**WHY DO WE MAKE  
MISTAKES?**

Bill Irwin, the famous newspaper correspondent, was once asked why newspapers made so many mistakes. Bill answered that the wonder to him was that they ever got anything straight. He said, go out on the street and write down every account of the latest accident you are able to gather. Compare the accounts; no two will be alike. Get some of your informers to repeat the story and see how it has been magnified.

We would like to add that you try running down a rumor or to find a man who could really give you first hand information.

Try your hand at writing two columns a day of news or near news. That means two thousand words. Try it. Then change your mind about the easy graft of running a country newspaper.

Do you know how you can help to make life easier for us. Just step to the telephone, when you hear a news story, and repeat it to us. You may be sure that we will thank you and bless you for the assistance. We are interested in all of your lodge, social and community affairs. We want to print all the news in the county and we take this occasion to thank you for the assistance you are going to give us, now that we have called some of our little problems to your attention.

**Not Always Unlucky.**  
Friday has not been unlucky in history, if it is so considered by many. It was on Friday, August 3, 1492, that Columbus set sail on his voyage of discovery, and Friday, October 12, that he first sighted land; Friday, November 22, 1493, that he reached Hispanola on his second voyage; Friday, June 13, 1494, that he reached the continent of America. It was on Friday, July 17, 1776, that the motion was made that the United colonies are and ought to be free and independent. Many more occurrences could be cited.
