Dropping Razor on the Hand.

It is claimed that the finest strop for a razor is the fleshy part of one's hand below the little finger. If it is a safety razor blade grasp it between the thumb and first finger of the right hand and strike finger nail and blade at the same time on the fleshy part of the left hand. If you will do it slowly at first the motion becomes automatic. A little vaseline on the cutting edge is said to keep the blades constantly in first-class condition.

**AN EDITORIAL REVIEW**

The Aurora-Beacon News said:—"If Fred E. Sterling, editor of the Rockford Register-Gazette, handles his own campaign for State Treasurer with the ability and enthusiasm he displayed as Chairman of the Republican State Central Committee, he should have no difficulty in landing under the wire with all opponents distanced. The state political pot already has a fire under it and before long it will boil merrily. By getting in early Editor Sterling is taking advantage of a well-known factor in politics. We do not recall in our time a state campaign more capably handled than that of 1916, when Hughes and Lowden received the largest percentage of the total vote ever recorded in the history of the state. During every minute of that campaign Mr. Sterling was out on the firing line leading the attack. He is a fine fellow, a capable editor, an energetic politician and is square as a die. Success usually lopes along beside a man of that character."
