When she has passed her twenty-second year she is decidedly of opinion that from then until the age of twenty-eight really marks the limits of the best time, and when thirty comes on the scene she is ready to give way to all those who believe a woman to be then at the zenith of

It is generally maintained that after twenty-five the average woman begins to attain her physical and mental perfection, and that for some eight or ten years after this she still retains her charms undiminished. After this time, of course, it depends entirely upon the woman whether she chooses to advertise her years, or by her charming personality and clever dressing conceal all ravages of time.
