 Chas. A. Moses, the contractor of the Wheaton court house, recently put in a bid of one hundred thousand dollars for a public building at Patterson, N. J. A certified check for \$2,100 accompanied the bid. He found that in figuring a mistake of thirty thousand dollars had been made, and as those receiving the bids held him strictly to his contract, he was compelled to forfeit the check. It was cheaper to do that than to lose thirty thousand on the job.

NEW DUPAGE COUNTY MAP.
 The new DuPage county map is now completed and ready for delivery. It shows everything usually found on a county map, besides a large amount of other useful information.
 It has been critically examined by a great many people of each township who are competent to judge, and passed upon as being correct.
 It has the indorsement of all the county officers, and the board of supervisors have practically endorsed it, by ordering five copies in the new court house.
 The map shows all farms with the number of acres and names of owners, together with all section lines and numbers, wagon roads, railroads, streams, cities, villages, post-offices, cross roads, settlements, school district boundaries, and numbers, school houses, and part of the drainage canals of the Chicago Sanitary District that passes through DuPage county. The diversions of the channel of the Desplaines river that cost millions, are also shown.
 The size of the map is 46x54 inches, beautifully colored by school districts, and with a distinct band of colors around the boundaries of all the corporations.
 For use in the school rooms of the county the map is especially useful as it shows the localities in which the pupils are personally interested, and consequently references to it would attract their attention and retain it. Pupils can readily see from the map how a township is numbered, how school districts, cities and villages are bounded and what they are, which would all lead to the inquiry of why are these divisions made. This would naturally lead the teacher to explain the government of school districts, townships and counties, all of which are in the hands of people in whom the children are interested. And thus the pupils would be instructed in the rudiments of geography and government without feeling the effort usually required in the study of subjects in which they have no personal interest.
 The map has been presented for inspection to only fourteen school boards, and without a single exception, they have each ordered a copy for their school.
 The price of the map, complete, mounted on strong cloth, with rollers at top and bottom, is ten dollars. Communications addressed to Russell & Prout, Wheaton, Ill., will be promptly answered.

Losing Flesh
 You naturally lose flesh in the summer and running down is so easy. You get a little weaker each day without hardly noticing it. There is loss of appetite, headache, weakness of the muscles, disturbed sleep, weakness of memory, and these are the beginning of nervous prostration. Iron and tonics and bitters may afford some temporary relief, but what you need is a food for body, brain and nerves.
Scott's Emulsion
 of Cod-liver Oil with the Hypophosphites, furnishes just the nourishment needed for those who are run down and pale and thin and weak. If you lose flesh in summer take Scott's Emulsion now. Don't wait till fall or winter before beginning.
