Are You an Ant or a Grasshopper?

Remember Aesop's story of the Ant and the Grasshopper? How the Grasshopper sang all summer long with no thought of the coming winter, while the Ant worked and stored up a supply of necessities for use during the cold weather? If you do you'll also remember that the Grasshopper froze to death while the Ant lived to enjoy life for many moons thereafter.

SPRAY FOR THE CABBAGE PEST

I have been making a speciality of onions and cabbages but have been much troubled with green worms. I have tried different formulas but have now found one that I have never seen in print. It is doing me more service than any I have tried. Here it is: Take a half pint of crude or raw petroleum oil and add a half teaspoon of potash. Shake these well together. To this add 10 gallons of water and a little paris green or arsenate of lead. It will kill the worms and will stick to the leaves until the cabbage grows. I apply this preparation with a compressed air sprayer, throwing it well into the loose heads and over the tender leaves. The preparation mixes smoothly and evenly and will not injure the foliage in any way. It must be thoroughly mixed to be effective.
