YOU

YOU Should Not NEGLECT YOUR CLOTHES!

Many establishments claim to "Dry Clean" when they merely brush the material and sponge the surface to a limited extent. This leaves all the dirt and grease in the center of the cloth, and in the case of lined garments the dirt is left in the interlining, padding, etc., and in a short time it works back to the surface and the garment is as soiled looking as before being cleaned.

The Dry Cleaning process is not a mere brushing as many persons assume, but it is a thorough cleaning of the fabric by spirits and solvents, and requires not only a positive knowledge of how to do it, but a very efficient equipment with which to do it.

Bring your clothing here and have it CLEANED the RIGHT way.
