My Hair Was Turning Gray

"I wish to testify to the merits of Ayer's Hair Vigor. My hair was falling out and turning gray very fast. But your Hair Vigor stopped the falling of the hair and restored it to its autural color."- Mrs. E. Z. Benomme, Cohoes, N.Y. April 21, 1899.

You Look Old

It's impossible for you not to, with the color of seventy years in your hair! Perhaps you are seventy, and you like your gray hair. And perhaps

It keeps the scalp free from dandruff, stops falling of the hair, and makes it grow thick and \$1.00 a bottle. All druggists.

SMALLPOX DISTRIBUTORS.

How the Germs Are Nurtured and the Disease le Spread.

It would seem that people will never learn to be careful. The recent alarming spread of that dire epidemic, smallpox, throughout different se:tions of the country has been traced by physicians and sanitarians in many instances directly to the moldy and rotting layers of paper and paste which cover the walls of many houses. The practice of laying layer after layer of paper on a wall, using common flour paste, is especially calculated to create homes for disease germs. People could not do more to effect such & result if they tried. The rotting vegetable matter affords caves from which are ready to dart forth the infection at every opportunity. There is no excuse for this practice, as walls and ceilings can be coated with a pure, cleanly and sanitary material like Alahastine, for instance, at no greater expense. Alabastine is a rock-base cement, which incorporates itself with the walt or ceiting. It is easily applied, comes ready to mix with cold water, requires no washing or scraping before renewing or retinting, is beautiful, long-lasting and safe.

For walls that have been infected, nothing is equal to Alabastine as disinfectant to render them pure and clean and the rooms once more habitable.

Schoolteacher's Conscience.

A public schoolteacher returned \$36 conscience money to Clerk Legner and it was accepted by the school management committee. The teacher stated that she had received the money while acting as a cadet in the schools in 1894. She was two months under the age limit of 18 years when her assignment to a position was made. She considers that she practiced deception by saying she was two months older than she really was. After teaching five years she returned the money which she had received in the two months she taught under 18 years.-Chicago Tribune.

Vegetarian Bedding.

Sir Isaac Pitman invented the "vegetarian bed," composed, not of feathers. but of mosses, ferns, flowers and hay. This bedding material, commended as healthy and health-giving by many doctors and others, has become famous in vegetarian circles, and deserves to be more widely known. "It smells like ozone," is the testimony of more than one physician, and many say that sleeping upon it "gives rest to brain and mind."
