Most Famous Nickname.

Of all American nicknames the most famous is "Stonewall." Not more than one person in ten knows what Jackson's real name was. The general did just the reverse of Stephen Grover Cleveland, Thomas Woodrow Wilson, Isaac Wayne MacVeagh and others who cut off one of their names. Jackson added one to his when he grew to manhood; but nobody calls him by either of them. It is always "Stonewall."

Hot Water Pipes Burst. Plumbers have asserted that cold water pipes suffer comparatively little damage from freezing, and that frozen pipes of the hot water system burst four times as frequently. Recent tests seem to justify this conclusion. The tubes of boiled and unboiled tap water in equal number were exposed to several times to varying temperatures below freezing point and the boiled water tubes invariably broke first, while at the end of the experiments all of these had burst and only four of the unboiled water tubes. The boiling water formed clear, solid ice. The boiled ice filled with air bubbles that floated, like cushions, on the water caused by freezing.

Irish Blarney. An Irish magistrate, one of the old school, was summing up a case in a Dublin court. The plaintiff was a handsome woman and her good-looking daughter was one of the witnesses. "Gentlemen of the jury," said his honor, "everything in the case seems plain—except, of course, Mrs. O'Toole and her charming daughter."—Boston Transcript.

Muzzle the Snore. Persons who go about without kerchiefs of the nose to use for coughing and sneezing in public places are the distributors of colds, influenza, headaches, fevers and sometimes pneumonia and death. Sneezing, coughing and sneezing without using a kerchief to protect others against you as a filthy creature, and to be a nuisance to the community, is a health offense.—Chicago Health Officer.

LISLE CONGREGATIONAL CHURCH.

Work has been started on the remodeling of the Lisle church. It is planned to construct a basement with

The exterior of the church is to be of stucco. The new church is to be equipped with up-to-date heating and lighting systems.

MARGUERITE CLARK PLAYS TO 440,000 AT KANSAS CITY IN "SNOW WHITE."

The biggest photoplay party that has ever been presented in any city in the world, was put on by the Kansas City Star, one of the most prominent newspapers, in the gigantic convention hall, which seats over 20,000 people. The picture was shown for two days, mornings, afternoons and evenings, with each performance following the other as fast as the hall could be emptied and the next audience seated. Eleven performances were given each day, the picture being run almost continuously, filling the auditorium to its capacity at each showing.

Four screens were set in the center of the gigantic auditorium and eight projection machines, two for each screen, were used in presenting the most fascinating and daintly artistic photoplay ever screened, "Snow White." The pictures on all four screens were shown simultaneously and perfectly timed.

The Kansas City Star chose from the entire field of motion picture classics the Famous Players-Paramount screen version of Grimm's most popular fairy tale "Snow White" to supply entertainment to these people during the two days' fete. Kansas City has never before seen such a sight.
