JANUARY WEATHER.

Weather Prophet Hicks says the next storm period of this month extends from the 19th to the 23d, being central on the 21st. Winter lightning and thunder, especially southward, need not surprise anyone during this period, The characteristics of the Venus disturbance are first quite warm with great tendency to electrical phenomena and thunder even in winter, followed by violent and sudden change to great cold, high winds and blizzards. Protracted storms of rain, sleet, and snow will most probably visit wide sections of this and other continents, between Friday the 19th and Wednesday the 24th, being central about Saturday, Sunday and Monday.
