#### SPECIAL FAVORS SEEM TO INFLUENCE POLITICS:

The newspapers over the State favorable to the candidacy of Mr. Dencen for governor, headed by The Record-Herald of Chicago, are endeavoring to make great political capital over the organization of a "Business Men's" to go all to pieces when up against him. Deneen Club recently in Peoria. In the light of a careful analysis the question will arise whether there is reason for much congratulation on their candidate on this score.

Z. A. Landers, the able editor of The Republican, of Oregon, Ill., analyzed the "big business" organization in Deneen's behalf in Chicago so ably that the props were knocked out from under that proposition. Mr. Landers ar gued that by virtue of the "big stick" held by Mr. Roy O. West as chairman of the Cook County Board of Review it was necessary for these business men to "line up" or it was possible for the tax returns to spell disaster for them. Apparently Mr. Landers filled that ointment full of flies, for little more is heard of it.

The comment is made by Peoria mer that despite the allegation of the mer who formed the "Deneen Business Men's Club" in Peorla, that their action was single in its purpose to pro mote good government, many of those self-same men are enjoying special privileges under the administration of Governor Deneen. Horace Clark, chairman of Mr. Deneen's meeting and prominent in the club, is president of the Clark Coal & Coke Co., a firm alleged to enjoy a monopoly of the supplying of fuel for the State insane asylum at Bartonville. G. DeF. Kinney. another prominent member of the club, is a trustee of the Pontiac reformatory. and the allegation has been made and not denied, that the official records of that institution show that Mr. Kinney has been throwing big business to the wholesale drug and grocery houses of Peoria. He is connected with the wholesale drug house of Colburn, Burkes & Co., of Peoria.

When these facts are considered it throws a new light upon the situation, and it appears that the members of the "Business Men's Club" are influenced in their "public concern" by private welfare.

## A NEW DEPARTURE.

After considerable agitation upon the part of those interested in the settlement of Government lands in the west. the Government has now designated an engineer to show prospective settlers lands within the Shoshone Project in Wyoming. This is an innovation that will be appreciated by prospective homeseekers for the reason that in the past, persons seeking Government lands have as a rule had to depend upon strangers to show them the land and point out the corners, but this is all changed now. Settlers now going to Powell, Wyoming, where the Government Engineers have their beadquarters for the Shoshone Project, have one of the engineers at their service, who goes with them personally and points out the corners and gives them any information desired. These lands are all platted into farm units and the engineer who did the surveying is the one designated to show the lands.
