

CONGREGATIONAL CHURCH

Worship with sermon by the pastor Sunday morning.

In the evening we shall join in the union services in the Methodist church, where the Y. M. C. A. Gospel Team of Naperville will bring the message. Be sure to hear their male chorus.

Bible school and men's class at noon.

The Endeavorers will consider the subject, "A Basis of Sound Belief."

The subject for the prayer meeting is "Being Thorough with Ourselves."

ST. ANDREW'S EPISCOPAL CHURCH

Rev. Howard Adams Lepper.

Rev. Howard Adams Lepper. Hours of worship: Sunday School, 9:45 a. m. Morning prayer and sermon, 11 a. m. Altar Guild first Tuesday of each month. Woman's Guild every other Wednesday. Auxiliary second Thursday of each month. Monday night, Boy Scouts. Tuesday night, choir rehearsal.

THE BAPTIST CHURCH

R. Wilbur Babcock, Pastor.

Men's Sodality meets on the 8th Sunday of the month; Married Women on the first Sunday; Young Ladies on the second Sunday; Boys and Girls on the third Sunday.

Holy hour adoration every Friday from 3 to 4 p. m.

THE FIRST EVANGELICAL CHURCH

G. A. Manshardt, Pastor.

The men of the First Evangelical Church of Downers Grove were organized under the direction of their new pastor, Rev. G. A. Manshardt, into a Bible class. The object of the class is to interest the men of the church in the study of the Bible and to attend Sunday School and spiritual as well as a spiritual.

A party was organized with a men's welfare society. Rev. Manshardt saw Mr. John Penner, editor of the Chicago Tribune, vice the spider, a half-cent, treasurer, work by dropping a line of wire, a pine tree to anchor their mark there making fast a line of wire, usually formed two of the wire, inviting lines of the web. For 18 days it continued to work, suffering interruption until 1:25 o'clock in the morning. The network and spider lines were done by 12:30 o'clock. The spiral part of the web was subsequently made in less than an hour. The observer drew many interesting specimens of the web at different stages of its construction. He says the spider web was one of the most perfect he has ever seen.

THE VALUE OF LIFE

The value of life has fluctuated greatly in the different periods of the world's history. To the Spartans life was cheap. The highest duty was to be a soldier; the greatest honor was to give away life for the state. Napoleon estimated the thousands of lives he counted for a universal empire would cost, and he marked on one of his maps, "Life had little value. Under Henry VIII, death was the punishment for stealing three shillings; there were 253 crimes punishable by death; 72,000 persons were executed in his reign.

Formerly war, pestilence and famine swept off humanity by the countless millions. During the thirty years' war 18,000,000 of Germany's population were killed. The black death scourged 25,000,000 people in Europe during the fourteenth century. Three hundred and fifty famines have swept over the earth since the beginning of history. Human life has been destroyed like bubbles. Today all this has changed.

Smallpox and yellow fever, for ages the two dreaded horrors of mankind, have lost their terror. The new discoveries in surgery have alleviated untold suffering. Formerly operations were performed while the subject writhed and shrieked with pain. Today anesthetics render the patient as insensible as a mountain boulder. The leading physicians of the world a few weeks ago cheered long and loudly Dr. Alexis Carrel of the Rockefeller Institute, when he announced to them that he had stopped the hearts of animals for two and one-half minutes and performed operations on their valves.

Animals have played an important part in the eradication of human diseases. From the horse the antitoxin is prepared that saves thousands of children from death by diphtheria. From the cow the vaccine preparation for immunizing against smallpox is made.—Lester's Weekly.

Activities of Women

Of the 1,348,056 pupils in the Pennsylvania public schools, 670,453 are females.

New York is one of the few big cities in the United States without a postwoman.

Girls working in the English cartridge factories are so fired with patriotism that some of them are working for 36 hours at a stretch without any rest.

The large number of labor girls from the north of Scotland who have been thrown out of work owing to the war will be employed in the Dundee jute trade.

Miss Elizabeth Lester has been appointed as stenographer on the Great Western & Rhymney railway of England. She is the first woman to act in such a capacity in South Wales.

In the north of England, Scotland and Wales, the masculine agricultural laborers are being supplanted by women, who can be seen following the harrow or digging in the ground to keep the growing seed in good condition.

Get Rich Slowly

The American Bankers' association, through its savings bank section, is circulating some facts that the Herald is very glad to pass along, because they emphasize and enforce the strength and possibilities of personal thrift.

It is no "get-rich-quick" scheme the bankers offer. But if any experience in life is proved, it is that "get-rich-quick" schemes do not work. They work just often enough to prove the rule, and to prove the companion rule that nothing is appreciated, nothing done any good, that is not worked for and earned. Riches gained quickly are lost quickly.

The plan proposed by the bankers is based on this proposition: That if a man earning \$20 a week saves \$5 a week he can double his income by the end of 20 years; and, of course, he will be increasing it all the time.—Deloit Herald.

The Gypsy Moth and Christmas Trees

Since November, 1913, the Federal horticultural board has refused to permit the shipment of Christmas trees and Christmas "greens" from territory infested by gypsy moth, for the reason that it was deemed practically impossible to examine thoroughly the large quantity of such material offered for shipment during the brief period at which it is marketable. The board has, however, now relaxed so far as to announce that next Christmas it will give a trial to the plan of inspecting and certifying these products and allowing their movement.—Scientific American.

Suggested Use for Aeroplans

A novel use for the aeroplane is under consideration by owners of sailing vessels as a result of the failure of the seal hunt this year. It is proposed that two experienced aviators be engaged to visit the east coast and the Gulf of St. Lawrence, respectively, just before the opening of next season and find the herds. The information thus obtained would enable the hunt to sail directly for the scene of the hunt, instead of spending much time searching for the animals.

The Mith

"I don't think that stenographer sent me is speedy enough for the job."

"Why, sir, that girl can write two hundred words per minute."

"She may be able to write two hundred words per minute. But she has to stop about two minutes to each hour looking it up to see how it is done."

Trouble Makers

"I am in the paper when a doctor says outdoor life is healthy," remarked a man.

"Then you oughter live a thousand miles," said New Orleans.

CLEARING SALE!

We are closing out our entire stock of Men's, Women's and Children's summer shoes and slippers at prices which are the lowest on record.

A DOWNERS GROVE MAN'S EXPERIENCE

Results Tell the Tale.

Can you doubt the evidence of this Downers Grove citizen? You can verify Downers Grove endorsement. Read this:

C. C. Reese, collector for C. B. & Q. R. R., Parkway Ave., Downers Grove, says: "I suffered greatly from pain in my back. The kidney secretions burned in passage, showing that my kidneys were weak. The jarring and jolting to which I am subject on the road, no doubt caused the trouble. Hearing about Doan's Kidney Pills, I procured a supply and after taking the first box, I got relief. A continued use fixed me up all right. I now keep a box of Doan's Kidney Pills on hand." (Statement given March 4, 1907.)

THE BENEFIT LASTED

On March 29, 1915, Mr. Reese said: "I have had no headache or kidney trouble for several years and I am confident that Doan's Kidney Pills cured me. They are the best kidney medicine I know of."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Reese had. Foster-Milburn Co., Props., Buffalo, N. Y.

ORIGIN OF GREAT ARTS.

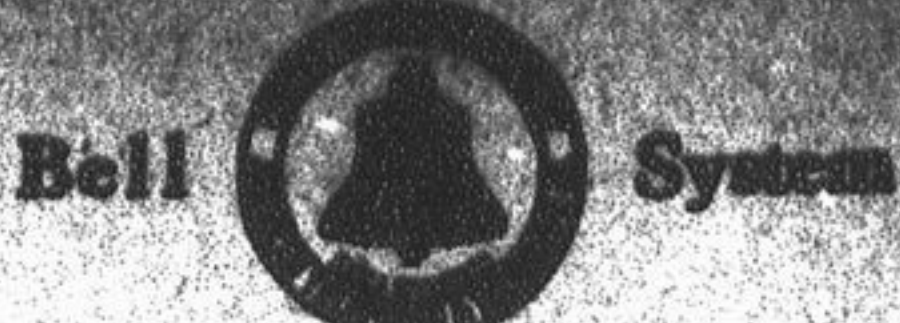

Gunpowder was discovered from the falling of a spark on some material mixed in a mortar. Pendulum clocks were invented after Galileo stood observing the lamp in a church swinging to and fro. Electricity was discovered by the observation that pieces of rubbed glass attracted small bits of paper. The stupendous results of the steam engine may be traced to the boy who sat watching the steam which came from the mouth of a tea-kettle. The art of printing took its origin from some rude impressions taken, for the amusement of children, from letters carved in the bark of a beech tree. The telescope we owe to the children of a spectacle maker, who placed two or more spectacle glasses together and looked through them at the distant sky. Their elders saw them at play and adapted their idea. Sir Isaac Newton saw an apple fall to the ground. Thinking on the phenomena, he discovered the law of gravity.

Monster Whale's Dairy Diet

The blue or sulphur bottom whale is one of the largest animals that has ever existed on earth. Although its mouth is so large that a dozen men can stand upright in it, its throat is only nine inches in diameter. Another curious thing about this enormous creature is that its diet consists chiefly of the crustaceans—shrimps three-quarters of an inch long.

Most Valuable Fur

Sea otter is the most valuable fur at present. Russian sable is next in value, with silver fox nearly approaching it, although when the size of the skin is considered the sable is infinitely greater in value.

Give the little crank a quick turn when you wish to attract the operator's attention. If the operator does not answer, wait thirty seconds and try again.

You may not get the operator's attention by the slow, continued turning of the crank, as it sometimes fails to operate the switchboard mechanism; neither do you gain anything by continued rapid turning.

One quick turn insures a prompt response from the operator and the best results from the service.
