Temporary repairs are being started on the sewage disposal works of the village. It will not be long until the town will be forced by the state department of health to re-arrange the disposal plant in such a manner to take care of the increasing amount of sewage. The state through the health and waterways board can force municipalities to take this step. It will mean a bond issue for the village in the future, how far in the future depends wholly upon how efficient the repairs function.

10 DAY SALE

YOUR CHANCE TO BUY AT PRICES THAT WE MAY NEVER SEE SO LOW AGAIN

ROUND OAK PIPELESS FURNACE

This sale has made us many friends. They will feel even more kindly toward us next winter when they experience the warmth and comfort of the moist, healthful air that a Round Oak Pipeless Furnace circulates. They will thank us, too, when they try to price these furnaces later and hear that the building boom has created a scarcity with a corresponding advance in price. They will enjoy the convenience of tending but one fire and the fuel savings will look mighty good. Finally, long years of comfort, low expense and appreciation of air that is always clean, will cause them to look back at this sale with gratitude.

WE THOUGHTFULLY SAY "HURRY IN AND ORDER ONE OF THESE FURNACES"

This sale is nearly ended. All latest 1920 models bought at January prices. We are sharing profits to tide over the dull season in heating. We will reserve furnaces for future installation, if necessary. If you lack ready cash, let us talk it over. We regret to tell you we believe that no more will be obtainable at these prices.
