Friday and Saturday Nights at the High School Assembly Hall Is Time and Place.

Next Friday and Saturday nights the senior class of the Downers Grove high school will present the annual

The title this year is "The Merchant of Venice, Up-to-Date," and is bound to be funny to the audience. It is a burlesque on the famous play h Shakespeare in which the modern school life and football games are por traved under the style of the play.

The seniors have been working hard on this play under the direction of Miss Edsall, and it promises to be very easy to watch.

#### EASTER MATINEE GREATLY ENJOYED 4019

The Easter matinee at the Metho dist church on Saturday afternoon was dience of the music lovery of the vil lage. This is an annual affair given under the anspices of the Philanthropy Committee of the Civic Department of the Downers Grove Woman's Club and the proceeds are used to further this cause in this vicinity. It is alway generously patronized and was a most

pleasure to the audience. Our own Mrs. Genevieve Puffer Reid read a story of Tolstoi that was most appropriate to the Easter season and as in days of yore when Mrs. Reid appeared before a Downers Grove audience she was received with the great-

est appreciation. Mr. B. C. Kellogg followed Mrs. Rold with a well rendered tenor solo, with Miss Grace Towsley at the plano and Miss Avis Lempke with a violin of chgate by Miss Engelschali, gave the beautiful contralto prayer from "Life Everlasting." Miss Lempke has a voice of rare beauty and sags with such sincerity and simplicity that her number on the program was one of the finest of the afternoon.

Towsley was the accompanist. Mrs. Reid then read one of Whittier's beautiful poems and the gram closed with Mrs. Rasweiller's solo, with Miss Roe at the organ. Mcs Rasweiller is well known as one of our best singers and sang with great feeling the "Peace Song," words by Mrs. Benlah Jenness. We take pleas ure in printing the same.

Cables Contain Much Wire.

It is estimated that the total length of wire in the sheathing and core of the world's cables made since their introduction in 1857 is sufficient to reach from the earth to the moon. Where the sen is about three miles deep, and the ship is steaming at its usual rate, in paying out a new line, it has been found that over two and a half hours pass before the cable reaches the bed of the sea. By the time the cable has settled to rest the ship is 25 miles away.
