Tomb of Mohammed Looted.

Intense indignation has been aroused throughout the Mussulman world by the sacrilege of the Turkish govern ment, which seized the lexels and money which the faithful in the course of centuries have deposited on the tomb of Mohammed. Among these treasures are a large number of precious stones, including the famous diamond known as the "Shining Star," which the Turkish government has carried away. This stone is valued at more than one and one-half million dollars.

Don't depend upon nature to do !! all. Grab a hoe and help her along, as much is demanded of her this year.

"There's a Reason"

DISEASED HOOFS OF CATTLE

One Trouble Caused by Excessive Wet Weather Is Hard to Manage-Is Not Contagious.

Not all hoof disease in cattle is the "hoof-und-mouth disease." There is one form of hoof disease which is especially hard to manage, which is caused by excessively wet weather and cattle having to be almost continually in the mud. We had a case of this kind this spring, says a writer in an exchange. The inner parts of the hoofs become very sore and tender and will finally become rotten, if not cared for

We had a veterinarian prescribe treatment. This was kept up for a time without apparent results for the better. Then being very busy at corn planting time, the treatment was neglected and the animal got so it would walk on the toes, the back part of the hoof was so tender. We again tried the treatment, but the animal got worse and worse until it was a walking skeleton and could no longer stand up, when we put it out of its misery and dug a hole for the remains. We know this was not contagious as the riod he goes into the dry lot for finishleast.

If Both Male and Ewe Are Weak in Some Points Weaknesses Are Intensified in Lambs.

A ram is half the flock, A good ram will impress his desirable qualities on his offspring. The ram must be strong in the points in which the ewes are deficient. It is a well-known fact that like begets like, and i both the ram and the ewe are weak in the same points these weaknesses will be intensified in the offspring.

If the flock is small, a ram lamb any kind of a corn can shortly be will be all right. If there are more lifted right out with the fingers if you than thirty ewes the rum should be will apply on the corn a few drops of two years old. The ram selected will freezone, says a Cincinnati authority, depend upon the type of ewes in the At little cost one can get a small bot- flock. If the ewes are small and tle of freezone at any drug store, which | light-boned, a heavyweight and will positively rid one's feet of every | heavy-boned ram will be needed. A corn or callus without pain or sore | ram with more refinement should be used if the ewes are coarse-boned

Big Crate Built on Flat Rack Enables Farmer to Haul Animals Without Fear of Injury.

The accompanying illustration shown a hog rack devised by an ingenious Illinois farmer and in successful use on his big farm. After severnl years' experience with it he maintains it is the best thing of its kind

on a flot rack. The framework is laid out exactly like a bay rack and the

Heg Crate on Rack.

The picture shows how the trate or

rack was built on this floor. There are two partitions with hinged gates. This admits hauling several different classes of bogs and also prevents the animals from piling up on each other in transit, a difficulty so frequently encountered and sometimes a source of loss. You can put on as many hogs as you can hadl. There is no danger nor particular difficulty. The ordinary loading chute is used,-Farm and Home.

WATER SUPPLY IN PASTURES

Nothing But Absolute Starvation Pulls Animals Down in Condition Faster Than Thirst.

Look to the water supply in the pasture and see that no animal suffers for want of it. Nothing but absolute starvation pulls them down in condition faster than thirst. In the very hottest and dryest weather horses get little good in the field unless they have thickets and woods to stand in, to get away from flies.

TRIM HORSE'S HOOF EVENLY

Best Instrument for This Purpose Is Rasp-Keep Hoof Oiled if It Has Tendency to Crack.

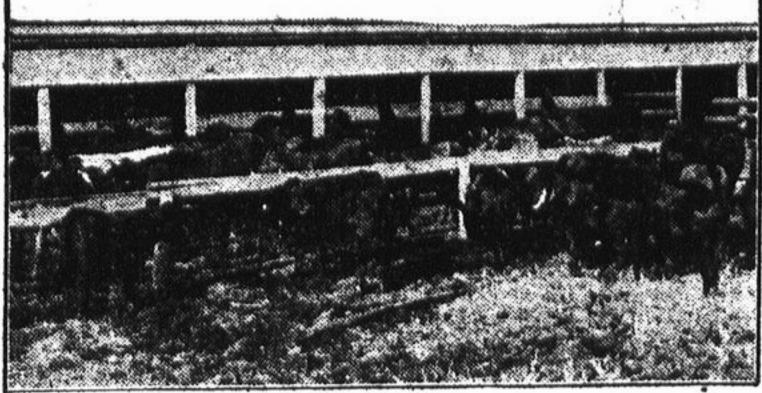

A horse is just as good as his feet. and these should be given special attention; the hoof hears the same relation to the horse that the fingernail does to man, in the matter of care, and should be kept trimmed evenly. The best instrument for this purpose is the rasp. If the hoof has a tendency to crack it should be kept

Way to Keep Hog Well. There is a theory that the way to keep a hog well is to keep him and his food and surroundings clean. Worth trying.

Not Salting Often Enough, The fellow who salts his stock only when he things of it, seldom thinks of it as often as his stock does,

Provide Lamb Creep. Provios a lamb creep so the lambs can be fed an extra ration of grain by themselves.

MANAGEMENT AND FEEDING FOR BABY BEEF

EXTRA FINE GRADE STEERS IN FEED LOT.

ment of Agriculture.)

One of the first decisions that the producer of baby beef should make is whether to have his calves born in the spring or in the fall. At the present time most of the calves on farms are born during the spring, but those who have tried the fall calving plan under suitable conditions, find it possibly more satisfactory. The fallborn calf fits in with pastures somewhat better than those born in the spring. His first summer is spent on the pasture and at the end of this peother cattle were not affected in the ing. On the other hand, the springborn calf must be fed during the first whiter and when the pastures ready usually cannot be placed on them because he has reached the fin-Ishing period and should go into dry lot. Again, the farmer who sells milk will derive greater profit when his cows freshen in the fall, since milk markets are better then than in the spring. An additional advantage Is the fact that finishing culves in the fall and early winter interferes less with other furm work than in the spring and early summer. On the other hand, in extremely cold climates calves born in the late fall will suffer, so that warm barns are a necessity. More feed is also necessary to maintain cows when they are nursing calves, and if this is done in the winter when pastures are not always available, the expense of keeping the herd will be somewhat increased. Furthermore, farmers who buy cows that have been bred to calve in the full must lose six months of service from them if the change is made to fall calving.

Milk for Calves.

It is also necessary for the owner to determine whether the cuives shall have all of their mother's milk or whether any other use is to be made of it. Under the so-called beef system, all the caives are allowed to nurse their dams and the cows are kept strictly for the calves which they produce. Under the system of dou lde nursing, some of the cows are required to suckle two calves and the milk from the others is sold or disposed of in some way. Many herds, take a portion of the milk and the belance is hand milked. This inber, however, and is not practicable discolored or spotted. on the average beef-producing farm. In general, it is said that the beef and the double-nursing systems are the of prime baby beef.

be fed a conservative ration of grain from healthy pods, as seen as they will ent it. In all

At weaning time every effort should be made to get them through without loss of their calf fat. The grain ration should be increased so that the loss of their milk will not be felt, They should also be weared graducows and calves are on grass, and spring-born calves should be weaned, if possible, early enough in the full to allow them some time on grass. After weaning time the feeding and management of the calf depends largely upon the time of the year it is born and the age at which it is to one of the lessons of the past quarbe sold. Suggestive calendars for the ter. management and feeding of both spring-born and full-born calves are contained in Farmers' Bulletin 811. The rations provided for the calves in these calendars consist of corn, cottonseed meal, corn silage, clover hay.

PLANS TO CONTROL BEAN ANTHRACNOSE

Seed Selection Is Most Important -Spraying With Bordeaux Mixture Favored.

LESSON FOR JUNE 24 THE PURPOSE OF JOHN'S GOSPEL

(REVIEW-READ JOHN 21:15-25.)

REVIEW-Read John 21:16-26. GOLDEN TEXT-These are written, that you might believe that Jesus is the Christ, the Son of God; and that believng ye might have life through his name. -John 20:31.

There are a variety of methods to (Prepared by the United States Depart- | of age on crushed grains and after a | be followed in reviewing the work of few weeks may receive whole grain. the past six months and to give variety. Teachers of classes, or superintendents of schools, may select one or combine several, as their judgment dictates. Of course, the easiest way is to procure a good speaker who is ally, the entire process taking from familiar with the Gospel of John and ten to fifteen days. Fall-born calves the lessons of the past quarter, and should not be weared until after the let him bring out in the review its most outstanding and salient features. One method would be to have oneminute talks either by members of the class or persons selected from the school. Each of twelve scholars could be assigned one minute, each to have

> the outstanding and significant verses from the lessons of the quarter, not the golden text, but verses which seem to emphasize the outstanding features and out straw, but other substances of the six months' work. "Behold the may be substituted for them. Lurley, Lumb of God," (Ch. 1:36); "Ye must mito, katir, and similar grains, for in- be born again," (3:7); "Come see stance, may be used in place of corn, man which told me all things that ever though in slightly larger quantities. I did; is not this the Christ?" (4:29) Linseed oil meal, too, is a satisfactory | "Verily, verily I say unto you, he that substitute for cottonseed ment. If heareth my word and believeth on him neither is available, the roughage that sent me, bath everlasting life and should consist chiefly of a high-grade shall not come into condemnation but leguminous hay. When available, out is passed from death unto life," (5: straw should be kept before the 24). "I must work the works of him calves at all times, not because of its that sent me while it is day; the night nutritive value, but because of its cometh when no man can work; "I am slightly laxative and alterative ef the light of the world; "He is of age. let him speak for himself; "One thing I know, that, whereas I was blind, now I can see." Thus go on through the Gospel and take the significant texts in this way. It will not do to take too many texts or go over too many verses, or perhaps cover all of each verse.

Another method of review would be, particularly in the adult 'classes, to have each lesson with its present-day emphasis. For instance, the past quarter: Lesson 1-The Christian in his dealing with blindness. Lesson 2-Modern wonders of healing and medical missions, Lesson 3-The shepberding of church members. Lesson 4 -Do we know how to give? Lesson b -- Is Christ supreme in our national life? Lesson 6-Ambition and its cure. Lesson 7-The world's good springing from Christ. Lesson 8-Temperance reform, Lesson 9-The Holy Spirit in everyday life. Lesson 10-How Christ is betrayed and denied today. Lesson Lesson 12-Why men believe in im-

A good method of review would be to have someone take up each of the golden texts, announcing it in advance that pupils may be prepared for this method. The teacher would write the texts of the quarter, each on a separate piece of cardboard, and lay them face down on a table; pupils would then draw the golden texts, one at a time, and tell what the lesson is to which this text belongs, giving as full an account of the lesson as possible, the teacher helping out with questions where necessary.

It will be of great value to the pupils if they can get in this review a clear outline of the main events of ('hrist's last weeks upon earth, covered particularly by the past quarter. There are forty standing events of the past quarters: (1) The healing of the man born blind; (2) Jesus the good Shepherd; (3) Jesus sending forth the seventy; (4) Jesus in Beren; (5) The raising of Lazarus; (f) The ten lepers healed; (7) Bartimaeus at Jericho; (8) Jesus visits Zaccheus; (9) Jesus anointed by Mary; (10) The fig tree; (11) Triumphal entry; (12) Cleaning the temple; (13) Weeping over Jerusalem: (14) The widow's mite; (15) The Greeks seek Jesus; (16) Preparation for the passover; (17) Washing the disciples' feet; (18) The Lord's supper: (19) The farewell discourse; (20) The farewell prayer: (21) The agony in Gethsemane; (22) Judas betrays Josus; (23) The arrest of Jesus; (24) Peter denies Jesus; (25) Jesus before Ananias; (26) Jesus before Caiphas; (27) Jesus before the Sanhedrin: (28) The mocking of Jesus; (29) Jesus before Pilate; (30) Jesus before Herod; (31) Pilate conderans Jesus: (32) The sorrowful wait; (33) The crucifixion; (34) The seven last words; (35) Jesus dies; (38) Burial; (37) Resurrection; (38) Appears to Mary: (39) Appearance during the forty days; (40) The ascension. As brought out heretofore, John

sets forth the purpose of this Gospel; namely, that "Jesus is the Christ, the Son of God, and that believing on him we might have everlasting life, eternal life in his name." (See golden text). Whatever method be the review, we must constantly keep before us the idea to make Jesus as real as if we were with him as his disciples. The word is now dwelling among us "full of grace and truth, giving daily of his fulness and grace for grace." Jesus exhausted the language in giving us comparisons and similles; he is the way, the truth, the life, the bread, the shepherd, the door, the water of life; some attribute, some manifestation of his life, for he was the way; he himself is the life, the source of life, the life itself; the true life on earth and the eternal life which is to abide forever. The entire review centers about Jesus Christ. A man would be

fession are indiguant at the fact that medical students have not been ex empted from military service under the compulsory-service bill, although theological students have been exempted. The need for a supply of physicians, of course, will be increased Too II to by the war, which will take many of them to the front. Keeping enough doctors at home to take care of the civil population is one of the perplexing questions faced by the council of national defense. Also, the number of students in this country has been reduced in recent years by the strict standards imposed upon schools, which has put many of them out of business and increased the length of time required for a physician to qualify for
