**YOU AND THE PAPER.**

The local paper is always bustling for you and yours. What are you doing for it? The paper is always planning and scheming and laboring for a better community, for a more prosperous community. What are you doing? Are you reciprocating in any way? Do you ever suggest to your neighbors that it is a good paper, a loyal paper, and that it should receive their support?

The paper devotes many hours and many pages in advertising the natural advantages of the community, of your community, and in seeking to enhance the welfare of YOUR community and of YOURSELF.

But what of you? Do you ever seek to advertise the paper, or to swell its subscription list, or to increase its general usefulness in the community?

The paper is working six days of the week for the community, and for you, and for yours. Do you ever devote a minute of your time to its material welfare? Have you ever done so?

The duty of the paper is to supply you with the legitimate news of the town and community. But the paper goes much farther. Its labors in behalf of the community are endless, and it will continue to advocate the cause of community progress as long as it is a paper.

But are you doing one single thing to requite the paper for all its toil and expense in your behalf? You take the paper, you say. True, and you get more than value received each issue in the news items alone.

But this is not a kick, nor is it a roast. It is just a little food for thought in a few of your idle moments.
