County.

For Coroner Newton E. Matter For Surveyor Geo. W. Wilson

There are nine presidential tickets now in the field. Several of the candidates are understood to be running because they have no other means of obtaining exercise. Eight of them will be "also rans."

If Mr. Hearst, with his Chicago Amerpera that have been driven out of the democratic party by the Chicago platform, he will be a very busy young man.

The electric light department is experi encing considerable difficulty in wires grounding on the numerous trees on the village streets. Another argument in fawer of the general trimming of trees.

strewn with the branches cut from the property owners should take sufficient pride in the appearance of their environs to clean up this debria.

village board are to be commended on few correspondents say the fields were very building a permanent stone arch bridge weedy. Pastures are generally good, but on Ourtiss street instead of again experi- in some places min is needed. Potatoes menting with a wooden structure whose and gardens continue to do well, but in a life is only a few years at best.

Colonel Charles P. Bryan, minister to Brazil, in a recent letter to Hon. Guy L. Bush, referred feelingly to the resolution indursed in the DuPage county repubconvention, which, he wrote, *touched him more deeply than any distimetion that could have been conferred by rulers." He wishes, he says, to warmly thank the republicans of DuPage county for the generous remembrance of one who will mover cease to be grateful for such kindness, and never, whether at home or abroad, flag in endeavors to serve the party and people whom he is so proud to

Ageneral complaint is made that the rates charged for commercial electric lightdog are too high on the meter hasis, cape cially, in view of the fact that light is not farniabed all night. A general demand is made that a flat rate he established per mitting a larger number of lights than is at present allowed on the flat-rate beais. It is made to assume that the board is desizems of securing the largest number of takers possible, and is also anxious to establish a rate which will be equitable to both the village and the consumer, and if is seen that the present rates can be lowared in justice to all concerned, it will probably be done.

President McKinley, upon being notified formally of renomination Thursday, reforred to progress during his administration, and called upon the people to "once more units and overcome the advocates of repudiation," and elect a congress which will anstain and, if need be, strengthen the gold-standard law enacted last year. He mys there must be no "scuttle policy" in the Philippines. "We will fulfill the abligations imposed by the triumphs of our arms and by the trenty of peace; by international law; by the nation's sense of honor; and, more than all, by the rights, interests, and conditions of the Philippine people themselves."

It is not believed that the democrats of Illinois expect to elect their state ticket. There is no show for such an outcome. There is reason for the suspicion that their main object is to capture close congressional and legislative districts. Under the present apportionment they do not have to carry the state to do this. They could less the state by 40,000 and still carry the legislature and get a number of close consional districts. This is the reason why it is necessary for republicans to make wery effort to get out every vote possible. The United States senstorship is the prize be which the democrate are fighting.

The natural born idiocy of a certain of people was admirably displayed at the Stranbe fire Friday. For some many people, when a fire occurs, what little sense they pessess, and on to take particular delight in seeing how much property they can destroy in a circu time. Not content with throwing linity, micrors and other articles of out of the window, these misdividuals appeared bont on tear-case to places before the flames a schemes at the general de-

struction. Doors were torn bedily from their hinges, windows were smashed with out cause, and even the heating radiators were wrested from their fastenings before the house was even threatened with fireand all this destruction merely to satisfy the insatiate cravings of those individuals who seem animated only with a crazy de sure to add to the chaos. The foolkiller certainly has abundant material to work upon in these freaks of humanity.

Traveling agents of all kinds are selling orders for goods through the country around here this annmer. They are here today and gone tomorrow, and, if they wish, do not have to be responsible for the g ods they soll, and, as a rule, generally It is another man's game, and the farmer had best let it alone. WEEKLY CROP BULLETIN.

For the week ending July 16th, 1900 The past week has been excellent for harvesting purposes, and advantage has been taken of it to push this work rapidly. Good rains have fallen in the northern district and parts of the central district, but they have not materially interfered with farm work. The week has generally been dry in the south, while rain is badly needed in the northwestern part of the ican, attempts to replace all the newspy central, and in the southwestern part of northern district. Oats harvest is well advanced, and the crop has been harvested in excellent condition. A splendid yield is generally anticipated. In a few locali ties there has been injury from rust. Wheat is being threshed. A fair average yield is reported. In some localities the yield is very heavy and in other very light. Corn continues to make a very Maple avenue is a sight to behold, being rapid growth, and the prospects are fine. A few correspondents report injury either trees lining that thoroughtere. Adjaining by hail, chinch bug or dry weather. Broomcorn is reported doing well, except in Clark county. Haying has progressed very rapidly and is almost finished. The crop has generally been put up in fine druggists. The street and alley committee of the condition and the yield averages fair. A few localities potatoes are rotting or are affected by blight. Fruit prospects are generally good. Blackberries are plentiful, and early peaches are ripening. Many discouraging reports relative to the apple crop are received. They continue to drop badly in many localities, while in others the quality of the fruit is poor. It is generally believed, however, that, if dropping were to crase hoon, a fair crop could be
