Organizations

Choir, Wednesdays at 7:45 p. m. Woman's Guild, every other Thursday.

Altar Guild, first Monday of the month. Woman's Auxiliary, second Tuesday of the month.

Finance Committee, second Tuesday in the month.

MUSICIANS HAVE LONG LIFE

Reasons Why Those Who Fughish Us With Sweet Sounds Are Not Cut Off in Youth.

Investigations made recently by a well-known doctor lead him to conclude that musicians who play wind instruments are exceptionally long lived.

Cornet players are credited by him with an average life of 69.1 years. Clarinet players are next with 64.4, while the average oboe and bassoon player lives to be about sixty-three years old. The lowest duration of life by these players of wind instruments is in men who handle the flute. Because of the formation of their instruments, they do not have opportunity for full exercise of their lungs. Therefore the flute player, according to this authority, reaches an average age of 61.2 years.

It is interesting to observe the number of seemingly aged men who are members of orchestras. The theater orchestra that does not number one or two men who have left their hair far behind with the years, or are so gray that they appear well upon the century mark, is an exception. The truth is that a steady and moderate daily use of the lungs, which is called for by the performance of professional duty, is responsible for this remarkably high average of existence.

Why Iron Chimney Stacks Corrode.

The cause of corrosion of galvanized iron extensions to chimneys is laid generally to condensation which forms inside the stack, and which in conjunction with the carbon which has been deposited in use, creates a galvanic action which soon destroys the zinc coating and finally eats through the iron or steel base. To prevent the condensation an air space around the stack is recommended. The stack is made double from the base to a point close to the top, with small iron braces between the inner and outer casings. These may be riveted close to the ends of the sheets in course of construction. The air space may be one or two inches, according to size of stack, and local conditions.—Scientific American.

QUAINT OLD INDIAN COINS

So Adulterated That They Were Not Even Accepted in England as Value in Metal.

In 1906 the independent state of Hyderabad, India, obtained a modern mint and called in the coins that had been current up till that time. The old mint of Hyderabad was little more than a coppersmith's shop in which scrap copper of all sorts was melted up, hammered into plates, cut up into very rough approximations of one tola in weight, and stamped between dies, one of which was in the anvil and the other in a toll held in tongs. A blow from a sledge hammer made the impression. There was no regularity in shape, weight or stamping, nor was the metal uniform in quality.

The mint could not furnish supplies fast enough, and licensees were loaned to coppersmiths to assist in production. Naturally, the Scientific American states, nonlicensed persons began to manufacture, and adulteration with lead was so flagrant that when several tons of these coins were sent to England as old metal they were returned on account of their impurity and were finally worked up into brass for local consumption. A "dub," if held in the flame of a spirit lamp, would before it reached red heat begin to discharge very fine jets resembling mercury; the lead, having reached its fusing point, burst from the copper with a force indistinguishable a very high internal pressure.

TWENTY-TWO YEARS AGO IN THE REPORTER

Creamery butter 20c; fresh eggs 10c, at Bateman and Palmers.

Miss Lillie Warren of Chicago called on her aunt Mrs. D. H. Naramore Monday afternoon.

W. J. Herring has fifteen mechanics employed on the Hinsdale school building. He will finish the job there next week.

G. H. Bunge returned Sunday from his tour through the west to the Pacific coast. Mrs. Bunge stopped off at Santa Monica beach, where she will remain for a time.

A sunflower one foot across is considered pretty large, even out in Kansas, but W. C. Bartle raised one of these gaudy blossoms this year that measured 14 inches in diameter, with the yellow petals off.

The man who "wants a paper without much politics in it" for the next few months can take his choice between sandpaper, wallpaper and fly paper. He will have to drop the newspaper. A newspaper that will have no politics in it until after election would not amount to much in the eyes of the people generally. Publishers of newspapers must give the people what they require or they will find no sale for their production.

Bells, cat calls, cow bells and horse fiddles tear citizens of Hinsdale from the arms of morpheus nightly. Wheelmen and wheelwomen are taking vengeance in their own hands and wreaking it upon the heads of the town council. It's all because that body of wise men the other day ordered the enforcement of an ordinance requiring all cyclists to carry lights, ring a bell or blow a whistle or horn thirty feet from a crossing. People who wear sweaters, golf stockings and will a wheeling go have let pandemonium loose in an effort to have the hated ordinance repealed. The war promises to be a long and merry one, and the price of sleep coaxing drugs has taken a jump in Hinsdale drug shops.

King Bush biked to Aurora, Sunday.

Marriage Announcement On August 5th, at the home of the bride's parents, Glen Elyon, Ill by Rev. H. H. Rood, Miss Berdie Way to Mr. John W. Graves of Downers Grove, Ill. at 4:30 p. m.

MICKIE SAYS AIN'T IT STRANGE HOW SOME GOOD SCOUTS IN THIS TOWN WHO PAY ALL THEIR OTHER BILLS PROMPT AND REGULAR WILL PERMIT THE NEWSPAPER MAN FOR TWO OR THREE YEARS AT A STRETCH?

Guard Your Breath. "A man's breath," says Popular Science Monthly, "is often a betrayer of secrets. He may have been out late, sitting up with a sick friend, but when he reaches home his loving wife at once opens up her battery of reproaches.

"Now comes the news that two inventors in Osceola, Ark., have jointly invented a breath-guard of a new pattern. It is said to be efficient, but not in the manner you were thinking of. It is intended to protect dentists, barbers and physicians from inhaling the germ-laden breath of their patients or patrons. It consists of a small curved shield of glass placed so as to cover the nostrils and held in position by a spring clip gripping the partition wall of the nose on the inside. Many diseases are directly communicated through the inhalation of tainted air, and a device of this kind should be a boon to professional people who are compelled, by the nature of their duties, to be in close proximity to those whom they serve."

Seen Buying on Margin? "You have no reason to be ashamed of your poverty if you acquire it honestly," remarks Life. "But! One may have acquired it honestly enough, but so blamed foolishly as to be mightily ashamed of it.—Boston Transcript.

PUBLIC LIBRARIES AID FOOD WORK

That there would be fewer penalties for violations of government food regulations if people would make more use of the public libraries is the belief of the United States Food Administration.

Do you know the amount of sugar you are entitled to use a week? Do you know how to secure your allotment of sugar for preserving? Do you know the kind and amount of wheat substitutes you must purchase with your wheat flour? If not, your public library can furnish this information.

In addition to valuable works on all subjects from planting crops to the gathering and preservation of them, public libraries can furnish information on food and its regulations which are of vital interest to everyone.

Most Illinois libraries are supplied with government bulletins on food subjects such as substitutes for articles formerly thought indispensable, methods of preparing dishes in novel manners and preservation of fruits and vegetables.

Teach Use of Substitutes. While the government is, during the war, regulating and controlling food in a manner never before contemplated, it is also aiding the public in finding the usefulness of various materials which have heretofore been but little used, and which, in many cases, are better and cheaper than the products previously employed for the same purposes.

For instance, a large manufacturer of ink was using many thousands of pounds of sugar in making the same. His supply of sugar being entirely cut off, he was compelled to find a substitute and was aided by the government in finding a satisfactory substitute which, also, was much cheaper than the sugar, while serving the same purpose.

If you have any such problem as this, go to the public library and you will undoubtedly be assisted in solving the same.

If you should desire to make a "fireless cooker," or an "iceless refrigerator," to raise poultry or hogs, or even bees or Belgian hares in your back yard; to dry vegetables, or store them; to salt fish or pickle meat; to do all manner of canning or preserving; to know what to do for the infant's welfare, or how to feed the family satisfactorily on the "substitutes for meat, wheat, fats and sugar," in fact, to do almost anything to promote or conserve the national resources, your "home library" will be glad to give you the information to read, or the address of the college to which you can write for free literature on the subject.

FOOD VIOLATORS BROUGHT TO JUSTICE

Over 2,000 cases of violations of the United States Food Administration rulings have been investigated during the past three months by the Bureau of Investigation and Enforcement operating under the Illinois Division of the Food Administration.

These violators included wholesale and retail grocers, owners of public eating places, bakers, and milk and ice distributors. As a result of these hearings, \$10,000 has been turned over to the American Red Cross by infractors who disciplined themselves for selling flour in excessive quantities or without the proper amount of substitute, selling too much sugar, serving more bread than they should with meals, exceeding their flour allotment, or overcharging for licensed commodities.

The greatest portion of the contributions came from violators of the 50-50 flour ruling and the limited sugar ruling.

Most of the violators proclaimed ignorance on the changed food rulings, and practically all expressed a desire to co-operate with the Food Administration in every way.

HINTS TO HOUSEWIVES

On "Maximum Canning With Minimum Sugar."

"Maximum canning with minimum sugar" is the latest conservation slogan of the United States Food Administration.

Housewives are being urged to can all possible fruits and vegetables, but to use little or no sugar.

One of the suggestions is that fruit juices be bottled now and made into jellies next winter, when it is probable there will be a more plentiful supply of sugar on hand.

Canning without sugar will be successful if the ingredients are cooked twice as long as usual.

Bulletins on scientific methods of canning without sugar are issued by the United States Department of Agriculture, free of charge, and should be ordered by number. Following is the list of bulletins and the subjects with which they deal:

How to neutralize acid fruit juices with carbonate of lime, sterilize and bottle without sugar.—Bulletin 859.

How to sterilize fruit juice without sugar, bottle for jelly making, when sugar is more plentiful.—Bulletins 839 and 853.

How to make a tart fruit butter without sugar.—Bulletins 853 and 900.

By eating more perishables here at home we may save others from perishing "over there."

CLASSIFIED ADVERTISING

LEGAL NOTICES

State of Illinois

County of DuPage In the Circuit Court of DuPage County October Term, A. D. 1918. In Chancery, General No. 8936.

Walter E. Farrar, Complainant vs. The Village of Downers Grove, Jacob Gloss and Unknown Owners of Lots 1, 3 and 4 of Farrar's Resubdivision of a part of Lot 1, and the South 1-3 of Lots 5 and 6 of Carpenter's Subdivision, being a part of the Southwest 1/4 of Section 7 and a part of the Southwest 1/4 of Section 8, all situated in the Village of Downers Grove, County of DuPage and State of Illinois; defendants, Chancery No. 8936, the requisite affidavit having been filed, notice is hereby given to the said Village of Downers Grove, Jacob Gloss and the Unknown Owners of said Lots 1, 3 and 4 of Farrar's Resubdivision of a part of Lot 1, and the South 1-3 of Lots 5 and 6 of Carpenter's Subdivision, being a part of the Southwest 1/4 of Section 7 and a part of the Southwest 1/4 of Section 8, all situated in the Village of Downers Grove, County of DuPage and State of Illinois; that the above named complainant has heretofore filed his Bill of Complaint in said Court, on the Chancery side thereof, for the purpose of quieting title to the premises herein described in said complainant and for other relief, and that a summons thereupon issued out of said Court against the above named defendants returnable on the First day of the term of the Circuit Court of said DuPage County, to be held at the Court House in the City of Wheaton, in said County of DuPage, on the First Monday in October, A. D. 1918, as is by law required, and which suit is still pending.

Lewis Ellsworth, Clerk. Runge, Harbour & Schmidt, Solicitors for Complainant. 7-19-4t

A Serviceable Piano.

A prominent musician tells some funny yarns.

One relates to his experience in finding suitable instruments when on a tour.

On one occasion at a small place where he was due to appear he inquired where he could hire a piano, and found that the only one available was an ancient looking instrument in a small shop.

He asked if he could borrow it for his performance.

"You could not play on it, leanways, not as it is," replied the owner. "For it's full of holes. Jim," he howled, "where's the inside of this piano?"

And Jim's voice from upstairs, replied: "Ain't it out in the garden?"

Platinum in Spain.

Platinum deposits in the south of Spain, in a mountainous region known as the Serrania de Ronda, are reported to be extensive. The 12 or 14 rivers of the district may profitably be dredged for platinum gravel for some years to come.

New Pleurisy Treatment.

Doctor Auld tells in the British Medical Journal of a chill and fever resembling malaria which he brought on by administering a platinum compound, and which upon subsiding left the patient in a markedly improved condition. He tried the treatment in cases of pleurisy with good result. It is especially adapted to sluggish cases of localized infection with low fever.

Mid-Summer Sale on Oxfords, Pumps and Slippers. Big Reductions on broken lines and small sizes. Some are at Half Price. See our window for Prices Morris Shoe Store, 32 South Main St. Downers Grove
