

INTRODUCING

**PERCY L. CLIMO, B. Sc.,  
M. E. I. C.,  
Registered Professional Engineer.**

A native of Cobourg, Ont., a graduate of Queen's University, with over fifteen years of engineering experience in construction work, municipal engineering, mining, pulp mill, shipyard construction, and industry.

One of my early jobs was that of foreman of survey work during the initial construction of the Trenton Airport. During depression years I engineered several sewer installations for the town of Cobourg, and superintended the construction of Cobourg's Shell Band Stand, so familiar to many C. P. R. Excursionists. I served six years in a Gold Mine of Northern Ontario. Before moving to Smiths Falls, I was employed on the Plant Engineering staff of the Toronto Shipbuilding Co.

As a hobby, I have made intensive studies into the subject of Town Planning — these studies extending back fifteen years. I have also completed a course of study in this subject, offered by the Department of Extension of the University of Toronto.

# To the Electors of **RIDEAU WARD**

LADIES and GENTLEMEN : —

I am a candidate for the 1946 council, in the Rideau Ward. I humbly ask for your support, your influence, and your vote in the coming Municipal Elections.

Smiths Falls is a progressive town. The early establishment of a town planning body; the excellent progress already made in formulating a master plan for the next twenty years; the application of informed foresight to municipal development — has given the town a start in the right direction. Much of this planning is only on paper, and before actual construction can take place, the engineer will have to apply his training and skill to many of the involved problems that are bound to arise. These same engineering problems will have to be discussed and passed on by council. It is certainly to the town's advantage to have engineers on the council board — men who can understand, discuss and explain the problems involved.

I offer to you my services. I bring to you nearly twenty years of engineering training and experience. I also come with an understanding of the complex problems involved in modern town planning and town building.

Ladies and Gentlemen, if you desire a better town in the future, if you desire progress, if you desire good engineering work performed in this OUR town, then on Monday next vote **CLIMO** for councillor in Rideau Ward, and if elected, I will do my best to serve you.

**PERCY L. CLIMO.**
