cumulations and who is alive when the other is dead.

In many, if not in all the States there are laws providing penalties for kidnaping, varying in severity from death to imprisonment in the county jail for one year. There is general agreement in all the States that no crime is more reprehensible than that of the person who steals a child from its parents and holds it for ransom under threat of torture if the money demanded is not paid. Other crimes against the person may be, and frequently are, due to ungovernable passion; but the stealing of children for such a purpose is a deliberate procedure, planned to take advantage of the natural affection which parents have for their children. It is in its essence a crime against nature, and deserves to be classed with all those unnatural deeds for which the laws provide severe penalties. Yet, as already indicated, there is one State, Idaho, in year of imprisonment in the county jail. The maximum is ten years' imprisonment. In Pennsylvania, the scene of the most recent kidnaping case, the maximum penalty is solitary imprisonment for life. In Alabama, Dela-(9-22-08) OFFICIAL TIME | ware and Illinois the courts have power to sentence kidnapers to death, particularly when the person kidnaped is held for ransom. Distinction is made in the laws of some of the States between kidnaping children and adults, and between holding for ransom and for other purposes. Such distinctions are of course necessary to cover the different degrees of the crime. The general tendency of recent years has been toward the infliction of increasingly heavy penalties upon stealers of children. No sooner had the news o the abduction of the Pennsylvania boy

spread abroad than bills were intro-

duced in the Legislatures of several

States raising the maximum penalty

for the crime, and such a proposition

was made in Congress to cover the Dis-

trict of Columbia and the Territories.

# PAPERS BY PEOPL

HELPFULNESS HAS UTILITARIAN VIRTUES.

By Ada May Krecker. Before we had achieved the division of labor and specialization a single man produced a watch which now requires several hundred workmen to perfect. To-day each factory man learns how to make only a particular part of the machine, and without his hundred fellow workers would never find the watch completed. Towns and nations specialize in industries and need all the rest of the world to buy what they make and to supply them with what they do not make. Homes in days of old were tangles of all the handlerafts of domestic interest. But now they do little but make beds and cook. All other household labors are performed in some specialized center-the curtains cleaned in one shop, the rugs in another, the laundry done here, the dresses made there.

The innovator is the one that makes the world move. He inaugurates a change, takes things from the old ruts, forms new grooves. Without him we should still be leading the simple life simplicimus of the savage and the stone age. With him we have wireless telegraphy, and flying machines, and steam heat, and printing presses, and a number of other things equally pleas-

Society will not tolerate weeds. It will insist upon filling the world with flowers. Already it is allowing its women to help in the world's work and already it is beginning to instruct its illiterate. The processes already set into motion can end in nothing short of the education and the enrichment of all members of the community.

#### FLYING ECLIPSES ALL EXPERIENCES.

By the Hon, C. S. Rolls.

After experience with every form of locomotion, including cycle and motor racing, a voyage in a dirigible balloon of the French army, and over 130 trips in an ordinary balloon, there is nothing so fascinating or so exhilarating as flying. The happy moment, I may say, of my life came when Mr. Wright, with his pleasant voice and quiet smile, said to me: "Mr. Rolls, I guess I'll take you up this morning." When all was ready I took my seat on the flyer. The rout of the engines commenced, the starting weights were released, and off we went with a bound. Once clear of the ground, the feeling of security was perfect. We tore along at forty miles an hour. The machine at the will of the operator tilts up gracefully when taking a turn. Those accustomed to motor racing will appreciate the effect of this, which is that taking a curve on a flying machine will be uctually safer than in an automobile.

Our speed caused tears to roll down our cheeks. After a flight of several miles a descent was begun for a landing. At the right moment the engine was stopped and we came to ground so gently that I found it impossible to tell exactly when the runners first touched the surface. On landing we skinned along the surface rather like a toboggan, coming to a standstill a few yards from our starting point.

With regard to the art of flying, Mr. Wright and his machine seem to work together as one unit. The management of a machine of this kind in breezy weather is not at all easy. At the same time it can only require patience and careful practice before any intelligent man possessed of coolness and good judgment can learn it.

#### THE SURE CURE FOR OLD AGE.

By Elizabeth Towne.

The cure for hurry is the cure for old age -to take time every day, maybe several times a day, to become again as a little child, interested in one thing at a time as if that were the only thing. Instead of whirling all the time dizzily on the rim of life, we must take frequent times to get back to the center again for our bearings-back to the stlent center whence we came. At that silent center we find all our child faculties waiting to be recognized and appropriated.

Many cases of falling memory are mistaken ones, due to unreasonable expectations! How many grown-ups forget as many times a day as any child does? The trouble is we expect, or try to compel ourselves to remember a great burden of inconsequent and irrelevant things that the brightest child on earth could not remember; and we are so preoccupied trying to carry these things in mind that our minds are half absent, at least, from the new things that are happening now and that ought to have our full attention, as they would have a child's full attention.-The Nautilus.

#### MADNESS AKIN TO HAPPINESS.

By Prof. Cesare Lombroso.

Geniuses enjoy moments of supernal felicity. These are the moments of creative frenzy which in so many respects resemble the psychic excesses of epileptics only, since not an ordinary brain is being agitated by convulsions, but a great mind, and instead of some atrocious bestiallty or dark crime there results a work of lofty character. Beaconsfield wrote that he felt as if there were but a step from intense mental concentration to madness. He said he could hardly describe what he felt in the moments when his sensations were abnormally acute and intense, that everything about him seemed to be alive, that he seemed to be raving and was scarcely certain that he really existed.

Analogous are the impressions of St. Paul, Nietzsche and Dostojevski. And the flustrious Beethoven says: "Musical inspiration is to me that mysterious state in which the whole world appears to shape !tself into a vast harmony where every feeling and every thought I have seeins to resound within me, where all the forces of nature seem to become instruments for me, where my whole body is seized with violent shivering and my bair

SHE DIES AT 106.

Thanks to Family's Magic Beads, Michia Schilotsky Lived Long. Mrs. Michia Schilotzky died recently at the Home of the Daughters of Jacob, at 802 East Broadway, at the age of 106 years, says the New York

Bun. She came to New York from

Asiashuf, in the state of Wilna, Russia, twenty-four years ago, and had been at the home four years. The last year of her life she spent for the most part in the hospital of the

A government textile college has home. About Christmas time, however, she attended an entertainment dia, to teach natives of both sexes the given by the home at the Grand Central Palace, where she served as judge of a casotrosky, a dancing contest in which the dancers were men who had passed their hundredth year.

Mrs. Schilotzky came of a long-lived family. She left nine brothers and sisters in Russia, the youngest of whom was 99 when he died. Her father and mother also lived long. The reason for this, they say at the home, is simple. The family for more than 300 years has owned a string of amber beads. at, giving to the untrained eye no hint daughter of the house has worn the succession, while being an important sessed of marvelous healing powers

"These Canadian reindeer are really caribou, but Canadlana say they will do as well. The carthou are plentiful throughout the Canadian north. Of course our people will have to catch these animals and train them, but to a people who are building an empire

"The most active advocate of using reindeer or caribon in the development of northern Canada is Fred S. Lawrence, who lives at Fort Vermillon, on the lower Peace River. He has made his home in the north for twenty-five years. He suggests that a start might be made toward domesticating Cana dian reindeer by inducing Laplanders to emigrate to Canada. The Laplanders, by reason of their pastures becoming crowded, owing to the great number of their reindeer, are looking for some part of the world to which they can transport their herds and families and establish themselves anew. The reindeer is fleeter and can be more easily kept than the horse. A prospector could maintain himself for a year with ten head of reindeer. If his provisions gave out he could eat the rein-

Starting an Endless Chain. Both father and mother struggled valiantly to teach little Effe to repeat the letter 'A." The child emphatically refused to pronounce the first letter of the alphabet and after many vain efforts the father retired from the fight discouraged. The mother took the little girl on her lap and pleaded with her affectionately.

"Dearle, why won't you learn to say 'A'?" she asked.

"Because, mamma," explained Effie. "des as soon as I say 'A' you an' papa will want me to say 'B.' "-- Harper's Weekly.

J. L. MEAD CYCLE COMPANY,

TO AILING WOMEN.

A Little Sound Advice Will Help Many a Sufferer in Downers

Grove. No woman can be healthy and well if the kidneys are sick. Poisons that pass of in the urine when the kidney a are well are retained in the body when the kidneys are sick. Kidneys and bladder get inflamed and swollen, crowding the delicate female organs nearby and sometimes displacing them. This is the true cause of many bearing-down pains, lameness, backache, sideache, etc. Uric potsoning also causes headaches, dizzy spells, languor

nervousness and rheumatic pain. When suffering so, try Doan's Kidney Pills, the remedy that cures sick kidneys. You will get better as the kidneys get better, and health will return when the kidneys are well. Let a fellow sufferer tell you about Doan's Kidney Fills.

Mrs. E. G. Martin, Washington street, Naperville, Ill., says: "I have derived great benefit from Doan's Kidney Pills. They relieved me of much suffering after I used many rem edies with little benefit. I have had a weakness of the kidneys for several years, causing dizzy headaches. nervousness and a constant feeling of weakness. I decided a few weeks ago to try Doan's Kidney Pills and I am very glad I did so, for before I had used one box, I was much better, Doan's Kidney Pills seem to be giving me strength and are driving the uric acid from my system."
