The details of the dastardly crime at Buffalo, which robbed the American copie of a devoted servant, are too treeb in the public mind to need recapitulation, but an account of the resident's last day on earth and the oble and Christian fortitude with which he met his fate, is appropriate this time. The sorrowful scenes enacted around the house of Mr. Milburn, president of the Buffalo expoaltion, where the president died, have and few parallels in our history.

The last day, which ended in despair was begun in hope. The ils that came Friday afternoon, when the organs of digestion refused to handle the solid food that had been taken earlier in the day, had seemingly been overcome by midnight, and when the new day came it found the president relieved and resting.

Hope, that had suddenly dropped from the high place which it had held began to revive. The healing of the ands had progressed favorably, general conditions were in the main satfactory, and the immediate future of he case seemed to hold no threat. The physicians who had been in almost constant attendance during the night arted, and the watch in the sickroom was reduced. Sudden y there was a failor of the heart, which for several aya had been manifesting signs of weakness, and the president sank toward unconsciousness. This was at 2 o'clock in the morning. There was an mmediate application of restoratives, and a general call was sent to the abseat physicians and nurses. Digitalis, strychnia and saline solution were adinlatered to the patient, but there no immediate response to treat The physicians admitted that n was desperately ill.

Secretary Cortelyou decided to send or the relatives and close friends of he president, the vice president and members of the cabinet. Those

Senator Hanna came from Cleveland by special train. Other friends arrived by regular trains, and all through the day they came in increasing numbers. Their regret and sympathy were profound. The day developed but little encouragement for them, however,

During the forenoon the president made a slight gain, and held it well into the afternoon. His physicians announced that they had given him nourishment, and it was thought that possibly there was a chance for a further gain of strength. It was known, however, that he was in a very serious state, and every interest centered | terically. in the sick room, where the struggle was in progress. And then, one by one, those in the house, the President's brother, Abner, Secretary Root, Secretary Wilson, Secretary Hitchcock, Mrs. McKinley's sisters, and the others went into the room' of death for the last look.

# 102 MILES AN HOUR.

One of the Milwaukee's new mammoth engines has broken the record between Milwaukee and Chicago. On New Year's eve the new compound Atlantic and round with sheep's wool. Over type engine, No. 921, made the eightyfive and two-tenths miles from Chicago to Milwaukee in eighty-seven minutes, ture such a rope is the work of years, or one bour and twenty-seven minutes. The previous record is said to have been one hour and thirty-two minutes and the fastest schedule of the Milwaukee calls for the run in one hour and forty-five minutes. During three and four-tenths miles of the distance between Caledonia and Lakewood the train maintained a speed of a trifle | sins. over 102 miles per hour. The distance between these two stations, three and four-tenths miles, was made in exactly two minutes.

Considering the fact that no preparation was made for the run, and considering the conditions, the run is remarkable. The train left Chicago at 10:15 p. m., twenty minutes late, the engine hauling six sixty-foot mail and express cars, and arrived at Milwaukee at 11:42, just two minutes late. The two terminals required slow time and there were slow downs for five railway crossings, one full stop at Western avenue, but no stops for water.

Edgebrook to Stowell, seventy-two miles, was covered in sixty-five minutes, or at the rate of sixty-six and one-half miles per hour. The distance from Wadsworth to Western Union Junction, nineteen miles, was made in sixteen minutes, or at the rate of seventy-one and one-quarter miles per hour. Engine No. 921 has a loaded weight of 290,000 pounds; drivers, 84% inches in diameter; a tender capacity of 19,000 pounds of coal and 7,000 gallons of water. The run by detail was as follows.

# FOR BACHELOR GIRLS.

Novel Combination That Is Both Trunk and Writing Deck.

A combination trunk and writing desk has been devised by a New York woman. Necessity was truly the mother of this invention, the combination being a diminutive hallroom, a limited income and a "bachelor" woman's need for a convenient and capacious drawer.

This design not only gives two large drawers, but at the same time does not increase the amount of trunk room, and leaves it easily accessible

The photograph shows an old trunk, now used as a writing table. It can be made ready for traveling in less than a minute's time. It was stated some time ago that a man was the b ventor, but Laura E. Buckly the patentee, and in justice to her th
