Then Nature's voice its joy renews,
 And chequered field and grassy plain
 Hum with their summer songs again,
 A requiem to the day's decline,
 Whose setting sunbeams coolly shine,
 As welcome to day's feeble powers,
 As falling dews to thirsty flowers.

Flippant.

From the school-boy, whose proud-
 est achievement is the knowledge of
 the latest slang, to the mature man of
 business, flippant conversation is the
 order of the day. How hard it is to
 engage anybody in a sober and earn-
 est conversation. People like to talk
 well enough, and will talk without
 ceasing on the most trifling subjects.
 They are ready to gossip, to entertain
 each other with the small talk of so-
 ciety, but it is rare in comparison

that we sit down with one who seems
 to delight in conversation of a high
 kind. The mass of people do not
 even think seriously. It is too much
 trouble. The everyday occurrences
 of life are sufficient for them. They
 do not want to be burdened with
 opinions which are only formed as
 the result of thought, and which may
 compel them to some positive actions
 or to sacrifice. They would get their
 views as they get their dinners, where
 they can be had the easiest, and take
 their creeds as they buy their clothes,
 "ready-made," and as easy put on.
 In politics, they go in for a party; in
 religion, with a sect; to which they
 give up their own independent think-
 ing, content to have it done for them.

About Plants.

It is a good thing that plants are
 no longer considered unhealthy in
 sleeping or sitting-rooms. They have
 no hygienic benefit, but they certainly
 make a pleasant impression upon
 the mind. Flowers in the room, to
 all to whom they give pleasure, are
 one of the enjoyments of life, like
 condiments in food, and it is certainly
 one of the most harmless and refined.
 We cannot live on pleasure
 alone; but to those who have some-
 thing to put up with in life, their be-
 loved flowers perform good service.

It is far better to have the respect
 of the community, without its special
 favor, than to have all the world
 pleased with us to-day for some other
 reason than that we are worthy the
 confidence of all. Leave popularity
 to the politicians. Let us strive to
 deserve respect for our real charac-
 ters, and we shall doubtless have all
 that we deserve.

RATES OF POSTAGE

In Canada, and also Between Canada and Great Britain, British Colonies and Foreign Countries.

	Canada and U.S.	Newfoundland
Letters, for every half ounce.....	3c.	6c.
Post Cards—(Postal Union, 2 cts. each).....	1c.	1c.

weight for Newspapers and printed matter is 4 lbs ; for Books 4 lbs. 6 ozs.,
(with England 5 lbs.), and the size of the packets 24x12 inches.

Crowned with the sickle and the wheat sheaf;
While autumn nodding o'er the yellow plain,
Comes jovial on; the Doric reed once more
Well pleased, I tune.

Summer Storms.

The blue lightning flashes,
The rapid hail clashes,
The white waves are tumbling,
And in one baffled roar,
Like the toothless sea mumbling,
A rock-bristled shore,
The thunder is rumbling
And crashing and crumbling—
Will silence return evermore?

Hush! Still as death,
The tempest holds his breath
As from a sudden will;
The rain stops short, but from the caves
You see it drop, and hear it from the leaves,
All is so bodily still;
Again, now, now, again
Flashes the rain in heavy gout,
The crinkled lightning
Seems ever brightening,
And loud and long
Again the thunder shouts
His battle-song,—
One quivering flash,
One wildering crash,
Followed by silence dead and dull,
As if the cloud let go
Leapt bodily below
To whelm the earth in one mad overthrow,
And then a total lull.

The Muster of the Weeds.

The farmer fights an annual pitched battle with his persevering enemies, the weeds. As the summer comes on, and the earth is warm and fruitful, the rank leaves of the dock will shoot up. It will take possession of the land along the pasture fences, and ere long the colts and cattle will bear witness to its presence in matted manes, tails, and foretops. In the same pasture always appears the gray flannel-coated mul'lein. It advances its long lances slowly, and unless vigorously attacked, the late autumn will see the pasture lot possessed by this rearguard of the great force, standing on its arms all winter thro' ice, and snow, and tempest, ready for

the next campaign. With the growing grass of the meadow will grow the ox-eye daisy, unnoticed at first, then dotting the field with its pretty blossoms. It is a subtle, sentimental enemy, celebrated in story, but an enemy for all that; not seldom taking possession of wide acres, driving out clover and timothy, and only vanquished by an early burial beneath the plowshare. It is often reinforced by the wild parsnip and mustard. The white blossoms of the one and the yellow flowers of the other add variety to the landscape, but they bring despair to the farmer. And when they are beaten back, then advances the sorrel, loved by all children when it is young and tender, but when it shows its red flag above the green, the farmer knows the meadow is doomed. And thus the battle goes on, some cohort of the enemy constantly choosing its favorite point of attack and occupying every foot of undisputed territory. Among the wheat and oats lurks the wild buckwheat; the pigweed and the Canada thistle seek to strangle the stalks of young corn. Smartweed and chickweed, quitch grass and St. Johnswort, darnel and yarrow, chickory and live-forever, wild carrot and wild radish, elecampane and henbane, all rush to the fray. He must indeed be a vigilant farmer who gets the upper hand of the weeds.

Moderate activity is best for every healthy person in hot weather. The man who lounges about and thinks of nothing but the heat, suffers more than anybody else.

P. G. Bartlett, Beechwood Nov 17 1881

S. for Manitoba and British Columbia do not require certified Consular Invoice.

Stamp Duties.

On every promissory Note, Draft, or Bill of Exchange, not less than \$25, 1 cent; over \$25, to \$50, 2 cents; over \$50 to \$100, 3 cents: On every promissory Note, Draft or Bill, for the first \$100, 3 cents; for every additional \$100, or fraction of a \$100, 3 cents.

The stamps, after being affixed, must be cancelled by the maker, writing his initials on the date at which the stamps are affixed, or both, upon the face of such stamps; and if the stamps do not bear the same date as the date of the note or bill, the stamps will be of no avail. Where no stamps have been affixed at the time of making the note or bill, double the value of the stamps originally required must be affixed by the maker or the party into whose possession the same shall first come.

Legal or Statutory Holidays.

New Years Day,
Queen's Birthday,
Gov't Thanksgiving Day,

Good Friday,
Dominion Day,
Christmas Day.

For Notes or Bills falling due on the above days are not payable until the days following.

Goods or Chattels Exempt from Execution.

1st. The bed, bedding and bedsteads in ordinary use by the debtor and his family.

2d. The necessary and ordinary wearing apparel of debtor and his family.

3d. One stove and pipes, and one crane and its appendages, and one pair of andirons, one set of cooking utensils, one pair tongs and shovel, one table, six chairs, six knives, six forks, six plates, six tea cups, six saucers, one sugar basin, one milk jug, one tea pot, six spoons, all spinning-wheels and weaving looms in domestic use, and 10 volumes of books, one axe, one saw, one gun, six traps, and such fishing nets and seines as are in common use.

4th. All necessary fuel, meat, fish, flour and vegetables actually provided for family use, and not more than sufficient for the ordinary consumption of the debtor and his family for thirty days, and not exceeding in value the sum of \$40.

5th. One cow, four sheep, two hogs, and food therefor for thirty days.

6th. Tools and implements of, or chattels ordinarily used in the debtor's occupation, to the value of \$60.

7th. Articles in secs. 3, 4, 5 and 6 are not exempt from seizure in satisfaction of a debt contracted for such identical article.

The debtor may select out of any larger number the several articles exempt from seizure under the act.

Bees are also exempt, save in section 7. Absconders' goods (goods of absconders) are not exempt.

Business Law.

A receipt is not conclusive evidence of payment, but it throws the burden of proof upon him who attempts to impeach it.

The words "value received" are not legally necessary in a promissory note, but should be always inserted, so as to express a consideration for the promise.

A note drawn on Sunday is not void, but the law will not aid in its collection.

If a note be lost or stolen, it does not release the maker; he must pay it.

A note obtained by fraud, or from a person in a state of intoxication with intent to defraud, cannot be collected.

A consideration must be given for a note to make it valid, as between maker and payee, but an innocent (one ignorant of the facts) purchaser may recover the amount from either of them.

A note falling due on a Sunday or a legal holiday, is not payable until the day following.

Notes bear interest only when so stated, and then only legal interest until paid. But any interest may be collected if so stated.

A note made by a minor is void.

An indorser of a note is exempt from liability if not served with a notice of its dishonor.

Signatures made with a led pencil are good in law.

Trade orders (a form of draft used by tradesmen) should be presented by the payee within a reasonable time, otherwise the drawer will be relieved from liability if the order cannot be recovered of the drawee.

Each individual of a firm is liable for the whole amount of the debts of the firm.

The acts of one partner binds all the others when done in pursuance of the business of the firm, but one partner cannot bind his co-partner by an instrument under seal, unless he is authorized by an instrument under seal to do so.

Any one who permits his name to be used in a firm, or who shares in the profits of the business, is liable to the public as a partner. Principals are responsible for their agents.

A minor, idiot or lunatic cannot convey lands unless with the sanction of the Court of Chancery; conveyances otherwise made are void.

An idiot or a person of unsound mind cannot make a will.

A will made under fear of bodily injury is void. A gift made by will to an attesting witness thereof, or to the husband or wife of the witness, is void. A will should be signed by the witnesses in the presence of each other, and the testator.

Ignorance of the law excuses no one.

The law compels no one to do impossibilities.

It is a fraud to conceal a fraud.

An agreement without consideration is void.

FISH AND GAME LAWS.

CLOSE SEASON—ONTARIO.

White-fish....., 10th Nov. to 1 Dec'r
 Salmon & lake trout " "
 Speckled & B. trout 15 Sep. to 1 May
 Bass..... 15 May to 15 June

 Woodcock..... " 1 Aug.
 Mallard, grey duck.. " 15 Aug.
 Black duck, wood do. " "
 Other " swans, geese. 1 May to "

Eggs of the birds above mentioned shall not be taken or destroyed.

Fishing without licenses prohibited. Indians are subject to the game and fish laws. No person must buy, sell, or have in possession, fish or game in the prohibited time. Game cannot be sold beyond 20 days after prescribed time. Deer cannot be killed at any time for the purpose of exportation. Traps or snares shall not be employed in taking any birds at any time, nor shall batteries, swivel guns, sunken punts or night lights be used in taking game water-fowl at any time. Breach of these laws, fines from \$5 to \$50 with costs—the full fines to be paid the informer.

It is not lawful to catch or kill any of the above-named fish by means of spears, grapple hook, negog or Nishigans at any time

No one shall fish for, catch, kill, buy, sell or possess the young of any fish above-named.

Fishing by means of nets or other apparatus is prohibited without Gov't license.

BANKING AND EQUATION TABLE.

Showing the number of days from any date in one month to the same date in any other month. EXAMPLE: How many days from the 2nd day of February to the 2nd of August? Look for February at the left hand, and August at the top—in the angle is 181. In Leap year, add one day if February be included.

Hence from the busy, joy-resounding fields,
in cheerful error let us tread the maze
Of Autumn unconfined; and taste revived,
The breath of orchard big with bending fruit.

BLenheim FOUNDRY**HALL BROS., - PROP'R'S.**

Manufacturers of all kinds of Agricultural Implements, viz :
Plows, Harrows, Land Rollers, Bean Planters,
Cultivators, &c., &c.

We manufacture Plows of eight styles, all of which are warranted to do good work, scour in any soil, run lighter than any Plow in use, run steady, be easy handled or adjusted, not choke nor corrode, work well in dry hard land, give good general satisfaction wherever used, and are universally acknowledged to be the most perfect Plows for all kinds and conditions of soil, in the market. We guarantee our Harrows to perform work such as no other Harrows of Canadian or American make can attempt. No expense has been spared to make our LAND ROLLERS second to none in the market. The fact is they have been used and acknowledged by the most intelligent and practical farmers in the Dominion for the last ten years, and to-day stand number one in the market. We use nothing but the very best material in the construction of all the above implements, and spare no pains to make each Roller more perfect than the other. We manufacture ONE and TWO HORSE CULTIVATORS, and have endeavored in this line, as in all others, to meet the wants of the farming community by introducing many new and valuable improvements, and by manufacturing none but First-class Machines. We are makers of the celebrated CUMMINGS' PATENT TWO-HORSE BEAN PLANTER, and in the construction of this machine we have given our personal attention to the requirements of our many customers, by making recent improvements in principle, material and mode of construction. We would caution the public to beware of imitations, as we are the only firm in Canada who have the exclusive right to manufacture this machine. During the time that we have been engaged in manufacturing implements we have kept up to the times by marching forward in van of progress. Our aim has been Perfection; our Motto has been simplicity, durability and reliability. Farmers, see our Implements before giving your orders to any one. It will be for your own interest so to do.

Dirge of Summer.

All in the arms of autumn lying,
Fading flowers round her sighing,
Summer sick and sad is dying.

Now no more shall she be seen,
In the evening's deep serene,
Weaving garlands white and green!

Fold her in a winding-sheet,
Woven all of blossoms meet
For the shroud of maiden sweet.

Crimson rose and lily white—
All she had of best and bright,
Long have vanished from the light!

Gather autumn's palest flowers,
Damp with Autumn's softest showers—
Bring them to her leafless bowers.

Then through Winter's icy gloom,
She shall rest as in a tomb—
Sheeted snow shall shroud her bloom—

Shroud her bloom, but not forever;
Mortals die, but seasons never.
When the chains of Winter sever,

Spring shall wake her up again,
Lead her forth to hill and plain,
Over willing hearts to reign.

Rules for the Preservation of Health.

Pure atmospheric air is composed of nitrogen, oxygen and a very small proportion of carbonic acid gas. Air once breathed has lost the chief part of its oxygen, and acquired a proportionate increase of carbonic acid gas. The solid parts of our bodies are continually wasting, and require to be repaired by fresh substance; therefore, food, which is to repair the loss, should be taken with due regard to the exercise and waste of the body. The fluid parts of our bodies also waste constantly; there is but one fluid in animals, which is water, and the fluid of our bodies is to the solid in proportion as nine to one. Light exercises an important influence upon the growth and vigor of animals and plants, consequently our dwellings should freely admit the solar rays.

Decomposing animal and vegetable substances yield various noxious gases, which enter the lungs and corrupt the blood.

Warmth is essential to all the bodily functions; exercise warms, invigorates and purifies the body; clothing preserves the warmth the body generates; fire imparts warmth externally and consumes the oxygen of the air, but produces noxious gases. For that reason the air is less pure in the presence of candles, gas, or coal fire than otherwise, and the deterioration should be repaired by increased ventilation.

The skin is a highly organized membrane, full of minute pores, cells, blood-vessels and nerves; it imbibes moisture or throws it off according to the state of the atmosphere and the temperature of the body. It also breathes, as do the lungs, though less actively. All the internal organs sympathize with the skin, therefore it should be repeatedly cleansed. Late hours and anxious pursuits exhaust the nervous system and produce disease and premature death, while mental and bodily exercise are equally essential to the general health and happiness. Man will live most healthily upon simple solids and fluids, of which a sufficient but moderate quantity should be taken. Sudden alterations of heat and cold are dangerous—especially to the young and aged.

Moderation in eating and drinking, short hours of labor and study, regularity in exercise, recreation and rest, cleanliness, equanimity of temper and equality of temperature, these are the great essentials to that which surpasses all wealth—health of mind and body.

A Mormon Romance--Reginald Gloverson,

"ARTEMUS WARD."

The morning on which Reginald Gloverson was to leave Great Salt Lake City with a mule train, dawned beautifully.

Reginald Gloverson was a young and thrifty Mormon, with an interesting family of twenty young and handsome wives. His unions had never been blessed with children. As often as once a year he used to go to Omaha, in Nebraska, with a mule train for goods; but, although he had performed the rather perilous journey many times with entire safety, his heart was strangely sad on this particular morning, and filled with gloomy forebodings.

The time for his departure had arrived. The high-spirited mules were at the door, impatiently champng their bits. The Mormon stood sadly among his weeping wives.

"Dearest ones," he said, "I am singularly sad at heart this morning; but do not let this depress you. The journey is a perilous one but—pshaw! I have always come back safely heretofore, and why should I fear? Besides, I know that every night, as I lay down on the broad starlit prairie, your bright faces will come to me in my dreams, and make my slumbers sweet and gentle. You, Emily, with your mild blue eyes; and you, Henrietta, with your splendid black hair; and you, Nelly, with your hair so brightly, beautifully golden; and you, Molly, with your cheeks so downy; and you, Betsy, with your wine-red lips—far more delicious, than any wine I ever tasted—and you, Maria, with your winsome voice; and you, Susan, with your—with your—that is to say, Susan, with your—and the other thirteen of you, each so good and beautiful, will come to me in sweet dreams, will you not, Dearestists!"

"Our own," they lovingly chimed, "we will!"

"And so farewell!" cried Reginald. "Come to my arms, my own!" he said; "that is, as many of you as can do it conveniently at once, for I must away."

He folded several of them to his throbbing breast, and drove sadly away.

But he had not gone far when the trace of the off-hind mule became unhitched. Dismounting, he essayed to adjust the trace; but ere he had fairly commenced the task, the mule, a singular refractory animal, snorted wildly, and kicked Reginald frightfully in the stomach. He arose with difficulty, and tottered feebly towards his mother's house, which was near by, falling dead in her yard with the remark, "Dear mother, I've come home to die!"

"So I see," she said; "where's the mules?"

Alas! Reginald Gloverson could give no answer.

In vain the heart-stricken mother threw herself upon his inanimate form crying, "Oh, my son—my son! only tell me where the mules are, and then you may die if you want to."

In vain—in vain—Reginald had passed on.

The mules were never found.

Reginald's heartbroken mother took the body home to her unfortunate son's widows. But before her arrival she indiscreetly sent a boy to bust the news gently to the afflicted wives, which he did by informing them, in a hoarse whisper, that their "old man had gone in."

The wives felt very badly indeed.

"He was devoted to me," sobbed Emily.

"And to me," said Maria.

"Yes," said Emily, "he thought considerably of you, but not so much as he did of me."

"I say he did!"

"And I say he didn't."

"He did!"

"He didn't!"

"Don't look at me, with your squint eyes!"

"Don't shake your red head at me!"

"Sisters," said the black-haired Henrietta, "cease this unseemly wrangling—I, as his first wife, shall strew flowers on his grave."

"No, you won't," said Susan. "I, as his last wife, shall strew flowers on his grave. It's my business to strew!"

"You shan't, so there!" said Henrietta.

"You bet I will," said Susan, with a tear-suffused cheek.

"Well, as for me," said the practical Betsy, "I aint on the strew, much; but I shall ride at the head of the funeral procession."

"Not if I've been introduced to myself you won't," said the golden-haired Nelly; that's my position. You bet your bonnet strings it is."

"Children," said Reginald's mother, "you must do some crying, you know, on the day of the funeral; and how many pocket-handkerchiefs will it take to go round! Betsy, you and Nelly ought to make one do between you."

"I'll tear her eyes out if she perpetuates a sob on my handkercher."

"Dear daughters-in-law," said Reginald's mother, "how unseemly is this anger. Mules is five hundred dollars a span, and every identical mule my poor boy had, has been gobbled up by the red man. I knew when my Reginald staggered into the dooryard he was on the die; but if I only thunk to ask him about them mules ere his gentle spirit took flight, it would have been four thousand dollars in our pockets, and no mistake! Excuse those real tears, but you've never felt a parent's feelin's."

"It's an oversight," sobbed Maria. "Don't blame us."

The funeral passed off in a very pleasant manner, nothing occurring to mar the harmony of the occasion. By a happy thought of Reginald's mother, the wives walked to the grave twenty abreast, which rendered that part of the ceremony thoroughly impartial.

That night the twenty wives, with heavy hearts, sought their twenty respective couches. But no Reginald occupied those twenty respective couches—Reginald would never more linger in blissful repose in those twenty respective couches,—Reginald's head would never more press the twenty respective pillows of those twenty respective couches—never, never, never, more!

In another house not many leagues from the house of mourning, a grey-haired woman was weeping passionately. "He died," she cried, "he died without sigerfyin', in any respect where them mules went to."

Two years are supposed to elapse between the third and fourth chapters of this original American romance.

A manly Mormon, one evening, as the sun was preparing to set among a select apartment of gold and crimson clouds in the western horizon—although for that matter the sun has a right to "set" where it wants to, and

so, I may add, has a hen—a manly Mormon, I say, tapped gently at the door of the mansion of the late Reginald Gloverson.

The door was opened by Mr. Susan Gloverson.

“Is this the house of the widow Gloverson?” the Mormon asked.

“It is,” said Susan

“And how many is there of she?” he inquired

“There is about twenty of her, including me,” courteously returned the fair Susan.

“Can I see her?”

“You can.”

“Madam,” he softly said, addressing the twenty disconsolate widows, “I have seen part of you before! And although I have already twenty-five wives, whom I respect and care for, I can truly say that I never felt love's holy thrill till I saw thee! Be mine, be mine!” he enthusiastically cried; “and we will show the world a striking illustration of the beauty and truth of the noble lines, only a good deal more so—

“Twenty-one souls with a single thought,
Twenty-one hearts that beat as one”

They were united, they were!

Gentle reader, does not the moral of this romance show that—does it not, in fact, show that however many there may be of a young widow woman; or, rather, does it not show that, whatever number of persons one woman may consist of—well, never mind what it shows. Only this writing Mormon romances is confusing to the intellect. You try it and see.

"And now the mounting sun dispels the fog;
The rigid hoar-frost melts before his beam;
And hung on every spray, on every blade
Of grass, the myriad dew drops twinkle round."

Moon's Phases.

Also General Agent for the "WHITE" (Cleveland, U.S.) Sewing Machines.

Please call and examine our Goods before buying elsewhere.

WAREHOUSE:—William Street,

CHATHAM

OCTOBER.

Autumn Time.

- I sing the mellowed autumn time;
The sunset pears, the scarlet haws, the yellow
sheaves of autumn time.
- The fading, falling autumn time;
The rustling leaves, the saddened winds, the
pallid mists of autumn time.
- The scented, fragrant autumn time;
The clover balls, the moorland heath, the fresh-
plowed earth of autumn time.
- The sober, tranquil autumn time;
The chastened noons, the steadfast stars, the
purple glooms of autumn time.
- The sweet, soft sounds of autumn time;
The twittering birds, the bleating flocks, the
plaining streams of autumn time.
- The resting, patient autumn time;
The close-reaped fields, the dew-drenched grass,
the low-streaked skies of autumn time.
- The grand, prophetic autumn time;
For ripened hearts and sweetened souls called
home to God at autumn time.

Autumn.

- No sound but the beech-nuts falling
Through the green and the yellow leaves.
And the rainy west wind calling
The swallows from the eaves.
No fading trees are shedding
Their golden splendor yet;
But a sunset gleam is spreading,
That seems like a regret.
- And the crimson-breasted birdie
Sings his sweet funeral hymn
On the oak-tree grim and sturdy,
In the twilight gathering din:
Death comes to pomp and glory
They fade—the sunny hours;
And races old in story
Pass like the summer flowers.

Think of the Boys.

I wonder how many mothers are as careful of their boys as they are of their girls? It seems to be a general belief that boys can take care of themselves. But they cannot, for they are early exposed to temptation. Girls are generally at home, in their

mother's company. But the boys, when are they at home as an average, except in the morning before school, at the dinner hour, and at supper? In the average family, in town or village, the boy is away all day, except when he eats. How much time there is at noon and after school for Satan to find mischief for that boy's idle hands. How many an evil scheme can be patched up in a few moments. Some days the boy is noticeably absent from home, and anxious inquiry is for the moment made; but business soon takes the father's mind and time, while housework or company absorbs the mother's attention; and the little boy with so much time away from home, and so little at home, is getting wound up in some wicked older boy's scheme; and by-and-by the shame of it is revealed. Is it a wonder then so many boys wind up in an "institution"? I exhort mothers to give up their parties and company and excess of care about the house, and even more important things, if such sacrifice be necessary, in order that the boys be properly cared for; and they begin, before it is everlastingly too late, to take them into the closest companionship, sharing all their interests as cordially as they do those of the girls. The girls need not suffer thereby; rather will they be blessed with the presence of noble brothers in the home, whose later career may be a part of their own pride and joy.

—Small thumbs denote affectionate disposition; long thumbs go with long heads: short, thick, stumpy thumbs mark a cruel man.

AND ALMANAC FOR 1881.

ELEVENTH
MONTH

NOVEMBER

30
DAYS.

The melancholy days are come, the saddest of the year,
Of wailing winds and naked woods and meadows brown
and sore;
Heaped in the hollows of the grove the autumn leaves
lie dead,
They rustle to the eddying gust, and to the rabbit's tread.

Toilet Soaps, Perfumery, Shoulder Braces Trusses, Sponges, and all kinds of Druggists' Sundries usually kept in a First-class Drug Store.

Hallo! Jack Frost!

Hallo! Jack Frost!
I thought you were lost,
You are such a terrible rover,
Or else, frozen fast
To the North Pole at last,
You'd stay till the winter was over.

But here you are now,
With your frosty old paw,
And soon will the breezes mellow
Ring sharp and clear,
And shouts of cheer
Will welcome you back, old fellow.

My mittens and cap,
My skates and strap,
And sled, are ever so handy,
Just waiting for you
And your frosty crew,
My beautiful Jack-a-dandy!

And soon we'll go
Over ice and snow;
And soon will the sleigh-bells' ringing
Join in the song
Of the merry throng
Of boys and girls who are singing.

Hallo! Jack Frost,
We thought you were lost;
We were really troubled about you,
And feared, it is true,
We should have to do
The whole winter long without you.

What is a Cold Bath?

The season of the year, says the *Lancet*, when very many people who have experienced pleasure and advantage from a daily cold bath have to discontinue the practice so soon as winter and cold weather, is come. Months will elapse before the return of genial weather will allow of their indulgence in what may be termed man's natural stimulant. Among the young and robust there are a large number who are able to bathe even in the depths of winter; the advantage of so doing is, however, questionable. But let it be once well understood

what a cold bath really is, and the course by which we can avoid Scylla and Charybdis will be obvious. A cold bath is not necessarily a bath in water of the temperature of the atmosphere. A bath is truly and really cold when it produces a certain physiological effect—a slight momentary shock followed by pleasant and lasting reaction. These effects are, for the majority of people, most pleasantly obtained by bathing in water about 35 degrees to 40 degrees below the temperature of the body—the usual temperature of unheated water in June and July. Bearing this in mind, we can enjoy our physiological 'cold' bath as safely and as pleasantly at Christmas as at midsummer, and there is no necessity for the most timid or weakly to discontinue his morning tub because the summer weather is over. When the water sinks below a temperature of 60 deg., let it be heated to that point, and then used, and we shall still have our cold bath, though of heated water. The daily stimulant effect of such a bath is so beneficial to the great majority of persons, and is of such marked service in maintaining health, that it is very important to have it widely known that a cold bath may be taken all the year round, provided cold is not mistaken to mean "at the temperature of the outer air." To heat our bath during the winter months is often thought to be unmanly, while in reality it is truly scientific; and to bathe in unheated water all the year round, whatever the temperature of that water may be, is to prove oneself an ignorant slave of outward circumstances.

Law of Weights and Measures.

The provisions of the present law as to the weight of a bushel of the un-dermentioned articles, namely:—Wheat, Indian corn, rye, peas, barley, oats, beans, clover seed, timothy seed, buckwheat, flax seed, hemp seed, blue grass seed, castor beans, potatoes, turnips, carrots, parsnips, beets, on-ions, salt, dried apples, dried peaches and malt, when bought or sold by weight, is specified by cental and parts of a cental or 100 lbs.

Table of Standard Weights of Grain, Seeds, &c., per Bushel.

Pounds.	Pounds.	Pounds.
Wheat.....60	Clover seed.....60	Nurnip seed.....50

RULE to Estimate the Weight of Cattle by Measurement.

Measure with a tape line from the top of the shoulder to the tail head, and mark this for length; then measure the girt immediately behind the shoulder, and mark this for the girt. Multiply the girt by itself in inches, and divide the product by the length in inches. Divide the product by 7.344, and the quotient is the weight in imperial stones, which to reduce to pounds, multiply by eight. If the animal is very fat add 1-20th, if lean, deduct 1-20th; the skin will weigh, 1-16th; the tallow, 1-12th. No rule can be regarded as absolutely correct. Formation of animal, breed, fattening condition will alter cases.

ANOTHER WAY.—Multiply half the girt by itself in feet, and the same by the length in feet, and the product will be the net weight in stones of eight lbs. each.

RULE to Measure Grain in a Bin or Box.

Multiply the length by the width, and the product by the height, all in inches; divide by 2150 (the capacity in cubic inches of the Winchester bushel, the Eng. being 2218.2), and the product will give the number of bushels in the bin. The grain should be spread level.

RULE to Measure Corn in a Crib.

Measure the width, depth and length, and multiply as with grain bin, in inches; divide the product by 4.300, and the quotient will be the number of bushels. Where the crib is wider at the top than the bottom, measure for width at such a height as will give you true width.

RULE to Measure Roots in a Pit or Root House.

Ascertain the cubic dimensions in inches as in preceding rules for grain, making allowance for the slope of the ridge by measuring only half the height or so much of it as would be required to level the top and have a solid cubic heap. A space which would hold 20 bushels of corn in the ear, would hold thirty of roots and forty of grain.

RULE to Measure Hay in the Stack or Mow.

If it be a square or oblong stack with a pitched roof, measure the height in feet from the bottom to the eaves; add to this half the height from the eaves to the ridge, and altogether this will give the real and total height. Multiply the total height by the breadth, and both by the length. Divide the product by 27 and the quotient will be the number of cubic yards in the stack. Multiply the number of cubic yards by the weight in lbs. of a single cubic yard, which will be pretty correct—to say 80 lbs. for a new stack, 100 lbs. for one a few months old, and 112 lbs. for one a year old—and the product will be the contents of the stack in lbs.; divide this by 2,000, the number of lbs. in a ton, and the quotient will give the number of tons. To find the weight of hay in a round stack, find the height to the eaves and add one-third of the measurement from the eaves to the top, which will give the true height. Measure the girth, multiply it by itself and the product by the decimal, .0795; this will give the area of the base. Multiply the area by the true height, and the product will be the contents of the stack in cubic feet; divide by 27 to complete, as with square stacks.

To estimate contents of mows, where the top is level, the process is the same as with the square stack, omitting the allowance for the sloping roof.

TWELFTH
MONTH

DECEMBER

31
DAYS.

With his ice and snow and rime
Let bleak winter sternly come!
Their is not a summer clime
Than the love-lit winter home.

A Winter Evening.

And now dense snow-flakes blind
The day and smother earth in cruel glee:
Whiteness now grows space.—Nature, farewell.
Sleep thy long spell-bound slumber! I will hie
Me home with haste, and by the hearth will tell
Alraachid's nightly wand'rings to my boys,
Or pensive start at Hector's battle-cry:
Most prize we now sweet fancy's simple joys.

Winter Song.

Rouse the blazing midnight fire;
Heap the crackling fagots higher;
Stern December reigns without,
With old Winter's blust'ring rout.

Let the jocund timbrels sound,
Push the jolly goblet round;
Gare avaunt, with all thy crew,
Goblin's dire, and devils blue.

Hark! without the tempest growls,
And the affrighted watch-dog howls:
Witches on their broomsticks sail,
Death upon the whistling gale.

Heap the crackling fagots higher,
Draw your easy chairs still higher;
And to guard from wizards hoar,
Nail the horse-shoe on the door.

Now repeat the freezing story,
Of the murder'd traveller gory,
Found beneath the yew-tree scar,
Cut his throat from ear to ear.

Tell, too, how his ghost, all bloody,
Frighten'd once a neighb'ring goody;
And how, still at twelve he stalks,
Groaning o'er the wild-wood walks.

The Little Faces.

Suppose the irregular proession of
children schoolward bound, which one
meets on the streets, all wore "shin-
ing morning faces," what a bright and
happy throng it would be. But some

little ones we meet with traces of
tears in their faces, and grief looking
out untimely from the childish eyes
whose birthright is merriment. Hap-
less, defrauded ones, who go from im-
patient, fretful homes to the tasks of
of the school-room; whose mothers
forget that a cupful is as full as a
brimming bucket, and that childish
sorrows or disappointments are not
small to those who have them to bear.
How poorly those parents discharge
their duties who send out their child-
ren for the day, unhappy. Could
they know for one hour the desolation
of the homes from which the children
have gone forth for the last time, by
reason of the epidemics that have
wrought such havoc in many neigh-
borhoods this year, how patient, how
watchful, how tender they would be.
"It is never our tenderness that we
regret," says George Eliot, in speak-
ing of those who are gone beyond our
loving or our chiding. No, and it is
not our patience that comes back to
mingle the bitterness of unavailing
regrets with our sorrow. Homes
photograph themselves on the faces of
their inmates; and a piteous picture
is that limned on the sensitive sur-
face of many an unhappy little coun-
tenance that lingers behind its more
fortunate mates. Is it your fault,
sister or mother?

Christmas Bells.

Hark to the Christmas Bells !
 What doth their music say?
 Forth on the air it swells
 This happy Christmas Day.

May joy thy spirit fill,
 All care and sorrow cease—
 Thus they ring forth "Goodwill
 And on Earth Peace."

A CHRISTMAS LETTER.

WHICH?

"Which shall it be, which shall it be?"
 I looked at John—John looked at me.
 (Dear patient John who loves me yet
 As well as though my locks were jet ;)
 And when I found that I must speak,
 My voice seemed strangely low and weak :
 "Tell me again what Robert said,"
 And then I listening bent my head.
 "This is his letter :

"I will give
 A house and land while you shall live,
 If, in return, from out your seven
 One child to me for aye is given."
 I looked at John's old garments worn,
 I thought of all that John had borne
 Of poverty, and work and care,
 Which I, though willing, could not share ;
 I thought of seven mouths to feed,
 Of seven little children's need,
 And then of this.

"Come, John," said I,
 "We'll choose among them as they lie
 Asleep ;" so walking hand in hand,
 Dear John and I surveyed our band ;
 First to the cradle lightly stepped,
 Where Lillian, the baby, slept,
 A glory 'gainst the pillow white ;
 Softly the father stooped to lay
 His rough hand in a loving way,
 When dream or whisper made her stir,
 And huskily he said, "Not her—not her."

We stooped beside the trundle bed,
 And one long ray of lamplight shed
 Athwart the boyish faces there,
 In sleep so pitiful and fair.
 I saw on Jamal's rough, red cheek

A tear undried. Ere John could speak,
 "He's but a baby yet," said I,
 And kissed him as we hurried by.

Pale, patient Robbie's angel face
 Still in his sleep bore suffering's trace ;
 "No, for a thousand crowns, not him,"
 He whispered, while our eyes were dim.

Poor Dick, bad Dick, our wayward son,
 Turbulent, restless, idle one—
 Could he be spared? "Nay, He who gave
 Bid us befriend him to the grave :
 Only a mother's heart can be
 Patient enough for such as he.
 And so," said John, "I would not dare
 To send him from her bedside prayer."

Then stole we softly up above,
 And knelt by Mary, child of love.
 'Perhaps for her 'twould better be,"
 I said to John. Quiet silently
 He lifted up a curl that lay
 Across her cheek in wilful way.
 And shook his head. "Nay, love, not thee,"
 The while my heart beat audibly.

Only one more, our eldest lad,
 Trusty and truthful, good and glad—
 So like his father. "No, John, no—
 I cannot, will not, let him go."

And so we wrote in courteous way
 We could not drive one child away ;
 And afterwards toil lighter seemed,
 Thinking of that of which we dreamed
 Happy in that not one dear face
 We missed from its accustomed place ;
 Thankful to work for all the seven,
 Trusting the rest to One in Heaven.

TO THE PUBLIC.

I have pleasure in laying before you the "Kent County Annual and Almanac for 1881. A free issue of 5000 copies has been printed and is being circulated evenly over the entire Municipal County,—a number which will be appreciated when it is stated there are but 7,560 families in the County according to the last census.

It will be continued yearly. I trust in 1882 with considerable improvement and probably with some re-arrangement as to form and more liberal illustration. The Calendars in future will be composed entirely of County and old Western District events; the issue more than doubled, part of which will extend to and cover adjoining Counties.

THE ADVERTISING PATRONS

are thanked for their liberal patronage; to them the Almanac owes its successful issue. Readers of the Almanac who may order any goods advertised therein, or may ask information, or call personally upon the Advertisers respecting them, WILL HELP THEMSELVES, THE ADVERTISERS and the future success of the Almanac by mentioning the fact to the Advertisers that they saw the Goods advertised in this Annual.

JAMES SOUTAR.

COUNTY LANDMARKS

—OR THE—

Early History of the County of Kent.

"County Landmarks" will embrace a general sketch of the early history of the County of Kent, with a selection of its most prominent and interesting points—the early surveys; the early settlements; the struggles in the bush and anecdotes illustrative of the manners and life of the settlers; reminiscences of the 1812 war, particularly the exciting events which took place along the river Thames; old landmarks and public resorts; the rise and progress of towns and villages, &c., &c.

It will embrace a complete and comprehensive record of all judicial, political, district, and other officials of the Western District from 1792 to 1850—of the same for the County of Kent from the latter date to the present time; of the members of the old District or first Municipal Council ending in 1849, and a complete list of the officers and the composition of the Councils of every Village, Town, Township and County Municipality for each and every year from the date of incorporation to the present time. Also, numerous and comprehensive statistical tables respecting population, produce, trade, courts, ~~use of~~ schools, churches, assessments, rates of taxation, prices, values, labor, &c.

It will also embrace full genealogies of the old and prominent families, covering hundreds of names, commencing with the pioneer settlers whose descent, nativity, date and place of settlement will be given, and following the marriage and other ramifications down to the present time.

It will also contain by way of an appendix much general, useful, and interesting information of a rare and instructive character, forming a ready and convenient reference agent matters not generally found in a tabulated form.

CONDITIONS.

"Land Marks" will be issued in one 8 vo. volume, printed in clear type on good book paper, and neatly bound in cloth, and will include a colored map of the County, showing lots and divisions, and a copy of the deed and a fac-simile engraving of the Indian signatures or totems thereto, surrendering a portion of the Western District, now the County of Kent. It will be sold by subscription only. price \$3, payable on delivery of the book.
