First Railroad Train in New York, With the Locomotive "De Witt Clinton."

DATE ONLY FROM 1829 AFRICAN ROAD A MARVEL

FIRST AMERICAN LOCOMOTIVE THEN HAD INITIAL RUN.

On Tracks Entirely of Wood It Attained a Speed of Ten Miles an Hour—Introduction of "Grasshopper" Type.

The first locomotive looked more like a huge grasshopper than anything else. There was no cabin on it, and the engineer had to stand up while it was in operation.

The astonishing performance of "The Rocket" in England led to the introduction of steam engines in this country. In 1829 Horatio Allen operated the first locomotive tried out in America; it ran on tracks made entirely of wood.

In 1831 Phineas David of Pennsylvania designed an engine for the Baltimore & Ohio railroad. It was the first of the grasshopper type, and did good work for many years.

In 1831 Matthew Baldwin, founder of the Baldwin Locomotive works, designed an engine called "Old Ironsides." It was tried out on the Philadelphia & Norristown railroad and made a speed of 30 miles an hour.

From this date rapid improvement was made in the construction of the locomotive. The railroads were beginning to handle a large business, but their methods of management were so crude that many fearful wrecks resulted.

Powerful Electric Locomotive. During the year 15 powerful electric passenger locomotives have been placed in service on the main lines of the New York Central railroad.

Tunnel Through Selkirk. The Canadian Pacific railroad is now engaged in the construction of a double track tunnel five miles long through the Selkirk mountains at Rogers Pass, B. C.

Magnets Aid the Surgeon. Powerful magnets are aiding physicians in the military hospitals of Europe because of the character of the ammunition that is causing most of the wounds in the land battles.

The Left Hand. If—after various reports—we are to believe that it is the left arm, and not in the right that Kreisler is wounded, this is no cause for congratulation from his audiences.

Better Deep-Sea Soundings. A novel piezometer, claimed to give deep-sea soundings of much greater than the usual accuracy, is due to A. Berget, a French physicist.

Motor Buses Multiplying. In addition to lines already in operation, three new lines of motor buses were put into service in New York recently.

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Heat and Wind quickly relieved by Merline Eye Remedy. No Stinging, just Eye Comfort. At Four Druggists 50c per Bottle. Merline Eye Remedy is sold by Dr. J. C. Fletcher in Downers Grove, Ill.

Wedded Life. "Did your wife ever get the best of you?" "Yes. Didn't she marry me?"

CANADA ONE OF THE WORLD PROVIDERS

Although Canada's real start in national development as pointed out by the Buffalo Commercial, came slowly and late, as compared with that of the United States, it is now well under way, and very soon there will be a marvelous expansion in agriculture, mining and manufacturing.

The paper above mentioned says that "heretofore the development of Canada, like that of the United States, has been westward, but unlike this country, the Dominion has a great territory to the North, which has been regarded as all but uninhabitable, but in which recent research has proven there are possibilities of development almost inconceivable."

Herein is the spirit that dominates the Dominion Government when it extends an invitation to Americans to assist in developing the resources that Canada possesses, whether they be mineral, forest, industrial, commercial or agricultural. Both countries will benefit and the United States will be a gainer by having as a neighbor a country whose resources are as great and varied as are those of Canada.

In comparing the United States along with other nations of the world in producing and importing foodstuffs, the Agricultural Outlook published by the United States department of agriculture says:

The United States in recent years has been as large an importer of foodstuffs as exporter; therefore she cannot be classed as a surplus producer of foodstuffs. This is contrary to popular impression. It is true that she is an exporter of certain articles, but she is an equally large importer of other articles.

An investigation into the production, imports and exports of food products of various countries indicates that England produces about 83 per cent of her food requirements, and imports (net) about 47 per cent; Belgium produces 87 per cent, and imports 43 per cent; Germany produces 88 per cent, and imports 12 per cent; France produces 92 per cent, and imports eight per cent; Austria-Hungary produces 96 per cent, and imports two per cent; Russia produces 110 per cent of her requirements, and exports an equivalent of about 10 per cent; Canada produces 23 per cent more than she consumes; Argentina produces 48 per cent more than she consumes; the United States produces practically no more than she consumes (i. e. exports and imports of foodstuffs almost balance).

With this information before the reader, it is not a difficult matter to direct attention to the fact that Canada stands in a pre-eminent position in the matter of grain and cattle production, and with a large territory yet unoccupied she will always maintain it.—Advertisement.

Attitude of the Believer. I feel that goodness and truth, and righteousness are realities, eternal realities, and that they cannot be abstractions, or vapors floating in a spiritual atmosphere, but that they necessarily imply a living, personal will, a good, loving, righteous God, in whose hands we are perfectly safe, and who is guiding us by unerring wisdom.—Thomas Erskine.

For She Liked Them. Patience—According to two English scientists, the sense of smell in man, because of the practice of kissing, is gradually being destroyed.

Patience—Good! Do you suppose the time is coming when the boys won't notice the onions?

THIS WOMAN'S SICKNESS

Quickly Yielded To Lydia E. Pinkham's Vegetable Compound.

Bridgeton, N.J.—"I want to thank you a thousand times for the wonderful good Lydia E. Pinkham's Vegetable Compound has done for me. I suffered very much from a female trouble. I had bearing down pains, was irregular and at times could hardly walk across the room. I was unable to do my housework or attend to my baby I was so weak. Lydia E. Pinkham's Vegetable Compound did me a world of good, and now I am strong and healthy, can do my work and tend my baby. I advise all suffering women to take it and get well as I did."—Mrs. FANNIE COOPER, R.F.D., Bridgeton, N.J.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

For thirty years it has been the standard remedy for female ills, and has restored the health of thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, tumors, irregularities, etc.
