**Expensive to Pay Rent**  
**Home Owning Means Thrift**

RENT IS A HEAVY ITEM in the expense of a family not owning a home. It's a little tough to make monthly payments to the landlord when one might just as well pay that much every month on a home. With the monthly payment plan many families now have homes paid for while some of their neighbors continue to pay rent.

When you pay rent on a place to live for a period of years your landlord has the money and the property. You have nothing to show for the several years monthly payments. But when you pay monthly on a home you have something of your own and if ill health, old age or hard luck comes, you at least have a place in which to live.

Here are some figures showing what you accumulate for the other fellow. Rent averages from \$15.00 to \$30.00 per month. Consult the figures below and see how much money has gotten away from you.

With Interest at 6 per cent Compounded Annually	5 Years	10 Years	20 Years
Rent Month \$			
\$10.00	\$ 698.43	\$1,581.68	\$ 4,414.26
12.00	838.08	1,989.02	5,297.11
15.00	1,047.60	2,372.52	6,621.39
18.00	1,257.12	2,847.03	7,945.67
20.00	1,396.80	3,163.26	8,828.52
25.00	1,746.07	3,954.20	11,035.65
30.00	2,095.20	4,745.08	13,242.79

This shows whether you are drifting with your rent paying plan. Some of these days when you look back and figure what you have missed you will wish you had started to put some monthly savings into a home when you were younger. If you have a nest egg of a few hundred dollars it will be very easy to finance home building.

Nothing gives more of satisfaction than to live in your own home under your own vine and fig tree. The wife and children will be more content, far happier, and you will get more out of life. The subject is an important one to you and your family.

Lumber is cheaper. Prices have dropped about thirty-five per cent from the peak last April. Come to us and talk this matter over. We will give you facts. We want to help you with your building problems.
