Painfully Sudden.
 When you are gone you may be forgotten as soon as the defeated candidate for vice president, and that is painfully sudden.—Arlinson Globe.

TWENTY-TWO YEARS AGO IN THE REPORTER

(From the issue of May 24, 1895.)
 Mr. and Mrs. M. E. Escher have recently returned from a years visit in Colorado, most of their time being spent in the vicinity of Leadville.

At the annual meeting of the Congregational church last Wednesday evening Mrs. G. T. Hughes and Mrs. Wm. Colwell were elected trustees; N. B. Zinkan, F. C. Lacey and D. G. Graham, deacons; Miss A. U. Elliott, church clerk; John Graves, auditor, and Mrs. Zinkan and Mrs. Edwards, musical committee.

One of the oldest and most successful business men of Downers Grove Warren Rogers, who established his business here in 1861, has disposed of it to Mr. F. A. Brode, of Bureau County, and this week retires from the active mercantile field, to take a well earned rest. Mr. Brode has moved his family here and they are pleasantly situated in the Barnhart residence on North Main Street.

Died—at her residence in this city, on Thursday, May 16th, Mrs. John Boldebeck, aged 59 years. She has been a resident of Downers Grove since 1869 and leaves to mourn her loss a husband and two grown children.

Died—at his residence on the north side last Friday night at 10 o'clock, Mr. J. D. Millett. A wife and three children survive him. The remains were taken to Iowa City, Iowa last Saturday for interment.

Miss Roberta Rockwell and Mr. E. S. Rose, an employee of the C. B. & Q. were united in marriage, in the presence of relatives at the M. E. church at three o'clock Wednesday afternoon, May 15th, by Rev. A. E. Saunders. Afterward, Mr. and Mrs. Rose, accompanied by some of the wedding party as far as Chicago, left for Denver, Colorado on a honeymoon trip, taking with them their bicycles, in order to view the surrounding scenery.

Getting Worried.
 Clarence constantly played with Marguerite, one of twins, until his parents teased him about his "girl." One afternoon Clarence's mother was sitting on the porch. Clarence, Marguerite, and a few other children were playing in the yard. Suddenly he left the group and coming to his mother said: "Mother, when you marry a twin, do you have to marry both of them?"

Sponges in Australasian Seas.
 Sponges are known to be very abundant in the Australasian seas, especially in this case with the horny or highest form of sponges.

The Traitor.

The greatest tragedy ever enacted will be the subject for study and discussion at the close of the morning service in the Methodist Church Bible School next Sunday, June 3rd. The men of Downers Grove are especially invited to take part in this discussion. The school has a special class just for men and if you come you may rest assured that you will receive a hearty welcome, we need you, come and help make this study a success. It cannot be done without your help, and this applies first of all to members of the Methodist Church.

 DOWNERS GROVE, ILL.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly falling to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, taken internally and acts through the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Cure fails to cure. Send for circulars and testimonials.

THE WHY OF THE LIBERTY LOAN

Press Matter Prepared By Publicity Bureau.

The Government of the United States has two methods of raising money. One is by taxation. The other is by the sale of bonds, which is a method of borrowing money. The Government bond is the printed promise of the Government to pay back the borrowed sum of money at a certain time, and to pay interest on it at regular intervals until it is repaid.

The Government borrows money in this way only after it has been given the right to do so by act of Congress approved by the President, and the terms of the loan are set out in the act.

Back of the promise of the Government stands the honor of the Government and all its taxing resources. Really the whole wealth of the Nation stands behind this solemn promise of the Government to pay.

This makes a United States Government bond the safest investment in the world. If the bond of the United States Government is not safe, no property in the United States is safe. If the United States cannot pay its bonds, it is hardly probable that it will be able to protect the citizens in their other rights.

The Liberty Loan Bonds of 1917 are especially attractive investments. Not only have they this absolute safety characteristic of all United States bonds but they are tax free not only from all existing taxes but from any war tax that may subsequently be levied. No State, city or county may tax them. The inheritance tax of the United States and of some of the States of the Union may affect them, or rather, affect their transfer after death of the owner by will or by inheritance.

Another advantage these Liberty Loan Bonds possess is that if the Government issues bonds later on in this war at a higher rate of interest the holders of Liberty Loan Bonds will be allowed to exchange at par their bonds for bonds paying the higher rate of interest.

 patented. It is this new and improved machine, which has been installed in our office.

It is our hope that every person in Downers Grove, who wishes to see this wonderful machine work, will accept our invitation to drop into the office and see the "slugs" cast. We will endeavor to explain its workings more fully at that time and will be glad of the opportunity.

MAN IS WORTH 1,000 EGGS
 Same Ingredients Are to Be Found in Both—Valued at \$2.45 for Illuminating Purposes.

What is a man? How much is he worth from a scientific viewpoint? According to one way of looking at it man is worth about \$2.50 a day from his shoulders down and anywhere from \$50,000 to \$1,000,000 a year from his shoulders up. This is said to be the estimate of the average successful business man.

The scientist, however, looks at the question from another angle. According to him a man is worth \$2.45 for illuminating purposes, since a man weighing 150 pounds contains about 3,500 cubic feet of oxygen, hydrogen and nitrogen in his constitution, which at 70 cents per 1,000 cubic feet equals the price above. Also a man contains enough carbon to make 9,800 lead pencils; enough phosphorus to make 800,000 matches or enough to kill 500 persons, and enough water to fill a 38-quart reservoir.

Furthermore, it makes no difference how sour a man may look he contains about 80 lumps of sugar, a great deal of starch, chloride of potash, magnesium, sulphur and hydrochloric acid in his system. There are 50 grains of iron in the blood of an ordinary man, enough to make one spike large enough to hold his weight.

What is a man? This is the somewhat cynical answer of one scientific man: "Break the shells of 1,000 eggs into a huge pan or basin and you have ingredients from which to form a man from his toenails to the most delicate tissues of his brain."—Popular Science Monthly.

Real Beast of Burden.
 The burro can generally get away with anything that can be strapped to him. Sometimes he is called upon to move the entire possessions of a family—and he does it. He is the only animal in captivity that can climb a cliff with a cookstove, a mattress, a trunk, a washtrub, two frying pans, the family Bible and a couple of lengths of stovepipe tied to his back. At times he seems almost buried beneath his burden and it is rather startling for the stranger to see a load ambling cozily up a hill without any visible means of support.—Los Angeles Times.

Nothing New Under Sun.
 The strings of blue beads that the modern girl dons to ward off bronchitis are merely new versions of the strings of blue beads worn in Egypt 1800 years before Christ to keep diseases of the chest at bay, says a writer in the Philadelphia North American. The tiny sealed bottle of mercury which she carried to ward off rheumatism had its prototype in bottles of a strange odor used in India 20 centuries and more ago.
