THE BOYS AT THE FRONT WATCHING LIBERTY LOAN

By Lieut. George Sauvage, Fighting Priest of the French Army, Who Fought in the Trenches More Than Three Years. France did not want war. She did everything that she could in honor do to prevent war, but war was forced upon her by Germany. For four years France has waged this war with her whole soul and now America has come into the struggle with all her power in man and material resources. We are now sure that we can win this war. We have for the last few months witnessed the turning of the tide in favor of the allies, but we should not, however, be led away by our recent successes. Let the people at home understand that they, as well as the men on the fighting line, have to take their share in the struggle. This war is not a war of soldiers alone, it is a war of nations. The front is not "over there" only, it is everywhere. The men over there are doing their share. They are giving their lives. Let the people at home understand that the only business today is to win the war. Let nobody be deceived as to the duration of the war, or conclude from our recent successes that the end is near. We shall win. We are at a turning point. But the end is yet far away. It is my conviction—and all soldiers who have been two or three years at the front, will tell you the same thing, that this war may last two or three years more. Woe to us, if, by false optimism or weakness in our determination, we should come to slacken in our efforts. Our mistakes should have to be corrected with the blood of our boys. The boys at the front are watching this Liberty loan. They shall judge by the amount subscribed of the interest the people at home, in the state, in the county, or town are taking in their efforts and in their sacrifices. They know that when the order comes to attack it is their duty to go and to give their lives if necessary, and they are willing to do it. But they feel, too, that when the call comes from the president to the people at home to give the money necessary for the prosecution of the war, it is the duty of everyone to give all that he can and that the people at home should be willing to do it. It is their share—and how small when compared to that of the fighting man—in the struggle. Let the men at the front know and feel that the people at home are heart and soul with them in this war; that the people at home are ready to make every effort and every sacrifice as long as will be necessary to win that complete and decisive victory which shall secure for all nations freedom and lasting peace.

Old Enough. The bagpipe was known in England and Ireland as early as the twelfth century, and is believed to have been in existence before the Christian era.
