Horse's Jumping Powers.

If the reader will carefully measure out 39 feet an idea of a horse's capacity in this direction will be gathered. Ruch a distance a steeplechase horse called Old Chandler is reported to have covered at Warwick many years ago: and there is more than one apparently authentic record of a horse clearing ever seven feet in height. The scene of such an exploit was at the Phoenix park, Dublin, and the horse was called Turnip. The animal belonged to Sir M. Crofton, and the duke of Richmond, then lord lieutenant of Ireland, wagardi £500 that this height could not be cleared. A wall of the requisite dimensions was built, and when finished Turnip was ridden at it. He did what was asked of him in perfect style, but it happened that his grace, not knowing that the feat was ready for performance, was not looking when the jump was made, and Turnip was therefore ridden over it again, not only successfully, but easily. -- London Tit-Bita.

He was Supervisor of Assessments. himself one of the most indolent of men. It is said that he was too lasy to stretch out a hand to pick a peach from the wall, but simply stopped and pecked at it where it hung. But whethor that is a libel or the truth, it is certain that most of his poetry was composed in a recumbent position. He foolish enough to spend it.—Boston always wrote best in bed!
