SUNDAY SCHOOLS PLAN TO PICNIC TOGETHER AGAIN

Last Tuesday evening the Superintendents of the various Sunday schools in Downers Grove, held a conference for the purpose of discussing the advisability of holding a Union Sunday school picnic. All of them were heartily in favor of the proposition and there was every indication that the plan would be endorsed by every Sunday school in the village.

Gas Masks for Horses Are Being Sent to France

The Gas Defense Service is now manufacturing about 5,000 horse gas masks per day. These are being sent to France, and it is expected that within a short time every horse connected with the American Expeditionary Forces will be equipped with the new masks.

Browning Machine Gun Passes Tests for Airplane Use

The Browning machine gun has successfully undergone a test to determine its value for use with aircraft. This is one of three types of machine guns with which the rate of fire can be synchronized with the revolutions of the propeller of a tractor airplane that the gun can be fired by the pilot of a combat gun through the revolving blades.

Bands Enlarged and Bugle and Drum Corps Organized.

Acting on a suggestion of Gen. Pershing an order has been issued increasing each regiment's band from 28 to 50 members. Band leaders having had more than five years' military experience as band leaders will be made first lieutenants; those with less than five years' experience will be made second lieutenants.

Increase in Army Since Start of War More Than 1,500 Per Cent.

One of the interesting developments of the war, according to a statement authorized by the War Department is the rapid expansion of the various bureaus of the War Department. At the outbreak of the war there were less than 3,000 employees on duty. The number now is approximately 25,000, an increase of 800 per cent.

While this represents a tremendous expansion, the increase in the Army itself has been more than 1,500 per cent.

Only 4 out of every 100 officers in the service were in the Army at the time the war began.

The increase in personnel at the administrative end of the war thus has not kept pace with the growth of the Military Establishment.

Arrangements have been made for a reduced railroad fare of approximately 1 cent a mile for soldiers and sailors who desire to visit their homes before going overseas.

The restriction on the importation of crude rubber has been followed by restrictions on importation of four commodities possessing some of the characteristics of rubber, and capable under some circumstances of being used as substitutes for natural rubber.

Increased demands for common labor are shown by a recent employment survey by the United States Employment Service. Fifty-three centers have calls exceeding the present supply, while but three cities, all in the West, report a surplus.

In March and April the Secretary of Agriculture on recommendation of the Office of Public Roads and Rural Engineering, approved 212 State road-building projects involving more than 2,500 miles of highways under the Federal aid road act.

Bottlers of soft drinks in the United States may save approximately 50,000 tons of sugar annually by using other sweetening materials, according to investigations by specialists of the Bureau of Chemistry, United States Department of Agriculture. The Bureau of Chemistry is preparing to furnish bottlers with sweetening formulas that will allow the actual sugar content in soft drinks to be cut to 50 per cent or less and at the same time will preserve the customary taste of the beverages.

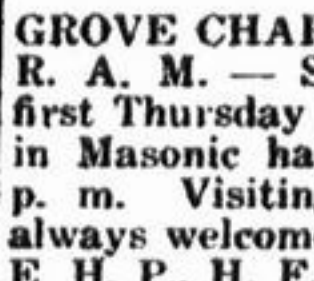

NOTICE TO FARMERS

It has come to the notice of the State Council of Defense through various sources, and particularly through the Food Production and Conservation Committee that there has been throughout the State an effort to create the impression that the State Council of Defense is promoting the use of an especial make of farm tractor. Such efforts are wholly without warrant.

LODGE & CLUB DIRECTORY
