In sickness, if a certain hidden nerve goes wrong, then the organ that this nerve controls will also surely fail. It may be a Stomach nerve, or it may have given strength and support to the Heart or Kidneys. It was Dr. Shoop that first pointed to this vital truth. Dr. Shoop's Restorative was not made to drug the Stomach nor to temporarily stimulate the Heart or Kidneys. That old-fashioned method is all wrong. Dr. Shoop's Restorative goes directly to these falling inside nerves. The remarkable success of this prescription demonstrates the wisdom of treating the actual cause of these falling organs. And it is indeed easy to prove. A simple five or ten days' test will surely tell. Try it once and see! Sold by Bush & Simonson. After a man gets one bite he wants the rest of the apple.

Town Booming Helps III.—Make a Noise Like a Dollar. The man who gets ahead is the one who makes a noise, and it's the same with a town. But it must be the RIGHT KIND OF NOISE. There are millions of noises in the world and only one kind worth making. That's the kind a man learned about when he tried to interview a great financier. He had spent several days trying to get into the private office of the old skinflint, but was always headed off. At last he went to a friend for advice. "I'll tell you what to do," said the friend. "You go down and stand in front of the old fellow's door and

MAKE A NOISE LIKE A DOLLAR. When he comes out to grab you, that will be your chance. That's the kind of noise we should make in this town. We should sound like ready money and look like it. Nothing would bring new business and hustling citizens quicker than a NOISE LIKE A DOLLAR. Every letter that goes out should be an advertisement for our town. If you don't know how to make a NOISE LIKE A DOLLAR, just call on us, and we'll try to help you. One way is to advertise. When everybody gets to making the right kind of noise it will be worth while watching things boom.

THREE NEW RESERVATIONS TO BE OPENED. (Continued from First Page.) snow regions rolls down the mountain sides and out across the valleys. There are very few nights in the year when blankets are not comfortable as a covering. A good rest may be had every night, and one will always rise refreshed in the morning, ready for a day's work. "The climate of a region is dependent upon two important factors, heat and moisture. A region having the proper amount of heat without great extremes, with sufficient moisture, and a suitable soil, will afford a most healthful condition. On the Flathead reservation the fall rains come in late September or October. During the winter the snow piles up in the ravines in the high mountains for summer's use. The spring is delightful. Warm weather and the spring flowers come as early as March. At Missoula, butternuts are usually gathered in February, and butterflies have been taken as early as the middle of February. April and May are delightful months, the latter usually one of sunshine; June brings refreshing rains, lasting until after the first of July. Then come weeks of sunshine, glorious weather, giving life and health." A fair idea of the climatic conditions in all the reservations may be obtained from the above description. Those who are fortunate enough to draw land in one of these great openings will not have to suffer from extreme heat or severe cold; in fact, the opportunities in these sections are as

From Cleveland comes the will of an old fashioned man who longs for the things that were. Desiring to get a bootjack, he visited six stores in his search, but at none of them was the article kept in stock. In half the places the spruce young clerks had never heard of such a thing and one bright youth of a later generation brought out a shoe horn in the comical belief that that was the thing desired. Not even in the souvenir shops could the object of search be discovered.
