#### GREAT POWER OF WATER.

of Mountain Streams.

How the West In Utiliaing the Flow

Great power houses of many thousand kilowatt capacity are being built on the Pacific slope, where the falls of rivers are being utilized. One of the greatest river-harnessing accomplishments is that of the hydro-electric plant of the Stanislaus Power Comnany on the Stanislaus River, in central California. An energy equaling 25,000-horse power has been developed In this instance a dam has been thrown across the river up in the mountains, the water is carried twelve miles by a flume, thence through a short wooden stave pipe and a steel pressure pipe 3,000 feet in length to the power house. The lines for the transmission of electricity are strung on steel towers 800 feet apart on the level, and closer together in the mountains. The total length of the line to San Francisco is one hundred miles The United Railways Company, of San Francisco, recently obtained a controlling interest in the company for \$5,000,000 and it expects to save \$500. 600 annually in the transmission of

Another instance of the kind is at Durango, Colo., where a vertical four foot solid column of water, one thou sand feet in height, is shot into immense turbines, which generate 40,000horse power, this power being transmitted on a wire not larger than one's little finger. The Snoqualmic Falls, near Seattle and Tacoma, Wash., run scores of small factories in Seattle and Tacoma, light the city of Tacoma and several towns and run big manufacturing plants. This same power is also running the street cars at Seattle. with their forty million passengers a

The Portland (Ore.) Light and Power Company has a plant of 50,000 horse power, with which it supplies not only Portland but other cities. Already electric power has proved efficiency in running cars over the heavy grades of the Rocky Mountains. and the Canadian Pacific is preparing to electrify three hundred miles of its railway in the Canadian Rockies, water furnishing the power for generating electricity. In view of what has been accomplished in the far west, surprise is expressed that more has not been done towards harnessing the rivers in the central and eastern states. DEADERS of The Reporter 1 will confer a favor on the publishers by patronizing those merchants who advertise in its columns. The Reporter is your paper and the merchants who aid it with their advertising patronage are worthy of your encouragement. The merchants who are best able to supply your wants are those who show some enterprise in soliciting your business through the advertising columns of the home paper. Everybody likes to do busi

ness with a live business man,

It was this fact that first correctly led Dr. She Restorative—Tablets or Liquid—and self what it can and will do. We self
