SELZNICK PICTURES

CLARA KIMBALL YOUNG in her recent "The Common Law"

The big Selznick feature. A big seven reel super-picture with the screen Star of Distinction. The Play and Star that we have all been waiting for. Few photoplays have attracted so much attention as the Common Law. The characters in the story are a distinct Metropolitan type of unusual interest and it is one of the seasons big successes.

HERMAN KOSS KILLED BY "Q" TRAIN NEAR HINSDALE

Herman Koss, of 116 Summit Street, was struck and instantly killed by the 1:34 east bound passenger train yesterday afternoon.

Mr. Koss was employed as a section hand by the Burlington and was working with the crew near Hinsdale when the accident occurred. Coroner Hopf has been notified and will hold an inquest at 1:00 o'clock today after which the body will be brought here for burial.

Love's Millionaire.

Even though you are poor in pocket you may be rich in heart. Love is well as the stock exchange, has its millionaires. But the difference to be noted is this, that the millionaire of the heart is the one who gives the most love, not the one who receives most. Spiritual wealth all comes by giving.—Exchange.

The Beauty of the Banking Business.

The lady bank clerk had completed her first week and a friend asked her how she liked the work. "Oh, it's beautiful!" said the girl. "I'm at a branch where nearly all the people we know have accounts, and it's so nice to see how little money some of your friends have in the bank."—Manchester Guardian.

The Limit of Music.

Little Andrew is a clever little chap and possesses a very sweet voice. The other night, therefore, he was chosen to sing at a hobo concert in London and obliged them with an old favorite, "Kathleen Mavourneen," which he sang very sweetly indeed. His rendering of one line, however, "The horn of the hunter is 'eard on the hill," jarred very much on one man's nerves, and when congratulating him afterward he mentioned that he really ought to put a few "hitches" in now and then. "Gara!" said Andy, eying him with pity "don't show yer ignorance—don't yer know there ain't no H in music! It only goes up to G!"

Photographic Invention.

Capacity, compactness and mechanical simplicity are a few noticeable features present in a refined model of a photographic printing apparatus that has lately been completed by a Western inventor. The machine is intended to facilitate the handling of large commercial orders by speeding the work without lessening its quality, and by materially reducing labor costs. With it as many as 10,000 prints of various sizes can be run off in a day's time.—Popular Mechanics Magazine.

Item. Loss of Temper.

Mr. Fussenfret overslept and rose in haste and ill-humored. In hurriedly dressing he broke a shoe lace. He sat down to breakfast and snapped at his wife. He left without saying good-by. Mrs. Fussenfret snapped at the dog. The dog snapped at the neighbor's child and the neighbor's child's father snapped at the policeman. The policeman shot the dog. The dog cost \$25. The whistling cost two and one-half cents.—Brooklyn Eagle.

Treating Maniacs With Water.

The modern physician is nothing but a water man, according to an article by John E. Lind, M. D., in the Popular Science Monthly. There are three ways of giving the water treatment—by the pack, by the "Scotch douche" and by the continuous bath. All three methods are meeting with notable success.

Why the Cat Was Worshipped.

The worshiping of the cat by the Egyptians has been attributed to the fact that where there were cats there was no bubonic plague. The ancients did not think quite far enough to realize that where there were cats the rats were scarce and so went on worshipping the cat, supposing that it was the animal's supernatural power which saved them from the plague.

Misspelled.

"So you were invited to participate in a profit-sharing scheme?" "Yes." "How did you come out?" "I discovered that the purpose of the scheme was not sharing, but shearing."

Real Foresight.

Wills—"So your chamber of commerce is going to put your town on the map? No doubt you will get some large manufacturing plant to locate here." Gills—"No, we are going to persuade some well-known prizefighter to be born here."—Life.

Similar Experience.

"I wonder how it feels to be held for ransom?" "It isn't at all pleasant," said the absent-minded man. "I had to ride around on a street car the other day until I found somebody to pay my fare."

In Words He'd Understand.

She (to her author-sister)—"Our rejection does not imply lack of merit, but an oversupply of similar material."

Not His Fault.

Percy—"Poets are born, not made." Pearl—"I know, poor dear! I wasn't blaming you."

LOCALS AGAIN TRIM NAPERVILLE ACADEMY NINE

The local high school nine took a trip to Naperville and trounced the Northwestern Academy squad. The game was fast and free from many errors. The Academy boys got the jump on the locals by slipping five tallies across in the first inning by a single, a pass and a home run. With two on bases, James stopped to the plate and lifted a long fly to left-center, far out of the center fielder's reach, and cleaned the bases. The locals tallied three in the first frame by several singles and walks. Only three Academy men appeared at bat in the second inning, all being retired at the initial sack. The locals tightened up for the remainder of the game and hits came few and far between. Jorgensen allowed only seven hits during the entire tilt. Most of the runs scored by Academy were made on errors. The "Purple" counted three runs in the fourth, two in the fifth, and three in the sixth on four hits, one being a two-base hit. The Academy boys showed signs of winning in the final round when three runs were scored. The first two men hit safely to left field and after making a double steal, Umbright reached second on an overthrow, the other two men scoring. A double play, DeWitt to Butler, ended the game, the "Purple" leading by 15 to 12 score. Credit must be given Jorgensen for his good hurling as he had the Northwestern sluggers baffled at all times. The locals registered 12 hits to the same obtained by the Academy.

Following is the box score:

The High School wishes to thank Mr. M. B. Downers for the use of his large flag and also Mr. Wolfe for permitting the High School to use his ferns as a means of decoration at the concert held last Friday evening.

The Managerial Mind.

"What made you tell the manager that the ideas in your play were not original?" "Because if I'd told him they were original, he would have taken it for granted that they were no good."

Evils That Are Necessary.

"It's what's a necessary evil?" "One we like so much we don't care about abolishing it, my son."

The eggs produced in Petaluma, Cal., district and shipped to market or hatched by the hatcheries amount to fifteen or sixteen million dozen a year, worth probably \$4,000,000.

Growth of Mahogany.

The rate of growth of mahogany is shown in southern Nigeria, where the site of a town destroyed 60 years ago has been covered with a forest containing mahogany trees, some of which were found to be more than ten feet in diameter.

Vanilla in Roots of Oats.

Vanilla, the active principle which makes vanilla ice cream so popular, has been found to occur in the roots of oats and the leaves and roots of a number of plants.

Not United States Invention.

It is generally thought that the popular split bamboo fishing rod is a United States invention. This is an error, for the first split bamboo rod was made of three pieces "rent and glued" by William Blacker of London, England, and placed on exhibition at the Crystal Palace in 1851, while the first made in the states was the work of Sam Phillip, a gunmaker of Easton, Pa., about 1880.
