Corn Bread with Bacon. Corn bread cooked with bacon is a dish that is never seen in Philadelphia, but hunters and other persons who get out into the wilds return to rave over it. They describe it thus: The corn bread in the raw state is laid in a pan about two feet square, and then a piece of bacon is chopped up into bits as small as possible, and these bits are stuck, about an inch apart, into the dough. The cooking begins, and in the process the bacon fat melts. When the bread is done it has a peculiar and delightful flavor,-Philadel-
