"Jointed Snake" Really Lizard.
The glass, or so-called jointed snake, is really a lizard. When handled roughly the tail portion will break into two or three pieces. Contrary to superstition, these pieces will not grow again, though the rudimentary tail is sometimes developed after the first one is lost.

Simple Solution.
"Sages tell us that the best way to get the most out of life is to fall in love. A thoughtful person or a beautiful woman. Why not choose the latter and get both?" —Amherst Lord Jeff.
