BOOST! -- Don't Knock

PROCEEDINGS OF BOARD OF SUPERVISORS

Proceedings of the Board of Supervisors of Du Page County at a special meeting held at the Courthouse in Wheaton on Monday, the 9th day of August, A. D., 1915, pursuant to call of Chair:

Meeting called to order with Chairman Fletcher presiding.

On roll call, all members present except Supervisor Keller.

Minutes of last preceding meeting read and declared approved.

All bills and communications on file read, and the claims referred to the proper committees.

On motion of Supervisor Hammer, the State's Attorney was authorized to draw an order instructing the sheriff to receive prisoners from the several cities and towns of Du Page County, as directed by law.

On motion of Supervisor Hammer, Supervisor Keller was designated to approve the assessment list of F. W. Van Oven, on behalf of the Board of Supervisors.

On motion of Supervisor Hammer, the board took a recess for twenty minutes.

On reconvening, the Committee on Fees and Salaries made the following report, which, on motion of Supervisor Hermann, was declared approved:

Mr. Chairman and Gentlemen of the Board of Supervisors: Your Committee on Fees and Salaries beg leave to report that they have examined all claims presented before them, and recommend the payment of the following, and that they do direct to issue orders for the several amounts to the several claimants, to-wit:

Table listing various services and amounts: Geo. A. Fletcher, services on Board of Review \$125.00; M. J. Town, services on Board of Review \$125.00; C. E. Stott, services on Board of Review \$125.00; W. W. DeWolf, deputy fees \$40.00; D. K. Drabek, work on State aid road for July \$100.00; W. V. Hoff, coroner fees \$48.00; W. H. Johnson, justice fees \$17.00; Frank E. Harvick, justice fees \$12.50; George F. Leitnick, deputy fees \$12.00; John F. Hasterman, clerk hire for July \$50.00; E. T. Morgan, clerk hire for July \$75.00; John W. Nicholson, constable fees and expenses \$17.45.

The following report of Committee on Claims was on motion of Supervisor Hammer declared approved:

Mr. Chairman and Gentlemen of the Board of Supervisors: Your Committee on Claims would beg leave to report that they have examined all claims presented before them, and recommend the payment of the following, and that the clerk be directed to issue orders for the several amounts to the several claimants, to-wit:

Table listing various claims and amounts: Chicago Telephone Co., rent and bill for July \$41.00; L. C. Smith & Bros., type writer ribbons for recorder \$1.50; Lawyers Cooperative Publishing Co., lawyers' report \$4.00; M. N. Oliver, printing, as per bill \$28.00; John W. Landis, legal services \$25.00; J. H. Madson, committee work and expenses \$21.00; J. H. Madson, committee work and expenses \$17.25; J. H. Madson, committee work and expenses \$22.70; J. H. Madson, committee work and expenses \$4.00.

Table listing various services and amounts: Geo. M. Smith, stationery \$13.11; N. E. Matter, clerk hire, postage and expenses \$1,305.30; Dr. A. B. Connor, auto for sheriff \$10.00; Dr. R. B. Oleson, taking care of transient pauper \$10.00; A. J. Mysterom & Co., supplies for county spt \$22.85; Frank Fox, night watchman \$36.00; Hieser Bros., plumbing \$9.90; W. J. Yackley, committee work and expenses \$6.80; C. H. Plummer, stationery \$33.75; Standard Oil Co., gas \$38.68; Wheaton Repair Shop, auto for coroner \$4.00; Louis Schultz, labor at Court House \$3.00; Austin Western Road Machinery Co., Austin road grader \$325.00; Western Gas and Electric Co., gas and electricity \$48.72; P. E. Pettibone & Co., supplies \$68.97; R. T. Morgan, postage and expenses \$10.45; Humstead Company city and county directory \$6.00; R. Markley, oiling York street \$20.00; E. L. dates expense bill \$16.21; N. E. Matter, Co. Treas., County Farm expenses \$347.27; N. E. Matter, Co. Treas., Almshouse expenses \$71.07; N. E. Matter, Co. Treas., care of county inmates \$166.40.

Respectfully submitted, CHARLES H. BERGMANN, Chairman

On motion of Supervisor Hammer, Coroner W. V. Hoff was authorized to attend the Coroner's Convention at Beardstown, Illinois, and present his bill for expenses to the County Board.

On motion of Supervisor Goodrich, the clerk was authorized to draw a county warrant for \$1,500 in favor of Elmer F. Adams, treasurer of Du Page County Agricultural Improvement Association, for the balance of the appropriation for the Agricultural Experts salary made by the County Board for the year of 1915, May 1, 1915.

On motion of Supervisor Hammer, the board adjourned to the second Tuesday in September, 1915.

A. A. KEHN, Clerk

Plucky Kid: "Missus, don't you want to buy a ticket to the swimming contest at the Y. M. C. A.?" "It's going to be fine!" "The question was asked by a small boy who mentioned a woman in an up-town New York street. The woman was about to say 'No' when looking at the boy closer, she was dismayed to see that both the kid's arms were cut off above the elbow."

"I'm going to swim in that contest myself. I'm going to be one of the special features. It's going to be grand, he announced pleasantly. You going to swim, why the small boy interrupted her."

"Oh, I'm a good swimmer," he said proudly. "Of course I can only see my legs but I can go just as far and just as long as the other fellows. When I got my arms cut off by the train I felt awful bad, cause I thought I could never do anything like the others. But I practiced and practiced with my feet till I could swim and I got a prize at the Y. M. C. A. for speed."

The woman bought a ticket.

Ancient Concrete: The statement that reinforced concrete has been found in French buildings erected in the sixteenth century will surprise no one who has even a superficial knowledge of the history of architecture. Concrete in some form is a very ancient building material. Indeed, some of the lesser pyramids were built of a pebbled mixture which is a fairly close relative of our modern sand and cement crushed rock compound. The dome of the Pantheon at Rome, built nearly nineteen centuries ago, is made of pozzolan concrete, a volcanic ash being the binding material. It is not reinforced, or rather there is no record that it is reinforced. But the supporting columns of Santa Sophia, built five centuries later, are strengthened with lead rods and medieval builders used iron cramps to bind their courses of natural stone. Why should not the architects of the Renaissance use the same reinforcement for artificial stone?

Modern civilization, even in its industrial aspects, is not a wholly new thing. It has roots deep in the past.

America's Finest: The Treasury of America has in these months, these energies, that cannot be restrained to a special favor, that it depends upon the inspiration of authors and upon the resources of unknown men. Every one is interested in the results of the search for the new and the old.

Color Music is Noted: During a recent rendition of the Russian composer Scriabine's "Prometheus," which is described as a futuristic tonal poem, by an eastern orchestra in Carnegie hall at New York, a "color organ" was employed to utilize the author's chromatic score with the coloratura.

Treat Ulcers With Sugar: Sugar as a dressing for ulcers is advocated by Dr. P. M. O'Brien of Bradford, England. In a letter to the London Lancet, he says he has used it in medium sized crystals for many years, having learned of it from an old woman who was treating an ulcer on her own leg in this manner, and has found it most effective. The New York Medical Journal says that Doctor Magnus of Marburg, Germany, also uses sugar and has found it invaluable as a dressing in all save tuberculous lesions.

ALLOW NOTHING TO WASTE

Everything of the slightest value is utilized by the Thrifty People of France.

What becomes of old sardine boxes, tomato cans, meat cans, fruit cans, and cans of all kinds?

In this country they are usually tumbled into some waste lot or down by the side of the road, where they are left in unsightly heaps.

But the people do better in France, where nothing is allowed to go to waste. They gather them up, and use them—to cut into tin soldiers.

The making of tin soldiers is not an insignificant or unimportant business, by any means. There was published not long ago an item saying that the manufacture had reached "great artistic excellence," and that "a certain eminent German officer has found it possible to represent military operations on a large scale by their means." He has "thirty-five thousand tin soldiers," foot soldiers, horsemen, and artillerymen, with all necessary equipments, and toy scenery, and with them he goes through evolutions, and works out interesting problems of military tactics.

In France, too, the old boots and shoes are collected, and every part is used over again. The work is mostly done by convicts in prisons. They take the boots and shoes to pieces and soak them; then the uppers are cut over into children's shoes, or, if they are too far gone for that, a peculiar kind of pressed leather is made by some chemical action. The nails are saved and sold, and the scraps go to the farmers to fertilize the soil.

Who would have thought it possible to make anything out of old sawdust? Yet it is said that many of the finest surgical instruments, and some of those used by engineers, are manufactured from the steel that first did duty in saws. The steel of saws is of the very best quality and finest temper, and since it is good in the first place, it is always good.

After that it is easy to believe that there is a place in Canada where they make paper from sawdust. It is a kind of paper pulp, rolled out in great sheets, for the purpose of sheathing, that is, for using on buildings before the clapboards are put on. Wood pulp, made of poplar and spruce, has long been used mixed with the rags in the paper mills, in the process of manufacture, but it is a new thing to convert sawdust into paper.

Where the largest quantity of lead pencils is made, the sawdust of the cedar wood is saved and distilled. A valuable oil is extracted, every ounce of which is sold at good prices.

Not an old sardine box, a tomato can, a cast-off shoe, and a rusty pruning saw may be made over into something entirely new, and a heap of sawdust and the waste from a lead pencil manufactory may furnish employment and be of actual use in the world—Youth's Companion.

Oil of Chenopodium as a Poison: There has been much discussion in medical literature as to the occasional poisonous effects of oil of chenopodium, or oil of wormseed, which is used in the treatment of worm and of roundworm. Some experiments to determine accurately the resistance of various animals to such effects have recently been reported by Messrs. W. Salant and E. K. Nelson. The toxicity of this substance was found to be distinctly increased in starvation and decreased by feeding a rich carbohydrate diet. Cumulative effects were observed in different animals. Circulation and respiration were depressed. The writers conclude that oil of chenopodium should be given with great care, as it is poisonous even in small doses. Scientific American.

Safety in Summer Drinks: On the whole then we have reason to be proud of the progress that has been made in the production of summer drinks. Ingredients actually harmful or even deleterious have been mostly eliminated. The chief danger that besets the habitues of the soda fountain is lack of cleanliness on the part of the dispenser, especially in the rinsing of the glasses. With due regard for this and for the temperature and condition of his stomach, the thirsty one may face the fountain without fear and pick out from the fancy names upon the mirror what ever seems most enticing at the time. New York Independent.

Interesting War Contribution: Among the funds which are pouring into the committees in every city of Italy to provide comforts and necessities for those who are suffering directly or indirectly through the war, an interesting contribution of nearly \$500 has been received by the committee for civil preparation at Bologna. The committee existed during the war of Independence in 1866, and the sum which was then only \$80 was the balance which remained in the fund after the war was over. It was deposited in the name of Count Salina, a well-known patriot of the town, and in 49 years it has more than quintupled itself.

WAR TRUST SUPPLIES U. S. ARMY AND NAVY

By Congressman Clyde H. Tavenner.

Washington, Aug. 12.—The American people should not permit themselves to be fooled by the expression, "peace at any price."

I will venture to say that not one public official in the United States, not one man outside of a lunatic asylum, has ever advocated "peace at any price."

To be for peace at any price would be equivalent to saying that a foreign power could come over here, burn our homes and attack women, cut off our hands and legs and gouge out our eyes, and that we would still be for peace. It is absurd! Any nation jumping on us or invading our fair land with the idea we are for peace at any price would receive the surprise of their lives.

"Peace at any price" is merely the officially adopted cry of anguish of the stockholders of the munition and armament firms, and their friends, who are making use of it to take the wind out of the sails of any man who has the audacity to oppose their war propaganda and their private profits.

These patriots for profit the richest and most powerful group of men in the United States have their minds set on vastly increased armament, and they want no interference. But what is more important, and more significant, they also have their minds set on supplying the increased armament themselves.

In this connection I desire to suggest to the American taxpayers a method by which they can turn the tables and take the wind out of the sails of the patriots for profit who hold stock in munition firms and cry out to heaven for preparation for war.

Have Congress say to the J. P. Morgans and the other war trust stockholders, some of whom are men high in official life: "All right, gentlemen, you can have a fleet of battleships that will darken the sky and fortifications that will lumber the earth, but the government itself will manufacture all of its own war paraphernalia in government plants. But although you will not draw down the fat munition contracts as heretofore your patriotic desire to serve your country will not be slighted. The present tax on incomes in excess of \$10,000 annually will be immediately tripled which will give you an opportunity to demonstrate the caliber of your patriotism by helping the poor bear the burden of the cost of the increased armament which you advocate, and 90 per cent of which agitation comes from the rich. Of course you gentlemen will have no objection to complete government manufacture of war materials because your only interest and motive is the safeguarding of your country from invasion by a foreign foe and so long as you get the ships and the increased armament and the country is saved you don't care where the ships and the munitions come from."

There have been ten official battleships as to the actual cost of the manufacture of a ton of armor plate. The average estimate is \$228.84 a ton. Yet since 1887 we have purchased 10,179 tons of armor, paying the armoring an average of \$449.04 a ton, or a total of \$4,562,740. If all this armor had been manufactured in a clerical box riggers I. Bertolin won

government plant it is entirely conservative to say that at least \$25,000,000 would have been saved to the American taxpayers.

Another sample illustration: The War Department, in 1913, purchased 7,000 4.7-inch shrapnel shells from the ammunition ring, paying \$25.26 each therefor. At the same time, precisely the same article was being manufactured in the government owned Frankfort arsenal for \$15.45.

A hundred similar illustrations could be given which would make plain why it is, that although we have been spending \$240,000,000 annually on our army and navy, the claim can now be made that we are "pitifully unprepared" and that "if war were to break out today it would be found that our coast defenses have not sufficient ammunition for an hour's fight."

Big Circus Coming This Way Soon: The Barnum and Bailey Greatest Show on Earth will exhibit at Aurora on Wednesday, Sept. 1, and this good news is being heralded everywhere by the many agents of this, the biggest and foremost amusement institution in the world. The Barnum and Bailey Circus has always been the largest that travels and this season the management has found it necessary to add many more cars to their trains in order to provide for the great equipment. It requires 85 double length railroad cars to transport the big show. 1,250 people are employed, there are 700 horses, 40 elephants and a menagerie of 110 cages, 480 world famed artists take part in the great est circus program this world has ever known.

A fitting introduction to the wonderful performance this year is the presentation of the new magnificent spectacular pagant, Liza Koskik, in which nearly 1,000 characters take part.

In the circus proper, which is presented in three rings, four stages, the hippodromes and in the dome of the largest tent ever erected, 400 performers from every nation in the world take part and present a vast array of foreign features entirely new to America. A wonderful trained animal exhibition is given by the Marvellous War Elephants, Fallenberg's Wonder Bear, Madam Bradna's Angel Horses, and the Barnum and Bailey Statue Horses.

Great interest is already being shown in this neighborhood and great crowds will no doubt go to Aurora for the biggest and most enjoyable holiday of the year. Everyone is advised to get an early start in order to be there in time for the parade which starts promptly at 10 a. m. and which is said to eclipse anything of its kind ever before attempted in the history of circus business.
