To Make a Cheap Filter.
In order to make a cheap filter, take
a large flower pot and stop the hole in
the bottom of it by placing a piece of
sponge in it. Cover with a few inches
of powdered charcoal, fill with water,
and let it stand over a pail or tub
supported by two or three sticks laid
across. The water filtering through
the charcoal will be freed from all
impurities and will be fit for family
use. The charcoal should be changed
every three months and the sponge
several times a year.

What's the Use?
It's mighty hard to live with folks
who don't enjoy living, and there's no
use trying to give people the kind of
truth they aren't used to.

Shoes that Stay Comfortable

You need not necessarily sacri-
fice style to get shoes that
will stay comfortable. But
you must be sure that you
are properly fitted, and pro-
per fitting is an art that we
have mastered in a highly
commendable manner.
