THE RESERVED TO SERVED THE Recent improvements in the mechanham for aiming big guns make it possible for an officer in an observation tower to have complete control of the battery of a warship. The disappearance of the man behind the gun will result in a hardship for the poets when the next big war comes on.

..... For the first time since the British began to rule India a native has been appointed as one of the council of form the supreme government of the dome 200 feet in height, perforating country, taking with him his savings country. This native is a noted Hindu | the mountain top, from which, in Depleased, but the Mohammedans demand | issue a solid column of bats, which that they be recognized in a similar flew rapidly, in a straight line, for fif-

23 Every farmer must decide for himof New York City raises nothing but celery. To enlarge his sales, he has prepared a little book containing recipes for about thirty different ways of using celery, and he gives it away to his customers. It is this sort of combination of specialization and advertising that brings success in any busi-

There are a vast number of laws or the statute books of the several States which are never enforced, and generally for the reason that they are unacceptable to the people. There are great numbers of others the enforcement of which, or attempts to enforce which, is productive of bribery, perjury, subornation of perjury, animosity, and hate among citizens, useless expenditure and many other public evils. All these are fruits of the common notion, to correct which but little effort is anywhere made, that a legislative enactment is necessarily a law, and will certainly bring about or help bring about the good intended by it; whereas such an enactment, when never enforced, does not deserve the name of law at all, and when the attempted enforcement of it is productive of the mischiefs above mentioned it is not so much law as it is tyranny.

Want of occupation will ruin the most promising of young men. When a routh sits down in idleness, with the idea that the world owes him s living, it's high time that his body was committed to the dust from whence it came. As for his soul, nothing will ever be known of it. A record of the young men who have been unfortunate enough to have a fortune left them shows that eight in ten sever amount to a single atom in the seld, and seven out of the eight die etherwise. When a father brings up to son in idlemen, never teaching him

the meridian or mre are total wrecks, Money bags may, like bladders, keep you above the waters of distress for a time, but puncture them, let their contents escape, and you sink. Many plans have been suggested for the remedy fo the evil of uncarned fortunes. But socialism, inheritance taxes, or government regulation of any description will avail but little until fathers, over provident, become wiser in their generation and see to it that their heirs are worthy of receiving the fortunes for which they themselves have

In a mountain near Montalban, Lozon, there is a large cavern, with many branching chambers, and a central young wife to the Pennsylvania oil The Hindus are naturally cember, 1907, Hugh M. Smith saw teen minutes, disappearing over a mountain range in the direction of Manila, without a single bat having left self whether he will specialize or raise the column. American engineers staa variety of things. One successful tioned there told Mr. Smith that the specialist within reach of the markets | fight of bats had occurred, at practically the same time each day, during two years. From other sources it was learned that the phenomenon had been

observed for at least thirty years.

Professor Penck, the German geographer, lecturing in America, recently pointed out that although the climate of Europe is hardly at all affected by the Mediterranean Sea, on account of the Alps, the absence of a similar mountain beit north of the Gulf of Mexico allows the winds to sweep over the southeastern part of the United States, bringing the moisture and warmth of the Gulf to that part of the country. Europe, on the other hand, gets the southeastern winds from the Atlantic, bringing the moisture and warmth of the Gulf Stream drifts. Thus the presence or absence of high mountain ranges in particular localities is an important influence in determining the climate.

There could hardly be a better exam- ers, and devoted himself to the manple of the scientific spirit than the recent application of the methods of blometry to those excessively minute | Company one of the great financial animals, the bacteria. # PAPERS BY PEOPLE

WHY GOOD PAINT PREVENTS RUST. By William H. Walker.

Inasmuch as both moisture and oxygen are necessary in order that corrosion may proceed, it can easily be seen that the duty of a protective paint is to exclude both of these elements. It is well known that a linseed oil film is an expansive porous structure acting somewhat as a sponge toward moisture and freely allowing the passage of oxygen. The function of the pigments employed in paint is therefore at least threefold. First, the more obvious one of imparting a color thereto; second, the most important one of filling up the pores or interstices in the oil film, thus rendering it as little impervious to moisture and air as possible, and, third, to aid the composite film in drying or oxidizing to a compact impenetrable covering. Very little work has as yet been done upon paints from this point of view, but with a clear conception of the factors involved in the corresion of iron, an intelligent study is made possible and valuable results can be predicted with certainty.

The porosity of paint films containing no linseed oil, but composed of various bituminous materials which may be adapted for the purpose, is also a field which can be studied with profit, with a view to increasing their moisture and oxygen-excluding properties.-Engineering Magazine.

#### WEALTH OF THE UNITED STATES

By Vice President James Sherman.

We have to-day 80,000,000 of people, occupying 3,000,000 square miles of territory, and they cwn \$120,000,000,000 of wealth. On farms valued at \$25,000,000,000 we produce annually agricultural products valued at \$8,000,000,000. It is nothing that we produce annually 2,500, 000.000 bushels of corn and 11,000,000 bales of cotton, if there is no demand for the corn and cotton and if the demand is not at a fair return. But we have the market. Our 5,500,000 of people who produce \$15,000,000,000 of manufactured products annually, and receive in wages \$230,000,000, make the market. These figures apply only to finished product. We get the products to the consumer by 250,000 miles of railroad, which is three times the railroad mileage of Great Britain, France and Germany combined. When side tracks are taken into account, we have more railroad mileage than all the rest of the world. On these railroads we have 100,000 engines, carrying millions of cars and hauling 2,000,000,000 tons, of freight, This practically equals all the tonnage carried by all the railroads and all the ships of all the rest of the world. This monstrous task is performed by 5,500,000 of employes, who are yearly paid \$2,300,000,000, and this vast business is conducted by \$150,000,000,000 of bank clearances.

Do we prosper? Only two decades ago we were sec-

Henry H. Rogers was a man of

striking and contradictory characteris-

tics. He was a tremendous worker

and all his life it was his habit to be

up by 5:30 or 6 o'clock in the morning.

He was a devoted friend to those

whom he liked and an implacable ene-

my to those who saw fit to fight him.

He was at once a man of tenderness

and a man of steel. On Wall street

be was adamant; at home and among

his friends he was gental, warm-heart-

ed, lovable. His intimate friends were

drawn from two extremes of life. The

brilliance of Mark Twain and the late

Tom Reed was his delight. To them

he showed a side of make-up that few

others outside of his family appre-

who would never speak to him except

as "Hen." They were his intimate

friends also, each in his own way, and

they saw a side of the man that Wall

street would find it difficult to under-

retirement from business activities.

ond to Great Britain in the output of iron and steel. To-day our output equals all the rest of the world. We live well and have happy homes, filled with comforts and luxuries. Yet we are a saving people.

We have in savings banks \$3,500,000,000, in national banks \$4,500,000,000 and in State banks \$5,000,000,000in all, \$13,000,000,000. The per capita of money in the country is larger than in any other save one, France, and amounts to \$35 for each of our 80,000,000 people.

The business of the country amounts to over \$3,000, 000,000 annually. How do we do such a monstrous business which is also profitable? It is because we have confidence in ourselves and the other nations of the globe have confidence in us,-Leslie's Weekly.

#### LEARNING FROM THE CHILDREN.

By Woods Hutchinson. Treat the child more as an equal-not as a hopeless inferior. There isn't so much need of coming down to his level as of giving him ap opportunity to come up to yours-which will not require such a frightful effort on his part as you sometimes imagine. If you can get a child to recognize and treat you as his equal you will have gained the highest position of influence over him and earned the best and sincerest compliment ever paid you. We dwell greatly upon what parents teach their children, but we forget to record in equal detail on the opposite side of the ledger what our children teach us.

It would be difficult to say on which side the balance would be found to fall. The child is not merely the ideal pupil, but also the greatest teacher in the world. The lessons that we learn from him, if we approach him with proper humility, are the most valuable part of our education .- Success Magazine.

#### FLEET'S TRIP MONEY WASTED.

By Justice Brewer. The assertion that the best way to preserve peace is to build up a great navy and army shows an ignorance of history. The trip of the ficet around the world, as a boastful show of our naval strength, has been nothing but a waste of money.

After all its folly, its influence on the Orient has not brought peace one day nearer. Over five millions of the people's money has been spent for coaling this fleet alone. What benefit has the nation received from that expenditure? Over 65 per cent of this country's expenses are due to the army and navy. In 1907 the sum spent in this way totaled \$365,000,000-the largest sum spent by any nation.

There never has been a nation that built a great army or navy but that got into war. Peace born of force is only temporary. Not until all nations settle their differences by arbitration will the world enjoy peace .-Leslie's Weekly.

~~~~~ Foods for the Gouty.

Dr. Haig, of London, who has attained eminence in the treatment of certain diseases, came to his theory of the uric-acid causation of many cases so-called neuralgia, rheumatic pains, gouty twinges and headache as a result of observation on himself. During his student and early professional days he suffered horribly from periodical headaches, losing an average of one or two days out of every week in consequence thereof. He experimented with all sorts of drugs and modes of living, and finally discovered lief. I shall not attempt to give all that the less meat he ate the less the details of my case, but my kidheadache he had, and he found further neys were weak, causing pain in the that the occurrence of headache was small of my back. Often I had dull, marked by a simultaneous excretion dizzy headaches, and felt tired and of a large amount of urle acid.

Beans, peas and other pulses are forbidden, since their protein is readily convertible into uric acid, and especially does he eschew tea and coffee, their alkaloidal ingredient, caffeine, ctated. On the other hand, there have being practically the same chemically been for years in Fairhaven natives as uric acid.

The diet of one who would avoid becoming a subject of the uric-acid diathesis, or who would emancipate himself from the pains of the already existing condition, must therefore consist almost entirely of breadstuff and cereals, puddings, fresh and dried fruits, nuts and the milk products. Water is the only beverage allowed. It is a meager diet, and must be more or less monotonous; and moreover, it is not always efficacious in curing periodical headaches and other supposed manifestations of the uric-acid diathesis. An occasional course of it, and s habitual more or less close approach to it are, no doubt, of great benefit to the general health, but one must not forget that many of the ills credited to uric acid may be a direct result of eyestrain, to be relieved more by glasses than by diet.

At what age does the devil develop "Here are your shirts, John," she in a boy? We saw a 4-year-old boy spitting on another boy's shoes this morning, because they had just been shined.
